

Overview of the Lab's work 2011–2021

The Lab's work has centred around three main themes:

Financial reporting

Innovation & digital

Strategy & sustainability

2022 FRC Lab projects

The Lab is exploring new ways to bring innovation and wider outreach to today's reporting challenges. Those challenges include ESG reporting and technology, which are key drivers of our work in 2022.

31 ESG data: production

- The aim of this project is to build understanding around production, distribution and consumption of ESG data.
- The first phase of the project will look into how companies produce ESG data.
- Areas of focus include: drivers of data collection, data collection systems, internal buy-in and collection of supply chain data.

32 Digital & data risk disclosure

- The aim of this project is to drive better disclosure on digital and data risk.
- Companies face increasingly complex risks around digital processes, systems and data.
- Investors want to understand how companies are adapting their strategy and processes in response.

33 Net zero reporting

- Given investor interest, as well as the early stage of guidance and reporting requirements, this project will explore net zero reporting from a market perspective.
- This project will look at investor views, identifying areas currently being reported well, and identify gaps for improvement. Read the [call for participants](#).

34 Structured reporting

- Following on from last year's early implementation review, the Lab will continue to monitor structured reporting in this first year of mandatory implementation.
- We will provide tips and guidance to drive up data quality.

Get involved

Do you want to help develop pragmatic solutions to today's reporting needs, test new ideas and learn from others facing similar challenges? Then get in touch via FRCLab@frc.org.uk to participate in the work of the Lab or fill out [a 5 minute survey](#).
