FRS 105
The Financial Reporting Standard applicable to the Micro-entities Regime
FRS 105 The Financial Reporting Standard applicable to the Micro-entities Regime is an accounting standard. It is issued by the Financial Reporting Council in respect of its application in the United Kingdom and promulgated by the Institute of Chartered Accountants in Ireland in respect of its application in the Republic of Ireland.

III. Note on legal requirements
IV. Republic of Ireland (RoI) legal references
Summary

(i) With effect from 1 January 2015 the Financial Reporting Council (FRC) revised financial reporting standards in the United Kingdom and Republic of Ireland. The revisions fundamentally reformed financial reporting, replacing the extant standards with five Financial Reporting Standards:

(a) FRS 100 Application of Financial Reporting Requirements;
(b) FRS 101 Reduced Disclosure Framework;
(c) FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland;
(d) FRS 103 Insurance Contracts; and
(e) FRS 104 Interim Financial Reporting.

(ii) The revisions made by the FRC followed a sustained and detailed period of consultation. The FRC made these fundamental changes recognising that the introduction of International Financial Reporting Standards for listed groups in 2002 (with application from 2005) called into question the need for two sets of financial reporting standards. Evidence from consultation supported a move towards an international-based framework for financial reporting, but one that was proportionate to the needs of preparers and users.

(iii) The FRC’s overriding objective in setting accounting standards is to enable users of accounts to receive high-quality understandable financial reporting proportionate to the size and complexity of the entity and users’ information needs.

(iv) In meeting this objective, the FRC aims to provide succinct financial reporting standards that:

(a) have consistency with international accounting standards through the application of an IFRS-based solution unless an alternative clearly better meets the overriding objective;
(b) reflect up-to-date thinking and developments in the way entities operate and the transactions they undertake;
(c) balance consistent principles for accounting by all UK and Republic of Ireland entities with practical solutions, based on size, complexity, public interest and users’ information needs;
(d) promote efficiency within groups; and
(e) are cost-effective to apply.

(v) FRS 105 The Financial Reporting Standard applicable to the Micro-entities Regime is an accounting standard intended for financial statements of companies which qualify for the micro-entities regime. FRS 105 is effective for accounting periods beginning on or after 1 January 2016. Early application is permitted. The FRC withdraws the Financial Reporting Standard for Smaller Entities from the effective date of this FRS.

Development of FRS 105

(vi) In November 2013, The Small Companies (Micro-entities’ Accounts) Regulations 2013 (SI 2013/3008) were made which amended The Small Companies and Groups (Accounts and Directors’ Report) Regulations 2008 (SI 2008/409). The amendment introduced a new optional reporting framework for companies that meet the qualifying criteria of a micro-entity. In response to this change of UK company law and the revision of financial reporting standards in the United Kingdom and Republic of Ireland set out in paragraph (i), the FRC developed FRS 105.
(vii) In February 2015 the FRC issued Financial Reporting Exposure Draft (FRED) 58 Draft FRS 105 The Financial Reporting Standard applicable to the Micro-entities Regime to consult on the new accounting standard for micro-entities. Respondents were generally supportive of the proposed requirements and comments made during the consultation were taken into account when FRS 105 was finalised.

(viii) FRS 105 is based on FRS 102, but its accounting requirements are adapted to satisfy the legal requirements applicable to micro-entities and to reflect the simpler nature and smaller size of micro-entities.

(ix) The application of the micro-entities regime is optional, however, a micro-entity that chooses to prepare its financial statements in accordance with the micro-entities regime is required to apply FRS 105. A company that qualifies for this regime, but chooses not to apply it, is required to apply another accounting standard. The possible options are set out in FRS 100 Application of Financial Reporting Requirements.

(x) At the same time as the FRC issues FRS 105, the FRC also makes amendments to FRS 102 to incorporate consequential changes resulting from the The Companies, Partnerships and Groups (Accounts and Reports) Regulations 2015 (SI 2015/980). FRS 105 takes into account any relevant changes made to FRS 102 in this regard.

Organisation of FRS 105

(xi) FRS 105 is organised by topic with each topic presented in a separate numbered section. Cross-references to paragraphs are identified by section followed by paragraph number. Paragraph numbers are in the form of xx.yy, where xx is the section number and yy is the sequential paragraph number within that section.

(xii) In examples that include monetary amounts, the measuring unit is Currency Unit (abbreviated as CU).

(xiii) All the paragraphs of FRS 105 have equal authority. Some sections include appendices of implementation guidance or examples. Some of these are an integral part of this FRS while others provide guidance concerning its application; each specifies its status.

(xiv) FRS 105 is set out in Sections 1 to 28 and the Glossary (Appendix I). Terms defined in the glossary are in bold type the first time they appear in each section.

(xv) Where references to other sections or paragraphs are made, these are in reference to FRS 105 unless otherwise stated.
FRS 105
The Financial Reporting Standard applicable to the Micro-entities Regime
Section 1
Scope

Scope of this Financial Reporting Standard

1.1 This FRS applies to the financial statements of a micro-entity. The financial statements of a micro-entity prepared in accordance with this FRS that include the micro-entity minimum accounting items are presumed in law to show a true and fair view of the micro-entity’s financial position and profit or loss in accordance with the micro-entities regime.

1.2 References to a micro-entity in this FRS are to a micro-entity that chooses to apply the micro-entities regime.

1.3 This FRS permits, but does not require, a micro-entity to include information additional to the micro-entity minimum accounting items in its financial statements. If a micro-entity includes additional information it shall have regard to any requirement of Section 1A Small Entities of FRS 102 that relates to that information.

Date from which effective

1.4 A micro-entity applying the micro-entities regime shall apply this FRS for accounting periods beginning on or after 1 January 2016. Early application is permitted.
Section 2
Concepts and Pervasive Principles

Scope of this section

2.1 This section sets out the concepts and basic principles that generally underlie the recognition and measurement of transactions of micro-entities within the scope of this FRS.

Financial position

2.2 The financial position of a micro-entity is the relationship of its assets, liabilities and equity as of a specific date as presented in the statement of financial position. These are defined as follows:

(a) An asset is a resource controlled by the micro-entity as a result of past events and from which future economic benefits are expected to flow to the micro-entity.

(b) A liability is a present obligation of the micro-entity arising from past events, the settlement of which is expected to result in an outflow from the micro-entity of resources embodying economic benefits.

(c) Equity is the residual interest in the assets of the micro-entity after deducting all its liabilities.

2.3 Some items that meet the definition of an asset or a liability may not be recognised as assets or liabilities in the statement of financial position because they do not satisfy the criteria for recognition in paragraphs 2.22 and 2.24. In particular, the expectation that future economic benefits will flow to or from a micro-entity must be sufficiently certain to meet the probability criterion before an asset or liability is recognised.

Assets

2.4 The future economic benefit of an asset is its potential to contribute, directly or indirectly, to the flow of cash to the micro-entity. Those cash flows may come from using the asset or from disposing of it.

2.5 Many assets, for example property, plant and equipment, have a physical form. However, physical form is not essential to the existence of an asset. Some assets are intangible.

2.6 In determining the existence of an asset, the right of ownership is not essential. Thus, for example, property held on a lease is an asset if the micro-entity controls the benefits that are expected to flow from the property.

Liabilities

2.7 An essential characteristic of a liability is that the micro-entity has a present obligation to act or perform in a particular way. The obligation may be either a legal obligation or a constructive obligation. A legal obligation is legally enforceable as a consequence of a binding contract or statutory requirement. A constructive obligation is an obligation that derives from a micro-entity’s actions when:

(a) by an established pattern of past practice, published policies or a sufficiently specific current statement, the micro-entity has indicated to other parties that it will accept certain responsibilities; and
2.8 The settlement of a present obligation usually involves the payment of cash, transfer of other assets, provision of services, the replacement of that obligation with another obligation, or conversion of the obligation to equity. An obligation may also be extinguished by other means, such as a creditor waiving or forfeiting its rights.

**Equity**

2.9 Equity is the residual interest in the assets of the micro-entity after deducting all its liabilities.

**Performance**

2.10 **Performance** is the relationship of the **in**come and **exp**enses of a micro-entity during a **re**porting **per**iod. Income and expenses are defined as follows:

(a) Income is increases in economic benefits during the reporting period in the form of inflows or enhancements of assets or decreases of liabilities that result in increases in equity, other than those relating to contributions from equity investors.

(b) Expenses are decreases in economic benefits during the reporting period in the form of outflows or depletions of assets or incurrences of liabilities that result in decreases in equity, other than those relating to distributions to equity investors.

2.11 The recognition of income and expenses results directly from the recognition and measurement of assets and liabilities. Criteria for the recognition of income and expenses are discussed in paragraphs 2.26 and 2.27.

**Income**

2.12 The definition of income encompasses both **re**venue and **ga**ins.

(a) Revenue is income that arises in the course of the ordinary activities of a micro-entity and is referred to by a variety of names including sales, fees, interest, dividends, royalties and rent.

(b) Gains are other items that meet the definition of income but are not revenue.

**Expenses**

2.13 The definition of expenses encompasses losses as well as those expenses that arise in the course of the ordinary activities of the micro-entity.

(a) Expenses that arise in the course of the ordinary activities of the micro-entity include, for example, cost of sales, wages and **depreciation**. They usually take the form of an outflow or depletion of assets such as cash, **in**ventory, or property, plant and equipment.

(b) Losses are other items that meet the definition of expenses and may arise in the course of the ordinary activities of the micro-entity.
Recognition of assets, liabilities, income and expenses

2.14 Recognition is the process of incorporating in the statement of financial position or income statement an item that meets the definition of an asset, liability, equity, income or expense and satisfies the following criteria:

(a) it is probable that any future economic benefit associated with the item will flow to or from the micro-entity; and

(b) the item has a cost or value that can be measured reliably.

2.15 The uncertainties that inevitably surround many events and circumstances are acknowledged by the exercise of prudence in the preparation of the financial statements. Prudence is the inclusion of a degree of caution in the exercise of the judgements needed in making the estimates required under conditions of uncertainty, such that assets or income are not overstated and liabilities or expenses are not understated. However, the exercise of prudence does not allow the deliberate understatement of assets or income, or the deliberate overstatement of liabilities or expenses. In short, prudence does not permit bias.

The probability of future economic benefit

2.16 The concept of probability is used in the first recognition criterion to refer to the degree of uncertainty that the future economic benefits associated with the item will flow to or from the micro-entity. Assessments of the degree of uncertainty attaching to the flow of future economic benefits are made on the basis of the evidence relating to conditions at the end of the reporting period available when the financial statements are prepared. Those assessments are made individually for individually significant items, and for a group for a large population of individually insignificant items.

Reliability of measurement

2.17 The second criterion for the recognition of an item is that it possesses a cost or value that can be measured with reliability. In many cases, the cost or value of an item is known. In other cases it must be estimated. The use of reasonable estimates is an essential part of the preparation of financial statements and does not undermine their reliability. When a reasonable estimate cannot be made, the item is not recognised in the financial statements.

2.18 An item that fails to meet the recognition criteria may qualify for recognition at a later date as a result of subsequent circumstances or events.

Measurement of assets, liabilities, income and expenses

2.19 Measurement is the process of determining the monetary amounts at which a micro-entity measures assets, liabilities, income and expenses in its financial statements. Measurement involves the selection of a basis of measurement. This FRS specifies which measurement basis a micro-entity shall use for many types of assets, liabilities, income and expenses.

Pervasive recognition and measurement principles

2.20 In the absence of a requirement in this FRS that applies specifically to a transaction or other event or condition, paragraph 8.4 provides guidance for making a judgement and paragraph 8.5 requires a micro-entity to look to the definitions, recognition criteria and measurement concepts for assets, liabilities, income and expenses and the pervasive principles set out in this section.

Financial Reporting Council 9
Accrual basis

2.21 A micro-entity shall prepare its financial statements using the *accrual basis* of accounting. On the accrual basis, items are recognised as assets, liabilities, equity, income or expenses when they satisfy the definitions and recognition criteria for those items.

Recognition in financial statements

Assets

2.22 A micro-entity shall recognise an asset in the statement of financial position when it is probable that the future economic benefits will flow to the micro-entity and the asset has a cost or value that can be measured reliably. An asset is not recognised in the statement of financial position when expenditure has been incurred for which it is considered not probable that economic benefits will flow to the micro-entity beyond the current reporting period. Instead such a transaction results in the recognition of an expense in the income statement.

2.23 A micro-entity shall not recognise a *contingent asset* as an asset. When the flow of future economic benefits to the micro-entity is virtually certain, then the related asset is not a contingent asset, and its recognition is appropriate.

Liabilities

2.24 A micro-entity shall recognise a liability in the statement of financial position when:
   (a) the micro-entity has an obligation at the end of the reporting period as a result of a past event;
   (b) it is probable that the micro-entity will be required to transfer resources embodying economic benefits in settlement; and
   (c) the settlement amount can be measured reliably.

2.25 A *contingent liability* is either a possible but uncertain obligation or a present obligation that is not recognised because it fails to meet one or both of the conditions (b) and (c) in paragraph 2.24.

Income

2.26 The recognition of income results directly from the recognition and measurement of assets and liabilities. A micro-entity shall recognise income in the income statement when an increase in future economic benefits related to an increase in an asset or a decrease of a liability has arisen that can be measured reliably.

Expenses

2.27 The recognition of expenses results directly from the recognition and measurement of assets and liabilities. A micro-entity shall recognise expenses in the income statement when a decrease in future economic benefits related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably.
Profit or loss

2.28 Profit or loss is the arithmetical difference between income and expenses. It is not a separate element of financial statements, and a separate recognition principle is not needed for it.

2.29 Generally this FRS does not allow the recognition of items in the statement of financial position that do not meet the definition of assets or of liabilities regardless of whether they result from applying the notion commonly referred to as the ‘matching concept’ for measuring profit or loss.

Measurement at initial recognition

2.30 At initial recognition, a micro-entity shall measure assets and liabilities at cost.

2.31 Under limited circumstances this FRS requires a micro-entity to estimate the cost of an asset or liability based on its fair value. Where this FRS requires a micro-entity to determine the fair value of an asset or liability, it shall use the following hierarchy to estimate the fair value:

(a) The best evidence of fair value is the open market price for an identical asset or liability in an active market.

(b) When an open market price is not available, the price of a recent transaction for an identical asset or liability provides evidence of fair value as long as there has not been significant change in economic circumstances or a significant lapse of time since the transaction took place.

(c) If neither (a) nor (b) above are available, the fair value shall be estimated using a valuation technique. The objective of using a valuation technique is to estimate what the price of a recent transaction for an identical asset or liability would have been on the measurement date in an arm’s length exchange motivated by normal business considerations.

Subsequent measurement

Financial assets and financial liabilities

2.32 A micro-entity measures financial assets and financial liabilities as follows:

(a) Investments in preference shares or ordinary shares and investments in subsidiaries and associates and interests in jointly controlled entities shall be measured at cost less impairment.

(b) Derivatives are measured at cost adjusted for amounts recognised in profit or loss over the term of the instruments and any impairment loss.

(c) Financial instruments other than financial instruments covered by paragraphs (a) and (b) are measured at cost adjusted for the allocation of interest, the amortisation of any transaction costs included in the cost of the instruments and any impairment loss.

Non-financial assets

2.33 Property, plant and equipment, investment property and biological assets are measured at cost less accumulated depreciation and accumulated impairment losses.
2.34 **Inventories** are measured at the lower of cost and selling price less costs to complete and sell.

2.35 Measurement of assets at amounts lower than their initial historical cost is intended to ensure that an asset is not measured at an amount greater than the micro-entity expects to recover from the sale or use of that asset.

**Liabilities other than financial liabilities**

2.36 Most liabilities other than financial liabilities are measured at the best estimate of the amount that would be required to settle the obligation at the **reporting date**.

**Offsetting**

2.37 A micro-entity shall not offset assets and liabilities, or income and expenses, unless required or permitted by this FRS.

(a) Measuring assets net of valuation allowances (for example, allowances for inventory obsolescence and allowances for uncollectible receivables) is not offsetting.

(b) If a micro-entity’s normal operating activities do not include buying and selling **fixed assets**, including investments and operating assets, then the micro-entity reports gains and losses on disposal of such assets by deducting from the proceeds on disposal the **carrying amount** of the asset and related selling expenses.
Section 3
Financial Statement Presentation

Scope of this section

3.1 This section explains what compliance with this FRS requires and what makes up a complete set of financial statements for a micro-entity.

Presumed true and fair view

3.2 The financial statements of a micro-entity that comply with this FRS are presumed in law to give a true and fair view of the financial position and profit or loss of the micro-entity in accordance with the micro-entities regime.

Going concern

3.3 When preparing financial statements using this FRS, the management of a micro-entity shall make an assessment of whether the going concern basis of accounting is appropriate. The going concern basis of accounting is appropriate unless management either intends to liquidate the micro-entity or to cease trading, or has no realistic alternative but to do so. In assessing whether the going concern basis of accounting is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, 12 months from the date when the financial statements are authorised for issue.

Frequency of reporting

3.4 A micro-entity shall present a complete set of financial statements (including comparative information as set out in paragraph 3.7) at the end of each reporting period.

Consistency of presentation

3.5 A micro-entity shall retain the presentation and classification of items in the financial statements from one period to the next unless:

(a) it is apparent, following a significant change in the nature of the micro-entity’s operations or a review of its financial statements, that another presentation or classification would be more appropriate having regard to the criteria for the selection and application of accounting policies in Section 8 Accounting Policies, Estimates and Errors; or

(b) this FRS requires a change in presentation.

3.6 When the presentation or classification of items in the financial statements is changed, a micro-entity shall reclassify comparative amounts unless the reclassification is impracticable.

Comparative information

3.7 Except when this FRS permits or requires otherwise, a micro-entity shall present comparative information in respect of the preceding period for all amounts presented in the current period’s financial statements.
Materiality

3.8 A micro-entity need not provide a specific disclosure required by this FRS if the information is not material. This exemption does not apply to the disclosures required by paragraph 6.2(a).

Complete set of financial statements

3.9 A complete set of financial statements of a micro-entity shall include the following:
   (a) a statement of financial position as at the reporting date with notes included at the foot of the statement; and
   (b) an income statement for the reporting period.

3.10 Because paragraph 3.7 requires comparative amounts in respect of the previous period for all amounts presented in the financial statements, a complete set of financial statements means that a micro-entity shall present, as a minimum, two of each of the required financial statements and related notes.

3.11 In a complete set of financial statements, a micro-entity shall present each financial statement with equal prominence.

3.12 A micro-entity may use titles for the financial statements other than those used in this FRS as long as they are not misleading.

Identification of the financial statements

3.13 A micro-entity shall clearly identify each of the financial statements and the notes. In addition, a micro-entity shall display the following information prominently, and repeat it when necessary for an understanding of the information presented:
   (a) the name of the reporting entity and any change in its name since the end of the preceding reporting period;
   (b) the date of the end of the reporting period and the period covered by the financial statements;
   (c) the presentation currency; and
   (d) the level of rounding, if any, used in presenting amounts in the financial statements.

Statement of compliance with the micro-entity provisions

3.14 In accordance with section 414(3) of the Act, financial statements prepared in accordance with the micro-entity provisions shall on the statement of financial position, in a prominent position above the signature, contain a statement that the financial statements are prepared in accordance with the micro-entity provisions.
Section 4  
Statement of Financial Position  

Scope of this section  

4.1 This section sets out the information that is to be presented in a statement of financial position and how to present it. The statement of financial position (which is referred to as the balance sheet in the Act) presents a micro-entity’s assets, liabilities and equity as of a specific date – the end of the reporting period.

4.2 A micro-entity is permitted, but not required, to present information additional to that required by this section. Paragraph 1.3 applies to any additional information presented.

Information to be presented in the statement of financial position  

4.3 A micro-entity shall present a statement of financial position in accordance with one of the formats set out in Section C of Part 1 of Schedule 1 to the Small Companies Regulations, as follows:

<table>
<thead>
<tr>
<th>Format 1</th>
<th>CU</th>
<th>CU</th>
</tr>

<tr>
<td>Accruals and deferred income</td>
<td>X</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>X</td>
</tr>
</tbody>
</table>

**Creditors: amounts falling due within one year**

4.4 A micro-entity shall classify a creditor as due within one year when the micro-entity does not have an unconditional right, at the end of the reporting period, to defer settlement of the creditor for at least 12 months after the reporting date.
Section 5
Income Statement

Scope of this section

5.1 This section requires a micro-entity to present its profit or loss for a period, ie its financial performance for the period. It sets out the information that is to be presented in the income statement (which is referred to as the profit and loss account in the Act) and how to present it.

5.2 A micro-entity is permitted, but not required, to present information additional to that required by this section. Paragraph 1.3 applies to any additional information presented.

Presentation of profit or loss

5.3 A micro-entity shall present its profit or loss for a period in an income statement in accordance with Section C of Part 1 of Schedule 1 to the Small Companies Regulations, as follows:

<table>
<thead>
<tr>
<th>CU</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Turnover</td>
<td>X</td>
</tr>
<tr>
<td>Other income</td>
<td>X</td>
</tr>
<tr>
<td>Cost of raw materials and consumables</td>
<td>(X)</td>
</tr>
<tr>
<td>Staff costs</td>
<td>(X)</td>
</tr>
<tr>
<td>Depreciation and other amounts written off assets</td>
<td>(X)</td>
</tr>
<tr>
<td>Other charges</td>
<td>(X)</td>
</tr>
<tr>
<td>Tax</td>
<td>(X)</td>
</tr>
<tr>
<td>Profit or loss</td>
<td>X / (X)</td>
</tr>
</tbody>
</table>

5.4 Under this FRS, the effects of corrections of material errors and changes in accounting policies are presented as retrospective adjustments of prior periods rather than as part of profit or loss in the period in which they arise (see Section 8 Accounting Policies, Estimates and Errors).
Section 6
Notes to the Financial Statements

Scope of this section

6.1 This section sets out the information that shall be disclosed in the notes to the financial statements and where. A micro-entity is permitted, but not required, to disclose information additional to that required by this section. Paragraph 1.3 applies to any additional information disclosed.

Structure and content of the notes

6.2 In accordance with section 472(1A) of the Act, the notes to the financial statements of a micro-entity shall be presented at the foot of the statement of financial position and shall include the following information:

(a) advances, credit and guarantees granted to directors as required by section 413 of the Act (see paragraph 6A.1 in the Appendix to this Section); and

(b) financial commitments, guarantees and contingencies as required by regulation 5A of, and paragraph 57 of Part 3 of Schedule 1 to, the Small Companies Regulations (see paragraphs 6A.2 and 6A.3 in the Appendix to this Section).
Appendix to Section 6

Company law disclosure requirements

This appendix is an integral part of this FRS.

This appendix sets out the company law disclosure requirements referred to in paragraph 6.2. Other than substituting company law terminology with the equivalent terminology used in this FRS (see Appendix II Table of equivalence for UK Companies Act terminology), the text is as close as possible to that set out in company law.

Where this FRS contains a disclosure requirement related to a company law requirement this has been indicated.

6A.1 Details of advances and credits granted by a micro-entity to its directors and guarantees of any kind entered into by a micro-entity on behalf of its directors must be shown in the notes to the financial statements.

The details required of an advance or credit are:
(a) its amount;
(b) an indication of the interest rate;
(c) its main conditions;
(d) any amounts repaid;
(e) any amounts written off; and
(f) any amounts waived.

There must also be stated in the notes to the financial statements the totals of amounts stated under (a), (d), (e) and (f).

The details required of a guarantee are:
(a) its main terms;
(b) the amount of the maximum liability that may be incurred by a micro-entity;
(c) any amount paid and any liability incurred by a micro-entity for the purpose of fulfilling the guarantee (including any loss incurred by reason of enforcement of the guarantee).

There must also be stated in the notes to the financial statements the totals of amounts stated under (b) and (c). (Section 413 of the Act)

6A.2 The total amount of any financial commitments, guarantees and contingencies that are not included in the statement of financial position must be stated. (Schedule 1, paragraph 57(1))

The total amount of any commitments concerning pensions must be separately disclosed. (Schedule 1, paragraph 57(3))

The total amount of any commitments which are undertaken on behalf of or for the benefit of:
(a) any parent, fellow subsidiary or any subsidiary of a micro-entity; or
(b) any undertaking in which a micro-entity has a participating interest,

must be separately stated and those within (a) must also be stated separately from those within (b). (Schedule 1, paragraph 57(4))

The following paragraphs in this FRS address these disclosure requirements within the context of specific transactions:

(a) Section 9 Financial Instruments: paragraph 9.28
(b) Section 11 Investments in Joint Ventures: paragraph 11.9
(c) Section 12 Property, Plant and Equipment and Investment Property: paragraph 12.28
(d) Section 13 Intangible Assets other than Goodwill: paragraph 13.17
(e) Section 14 Business Combinations and Goodwill: paragraph 14.3
(f) Section 15 Leases: paragraphs 15.17 and 15.33.
(g) Section 16 Provisions and Contingencies: paragraph 16.19
(h) Section 23 Employee Benefits: paragraph 23.22.
(i) Section 27 Specialised Activities: paragraph 27.5.

6A.3 An indication of the nature and form of any valuable security given by the micro-entity in respect of commitments, guarantees and contingencies within paragraph 6A.2. must be given. (Schedule 1, paragraph 57(2))

The following paragraphs in this FRS address these disclosure requirements within the context of specific transactions:

(a) Section 9 Financial Instruments: paragraph 9.29.
(b) Section 10 Inventories: paragraph 10.22.
(c) Section 12 Property, Plant and Equipment and Investment Property: paragraph 12.29.
(d) Section 13 Intangible Assets other than Goodwill: paragraph 13.18.
(e) Section 27 Specialised Activities: paragraph 27.6.
Section 7
Subsidiaries, Associates, Jointly Controlled Entities and Intermediate Payment Arrangements

Scope of this section

7.1 This section sets out how a micro-entity shall account for investments in subsidiaries and associates, interests in jointly controlled entities and intermediate payment arrangements.

Investments in subsidiaries, associates and interests in jointly controlled entities

7.2 A micro-entity shall account for any investments in subsidiaries and associates and any interests in jointly controlled entities in accordance with Section 9 Financial Instruments.

Consolidated financial statements

7.3 An entity that is required or chooses to present consolidated financial statements is excluded from the micro-entities regime (sections 384A(8) and 384B(2) of the Act) and shall not apply this FRS.

Intermediate payment arrangements (eg ESOPs)

7.4 Intermediate payment arrangements may take a variety of forms:

(a) The intermediary is usually established by the micro-entity and constituted as a trust, although other arrangements are possible.

(b) The relationship between the micro-entity and the intermediary may take different forms. For example, when the intermediary is constituted as a trust, the micro-entity will not have a right to direct the intermediary’s activities. However, in these and other cases the micro-entity may give advice to the intermediary or may be relied on by the intermediary to provide the information it needs to carry out its activities. Sometimes, the way the intermediary has been set up gives it little discretion in the broad nature of its activities.

(c) The arrangements are most commonly used to pay employees, although they are sometimes used to compensate suppliers of goods and services other than employee services. Sometimes the micro-entity’s employees and other suppliers are not the only beneficiaries of the arrangement. Other beneficiaries may include past employees and their dependants, and the intermediary may be entitled to make charitable donations.

(d) The precise identity of the persons or entities that will receive payments from the intermediary, and the amounts that they will receive, are not usually agreed at the outset.

(e) The micro-entity often has the right to appoint or veto the appointment of the intermediary’s trustees (or its directors or the equivalent).

(f) The payments made to the intermediary and the payments made by the intermediary are often cash payments but may involve other transfers of value.

Examples of intermediate payment arrangements are employee share ownership plans (ESOPs) and employee benefit trusts that are used to facilitate employee shareholdings under remuneration schemes. In a typical employee benefit trust
arrangement for share-based payment transactions, a micro-entity makes payments to a trust or guarantees borrowing by the trust, and the trust uses its funds to accumulate assets to pay the micro-entity's employees for services the employees have rendered to the micro-entity.

Although the trustees of an intermediary must act at all times in accordance with the interests of the beneficiaries of the intermediary, most intermediaries (particularly those established as a means of remunerating employees) are specifically designed so as to serve the purposes of the micro-entity, and to ensure that there will be minimal risk of any conflict arising between the duties of the trustees of the intermediary and the interest of the micro-entity, such that there is nothing to encumber implementation of the wishes of the micro-entity in practice. Where this is the case, the micro-entity has de facto control.

Accounting for intermediate payment arrangements

7.5 When a micro-entity makes payments (or transfers assets) to an intermediary, there is a rebuttable presumption that the entity has exchanged one asset for another and that the payment itself does not represent an immediate expense. To rebut this presumption at the time the payment is made to the intermediary, the micro-entity must demonstrate:
(a) it will not obtain future economic benefit from the amounts transferred; or
(b) it does not have control of the right or other access to the future economic benefit it is expected to receive.

7.6 Where a payment to an intermediary is an exchange by the micro-entity of one asset for another, any assets that the intermediary acquires in a subsequent exchange transaction will also be under the control of the micro-entity. Accordingly, assets and liabilities of the intermediary shall be accounted for by the micro-entity as an extension of its own business and recognised in its financial statements. An asset will cease to be recognised as an asset of the micro-entity when, for example, the asset of the intermediary vests unconditionally with identified beneficiaries.

7.7 A micro-entity may distribute its own equity instruments, or other equity instruments, to an intermediary in order to facilitate employee shareholdings under a remuneration scheme. Where this is the case and the micro-entity has control, or de facto control, of the assets and liabilities of the intermediary, the commercial effect is that the micro-entity is, for all practical purposes, in the same position as if it had purchased the shares directly.

7.8 Where an intermediary holds the micro-entity's equity instruments, the micro-entity shall account for the equity instruments as if it had purchased them directly. The micro-entity shall account for the assets and liabilities of the intermediary in its financial statements as follows:
(a) The consideration paid for the equity instruments of the sponsoring entity shall be deducted from equity until such time that the equity instruments vest unconditionally with employees.
(b) Other assets and liabilities of the intermediary shall be recognised as assets and liabilities of the micro-entity.
(c) No gain or loss shall be recognised in profit or loss on the purchase, sale, issue or cancellation of the micro-entity's own equity instruments.
(d) Finance costs and any administration expenses shall be recognised on an accruals basis rather than as funding payments are made to the intermediary.
(e) Any dividend income arising on the micro-entity's own equity instruments shall be excluded from profit or loss and deducted from the aggregate of dividends paid.

22 FRS 105 (July 2015)
Section 8
Accounting Policies, Estimates and Errors

Scope of this section

8.1 This section provides guidance for selecting and applying the accounting policies used in preparing financial statements. It also covers changes in accounting estimates and corrections of errors in prior period financial statements.

Selection and application of accounting policies

8.2 Accounting policies are the specific principles, bases, conventions, rules and practices applied by a micro-entity in preparing and presenting financial statements.

8.3 If this FRS specifically addresses a transaction, other event or condition, a micro-entity shall apply this FRS. However, the micro-entity need not follow a requirement in this FRS if the effect of doing so would not be material. This exemption does not apply to the disclosures required by paragraph 6.2(a).

8.4 If this FRS does not specifically address a transaction, other event or condition, a micro-entity’s management shall use its judgement in developing and applying an accounting policy that results in information that:
   (a) represents faithfully the transactions, other events or conditions;
   (b) reflects the economic substance of the transactions, other events and conditions, and not merely the legal form;
   (c) is neutral, ie free from bias; and
   (d) is prudent.

8.5 In making the judgement described in paragraph 8.4, management shall refer to and consider the definitions, recognition criteria and measurement concepts for assets, liabilities, income and expenses and the pervasive principles in Section 2 Concepts and Pervasive Principles. A micro-entity is not required to provide any disclosures other than those required by Section 6 Notes to the Financial Statements in respect of these transactions or events.

Consistency of accounting policies

8.6 A micro-entity shall select and apply its accounting policies consistently for similar transactions, other events and conditions.

Changes in accounting policies

8.7 A micro-entity shall change an accounting policy only if the change:
   (a) is required by this FRS; or
   (b) results in the financial statements providing reliable and more relevant information about the effects of transactions, other events or conditions on the micro-entity’s financial position and financial performance.
8.8 The following are not changes in accounting policies:
(a) the application of an accounting policy for transactions, other events or conditions that differ in substance from those previously occurring; and
(b) the application of a new accounting policy for transactions, other events or conditions that did not occur previously or were not material.

Applying changes in accounting policies

8.9 A micro-entity shall account for changes in accounting policy as follows:
(a) a micro-entity shall account for a change in accounting policy resulting from a change in the requirements of this FRS in accordance with the transitional provisions, if any, specified in that amendment; and
(b) a micro-entity shall account for all other changes in accounting policy retrospectively (see paragraph 8.10).

Retrospective application

8.10 When a change in accounting policy is applied retrospectively in accordance with paragraph 8.9, the micro-entity shall apply the new accounting policy to comparative information for prior periods to the earliest date for which it is practicable, as if the new accounting policy had always been applied. When it is impracticable to determine the individual-period effects of a change in accounting policy on comparative information for one or more prior periods presented, the micro-entity shall apply the new accounting policy to the carrying amounts of assets and liabilities as at the beginning of the earliest period for which retrospective application is practicable, which may be the current period, and shall make a corresponding adjustment to the opening balance of each affected component of equity for that period.

Changes in accounting estimates

8.11 A change in accounting estimate is an adjustment of the carrying amount of an asset or a liability, or the amount of the periodic consumption of an asset, that results from the assessment of the present status of, and expected future benefits and obligations associated with, assets and liabilities. Changes in accounting estimates result from new information or new developments and, accordingly, are not corrections of errors. When it is difficult to distinguish a change in an accounting policy from a change in an accounting estimate, the change is treated as a change in an accounting estimate.

8.12 A micro-entity shall recognise the effect of a change in an accounting estimate, other than a change to which paragraph 8.13 applies, prospectively by including it in profit or loss in:
(a) the period of the change, if the change affects that period only; or
(b) the period of the change and future periods, if the change affects both.

8.13 To the extent that a change in an accounting estimate gives rise to changes in assets and liabilities, or relates to an item of equity, the micro-entity shall recognise it by adjusting the carrying amount of the related asset, liability or equity item in the period of the change.
Corrections of prior period errors

8.14 Prior period errors are omissions from, and misstatements in, a micro-entity’s financial statements for one or more prior periods arising from a failure to use, or misuse of, reliable information that:
(a) was available when financial statements for those periods were authorised for issue; and
(b) could reasonably be expected to have been obtained and taken into account in the preparation and presentation of those financial statements.

8.15 Such errors include the effects of mathematical mistakes, mistakes in applying accounting policies, oversights or misinterpretations of facts, and fraud.

8.16 To the extent practicable, a micro-entity shall correct a material prior period error retrospectively in the first financial statements authorised for issue after its discovery by:
(a) restating the comparative amounts for the prior period(s) presented in which the error occurred; or
(b) if the error occurred before the earliest prior period presented, restating the opening balances of assets, liabilities and equity for the earliest prior period presented.

8.17 When it is impracticable to determine the period-specific effects of a material error on comparative information for one or more prior periods presented, the micro-entity shall restate the opening balances of assets, liabilities and equity for the earliest period for which retrospective restatement is practicable (which may be the current period).
Section 9
Financial Instruments

Scope of this section

9.1 This section deals with the recognition, derecognition, measurement and disclosure of financial instruments (financial assets and financial liabilities).

9.2 All financial instruments are accounted for in accordance with this section, unless they are excluded by paragraph 9.3. Examples of financial instruments in the scope of this section include:
   (a) cash;
   (b) accounts receivable and payable (trade debtors and creditors);
   (c) commercial paper and commercial bills held;
   (d) demand and fixed-term deposits with banks or similar institutions;
   (e) bonds, loans and similar instruments;
   (f) investments;
   (g) options, warrants, futures contracts, forward contracts and interest rate swaps.

9.3 This section does not apply to the following financial instruments:
   (a) Financial instruments that meet the definition of a micro-entity’s own equity, and the equity component of compound financial instruments issued by the reporting micro-entity that contain both a liability and an equity component (see Section 17 Liabilities and Equity).
   (b) Leases, to which Section 15 Leases applies. However, the derecognition requirements in paragraphs 9.21 to 9.23 and impairment accounting requirements in paragraphs 9.16 to 9.19 apply to derecognition and impairment of receivables recognised by a lessor and the derecognition requirements in paragraphs 9.25 and 9.26 apply to payables recognised by a lessee arising under a finance lease.
   (c) Employers’ rights and obligations under employee benefit plans, to which Section 23 Employee Benefits applies.
   (d) Financial instruments, contracts and obligations to which Section 21 Share-based Payment applies.
   (e) Reimbursement assets and financial guarantee contracts accounted for in accordance with Section 16 Provisions and Contingencies.
   (f) Contracts for contingent consideration in a business combination (see Section 14 Business Combinations and Goodwill). This exemption applies only to the acquirer.

Initial recognition of financial assets and liabilities

9.4 A micro-entity shall recognise a financial asset or a financial liability only when the micro-entity becomes a party to the contractual provisions of the instrument.
Initial measurement

9.5 A financial asset or financial liability is recognised initially at its cost. The cost is measured at the transaction price.

<table>
<thead>
<tr>
<th>Examples – Transaction price of a financial asset or liability</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 For a loan the transaction price is the amount borrowed or loaned.</td>
</tr>
<tr>
<td>2 For trade receivables or payables (trade debtors or trade creditors) the transaction price equals the invoice price unless payment is deferred beyond normal credit terms (see paragraph 9.6).</td>
</tr>
<tr>
<td>3 For an investment the transaction price is the consideration given (eg cash paid to acquire the investment).</td>
</tr>
<tr>
<td>4 For an option the transaction price is the premium paid to purchase the option.</td>
</tr>
</tbody>
</table>

9.6 When a micro-entity purchases inventory, property, plant and equipment, investment property or sells goods or services with settlement deferred beyond normal credit terms, the transaction price is the cash price available on the date of the transaction (see Sections 10 Inventories, 12 Property, Plant and Equipment and Investment Property and 18 Revenue respectively).

<table>
<thead>
<tr>
<th>Example – Transaction price when payment is deferred</th>
</tr>
</thead>
<tbody>
<tr>
<td>A micro-entity sells goods to a customer for CU100. Customers are usually required to pay within 14 days of the invoice date, but the micro-entity agrees with the customer that payment will be deferred for one year. The micro-entity sells the same item for CU90, if payment is received within the usual credit terms.</td>
</tr>
</tbody>
</table>

The cash price for the goods and thereby the transaction price is CU90.

9.7 Transaction costs shall be added to the cost of a financial asset or shall be deducted from the cost of a financial liability, unless they are not material in which case they are recognised immediately as an expense in profit or loss.

<table>
<thead>
<tr>
<th>Examples – Transaction costs</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 A micro-entity receives a bank loan of CU500. The bank charges CU5 in arrangement fees. The micro-entity determines that the transaction costs are immaterial and recognises them immediately in profit or loss as an expense. The cost of the loan is CU500.</td>
</tr>
<tr>
<td>2 A micro-entity is making an investment and buys shares in another entity for CU1,000. The micro-entity incurs legal fees and other transaction costs totalling CU100. The micro-entity determines that the transaction costs are material and includes them in the cost of the investment. The total cost of the investment is CU1,100.</td>
</tr>
<tr>
<td>3 A micro-entity takes out a forward foreign currency exchange contract and is charged a fee of CU30. The micro-entity determines that the transaction costs are material. The total cost of the forward foreign currency exchange contract is CU30.</td>
</tr>
</tbody>
</table>
Subsequent measurement

9.8 At the end of each reporting period, a micro-entity shall measure financial instruments as follows, without any deduction for transaction costs the micro-entity may incur on sale or other disposal:

(a) Investments in preference shares or ordinary shares and investments in subsidiaries and associates and interests in jointly controlled entities shall be measured at cost less impairment.

(b) Derivatives shall be measured as set out in paragraph 9.10.

(c) Financial instruments other than those covered by paragraphs (a) and (b) shall be measured as set out in paragraphs 9.12 to 9.15.

All financial assets must be assessed for impairment or uncollectability. See paragraphs 9.16 to 9.19.

Derivatives

9.9 Derivatives include forward foreign currency exchange contracts and interest rate swaps. More examples are given in paragraph 9.2(g).

9.10 The transaction price of a financial instrument that is a derivative plus any transaction costs not immediately recognised in profit or loss (see paragraph 9.7) less any impairment losses recognised to date, is allocated to profit or loss over the term of the contract on a straight-line basis, unless another systematic basis of allocation is more appropriate.

Contractual payments

9.11 Under a derivative contract a micro-entity may be required to make or may be entitled to receive payments. A micro-entity shall recognise amounts payable or receivable as they accrue.

Financial instruments measured in accordance with paragraph 9.8(c)

9.12 Financial instruments other than those covered in paragraphs 9.8(a) and 9.8(b) are measured as follows:

(a) the transaction price (see paragraph 9.5);

(b) plus, in the case of a financial asset, or minus in the case of a financial liability, transaction costs not yet recognised in profit or loss (see paragraph 9.15);

(c) plus the cumulative interest income or expense recognised in profit or loss to date (see paragraphs 9.13 and 9.14);

(d) minus all repayments of principal and all interest payments or receipts to date;

(e) minus, in the case of a financial asset, any reduction (directly or through the use of an allowance account) for impairment or uncollectability (see paragraphs 9.16 to 9.19).

Allocation of interest income or expense

9.13 Total interest income or expense is the difference between the initial transaction price and the total amount of the subsequent contractual receipts or payments, excluding transaction costs.
A micro-entity shall allocate total interest income or expense over the term of the contract as follows:

(a) For transactions where settlement is deferred beyond normal credit terms (see paragraph 9.6), total interest income or expense shall be allocated on a straight-line basis over the term of the contract.

(b) In all other cases, interest income or expense is allocated at a constant rate on the financial asset’s or financial liability’s carrying amount excluding transaction costs not yet recognised in profit or loss (see paragraph 9.12(b)). The applicable rate will normally be the contractual rate of interest and may be a variable or a fixed rate.

Transaction costs

Transaction costs not immediately recognised in profit or loss in accordance with paragraph 9.7, are recognised in profit or loss on a straight-line basis over the term of the contract.

Example 1: Measurement of a loan liability

A micro-entity receives a loan of CU1,000 on 1 January 20X0. The micro-entity pays loan arrangement fees of CU50. The contractual interest rate is five per cent payable annually in arrears on 31 December. The loan is repayable after two years. The micro-entity’s annual reporting period ends on 31 December.

The micro-entity determines that the loan arrangement fees (transaction costs) are material and on 1 January 20X0 recognises the loan at its transaction price of CU1,000 less the transaction costs of CU50. The transactions costs of CU50 are recognised in the profit and loss account on a straight-line basis over two years, i.e. CU25 each year.

The carrying value of the loan is as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Carrying amount at 1 Jan</th>
<th>Interest at 5%</th>
<th>Transaction costs in profit or loss</th>
<th>Cash payments</th>
<th>Carrying amount at 31 Dec</th>
</tr>
</thead>
<tbody>
<tr>
<td>20X0</td>
<td>(950)</td>
<td>(50)</td>
<td>(25)</td>
<td>50</td>
<td>(975)</td>
</tr>
<tr>
<td>20X1</td>
<td>(975)</td>
<td>(50)</td>
<td>(25)</td>
<td>1,050</td>
<td>0</td>
</tr>
</tbody>
</table>

Example 2: Measurement of a loan asset

A micro-entity makes an interest-free loan of CU900 on 1 January 20X0. The loan is repayable after two years. In 20X1 the micro-entity agrees that the borrower only needs to repay CU450 which is paid on 31 December 20X1. The micro-entity’s annual reporting period ends on 31 December.

The loan is recognised at its transaction price of CU900 on 1 January 20X0. In 20X1 an impairment loss for the uncollectability of CU450 is recognised. The carrying amount of the loan is as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Carrying amount at 1 Jan</th>
<th>Impairment</th>
<th>Cash receipts</th>
<th>Carrying amount at 31 Dec</th>
</tr>
</thead>
<tbody>
<tr>
<td>20X0</td>
<td>900</td>
<td>-</td>
<td>-</td>
<td>900</td>
</tr>
<tr>
<td>20X1</td>
<td>900</td>
<td>(450)</td>
<td>(450)</td>
<td>0</td>
</tr>
</tbody>
</table>
Impairment of financial assets

Recognition and measurement

9.16 At the end of each reporting period, a micro-entity shall assess whether there is evidence of impairment of any financial asset.

9.17 Evidence that a financial asset could be impaired includes the following events:
(a) significant financial difficulty of the debtor;
(b) a breach of contract, such as a default or delinquency in interest or principal payments;
(c) the creditor, for economic or legal reasons relating to the debtor’s financial difficulty, granting to the debtor a concession that the creditor would not otherwise consider;
(d) it has become probable that the debtor will enter bankruptcy or other financial reorganisation;
(e) declining market values of the asset or similar assets;
(f) significant changes with an adverse effect on the asset that have taken place in the technological, market, economic or legal environment; and
(g) the contract has become an onerous contract.

9.18 A micro-entity shall measure an impairment loss for financial assets as set out below. An impairment loss is immediately recognised in profit or loss.
(a) An investment in preference shares or ordinary shares and an investment in subsidiaries and associates and an interest in jointly controlled entities is impaired and an impairment loss shall be recognised if the asset’s carrying amount exceeds the best estimate of the asset’s selling price as at the reporting date.
(b) An asset that is a derivative is impaired and an impairment loss shall be recognised if the asset’s carrying value exceeds the asset’s fair value less costs to sell.
(c) An asset measured in accordance with paragraph 9.8(c), is impaired and an impairment loss shall be recognised, if the asset’s carrying amount exceeds the total of estimated net cash flows that can be generated from the asset. When the effect of the time value of money is material, the amount of the net cash flows shall be the present value of the estimated net cash flows. The discount rate shall be the asset’s current contractual interest rate.

Reversal

9.19 A micro-entity shall reverse a previously recognised impairment loss if in a subsequent period the amount of an impairment loss decreases and the decrease can be related to an event occurring after the impairment was recognised (e.g., an improvement in the debtor’s credit rating). The micro-entity shall recognise the amount of the reversal in profit or loss immediately.

Onerous contracts

9.20 At each reporting date a micro-entity shall assess whether a derivative constitutes an onerous contract. A derivative is an onerous contract when the expected unavoidable payments exceed the economic benefits expected to be received from the derivative. A derivative which does not mitigate a specific risk or risks of a micro-entity is an onerous contract when the expected payments exceed the expected cash receipts under the

30 FRS 105 (July 2015)
contract. The present obligation arising from an onerous contract shall be measured in accordance with Section 16.

**Example: Assessment of whether a derivative is onerous**

A micro-entity takes out a loan with a variable rate of interest. In order to mitigate the risk of fluctuating interest payments, the micro-entity enters into an interest rate swap. Through the interest rate swap the micro-entity pays a fixed rate of interest and receives a variable rate of interest equal to the interest on the loan.

**Scenario 1:**
Interest rates are going down and as a result the payments made by the micro-entity under the interest rate swap are higher than the receipts. The interest rate swap is not an onerous contract because the micro-entity continues to benefit from the interest rate swap by effectively paying a fixed rate of interest on the loan.

**Scenario 2:**
The micro-entity repays the loan early, but the interest rate swap cannot be terminated. The micro-entity expects that the payments due under the interest rate swap exceed the receipts. The interest rate swap is an onerous contract because the micro-entity no longer derives a benefit from it.

### Derecognition of a financial asset

9.21 A micro-entity shall derecognise a financial asset only when:

(a) the contractual rights to the cash flows from the financial asset expire or are settled;

(b) the micro-entity transfers to another party substantially all of the risks (eg slow or non-payment risk) and rewards of ownership (eg future cash flows from a debtor); or

(c) when no future economic benefits are expected from holding it or its disposal.

9.22 A micro-entity shall recognise any **gain** or loss on the derecognition of a financial asset in profit or loss when the item is derecognised.

9.23 If a micro-entity received any proceeds from the transfer of a financial asset, but the conditions in paragraph 9.21 are not met, a micro-entity shall continue to recognise the asset in its entirety and shall recognise a financial liability for the consideration received. The asset and liability shall not be offset. In subsequent periods, the micro-entity shall recognise any **income** on the transferred asset and any expense incurred on the financial liability.

**Example 1: Debt factoring arrangement that qualifies for derecognition**

A micro-entity sells a group of its accounts receivable to a bank at less than their carrying amount. The micro-entity is obliged to remit promptly to the bank all amounts collected, but it has no obligation to the bank for slow payment or non-payment by the debtors.

In this case, the micro-entity has transferred to the bank substantially all of the risks and rewards of ownership of the receivables. Accordingly, it removes the receivables from its statement of financial position (ie derecognises them), and it shows no liability in respect of the proceeds received from the bank. The micro-entity recognises a loss calculated as the difference between the carrying amount of the receivables at the time of sale and the proceeds received from the bank. The micro-entity recognises a liability to the extent that it has collected funds from the debtors but has not yet remitted them to the bank.
Example 2: Debt factoring arrangement that does not qualify for derecognition

The facts are the same as in the preceding example except that the micro-entity has agreed to buy back from the bank any receivables for which the debtor is in arrears as to principal or interest for more than 120 days.

In this case, the micro-entity has retained the risk of slow payment or non-payment by the debtors – a significant risk with respect to receivables. Accordingly, the micro-entity does not treat the receivables as having been sold to the bank, and it does not derecognise them. Instead, it treats the proceeds from the bank as a loan. The micro-entity continues to recognise the receivables as an asset until they are collected or written off as uncollectible.

Transfers of non-cash collateral

9.24 When a micro-entity participates in arrangements where it provides or receives financial assets other than cash as collateral (eg a micro-entity pledges commercial papers as security against a loan), the micro-entity shall apply the requirements of paragraphs 11.35(b) to 11.35(d) of FRS 102.

Derecognition of a financial liability

9.25 A micro-entity shall derecognise a financial liability (or a part of a financial liability) only when it is extinguished – ie when the obligation specified in the contract is discharged, is cancelled or expires.

9.26 A micro-entity shall recognise any gain or loss on the derecognition of a financial liability (or a part of a financial liability) in profit or loss when the item is derecognised.

Presentation

9.27 A financial asset and a financial liability shall be offset and the net amount presented in the statement of financial position when, and only when, a micro-entity:

(a) currently has a legally enforceable right to set off the recognised amounts; and

(b) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Disclosures in the notes

9.28 A micro-entity shall determine the amount of any financial commitments, guarantees and contingencies not recognised in the statement of financial position arising from its financial instruments and disclose that amount within the total amount of financial commitments, guarantees and contingencies (see paragraph 6A.2).

9.29 A micro-entity shall disclose an indication of the nature and form of any financial asset given as security in respect of its commitments, guarantees and contingencies (see paragraph 6A.3).
Section 10
Inventories

Scope of this section

10.1 This section sets out the principles for recognising and measuring inventories.

10.2 This section applies to all inventories, except:
   (a) work in progress arising under construction contracts, including directly related service contracts (see Section 18 Revenue); and
   (b) biological assets related to agricultural activity and agricultural produce at the point of harvest (see Section 27 Specialised Activities).

Measurement of inventories

10.3 A micro-entity shall measure inventories at the lower of cost and estimated selling price less costs to complete and sell.

Cost of inventories

10.4 A micro-entity shall include in the cost of inventories all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

10.5 Where inventories are acquired through a non-exchange transaction, their cost shall be measured at their fair value at the date of acquisition.

Costs of purchase

10.6 The costs of purchase of inventories comprise the purchase price, import duties and other taxes (other than those subsequently recoverable by the micro-entity from the taxing authorities), and transport, handling and other costs directly attributable to the acquisition of finished goods, materials and services. Trade discounts, rebates and other similar items are deducted in determining the costs of purchase.

10.7 If payment is deferred beyond normal credit terms, the purchase price is the cash price available at the date of purchase. Any excess of the deferred payment amount over the cash price available at the date of purchase is recognised as interest and accounted for in accordance with paragraph 9.14(a).

Costs of conversion

10.8 The costs of conversion of inventories include costs directly related to the units of production, such as direct labour. They also include a systematic allocation of fixed and variable production overheads that are incurred in converting materials into finished goods. Fixed production overheads are those indirect costs of production that remain relatively constant regardless of the volume of production, such as depreciation and maintenance of factory buildings and equipment, and the cost of factory management and administration. Variable production overheads are those indirect costs of production that vary directly, or nearly directly, with the volume of production, such as indirect materials and indirect labour.
10.9 Production overheads include the costs for obligations (recognised and measured in accordance with Section 16 Provisions and Contingencies) for dismantling, removing and restoring a site on which an item of property, plant and equipment is located that are incurred during the reporting period as a consequence of having used that item of property, plant and equipment to produce inventory during that period.

Allocation of production overheads

10.10 A micro-entity shall allocate fixed production overheads to the costs of conversion on the basis of the normal capacity of the production facilities. Normal capacity is the production expected to be achieved on average over a number of periods or seasons under normal circumstances, taking into account the loss of capacity resulting from planned maintenance. The actual level of production may be used if it approximates normal capacity. The amount of fixed overhead allocated to each unit of production is not increased as a consequence of low production or idle plant. Unallocated overheads are recognised as an expense in the period in which they are incurred. In periods of abnormally high production, the amount of fixed overhead allocated to each unit of production is decreased so that inventories are not measured above cost. Variable production overheads are allocated to each unit of production on the basis of the actual use of the production facilities.

Other costs included in inventories

10.11 A micro-entity shall include other costs in the cost of inventories only to the extent that they are incurred in bringing the inventories to their present location and condition.

Costs excluded from inventories

10.12 Examples of costs excluded from the cost of inventories and recognised as expenses in the period in which they are incurred are:
   (a) abnormal amounts of wasted materials, labour or other production costs;
   (b) storage costs, unless those costs are necessary during the production process before a further production stage;
   (c) administrative overheads that do not contribute to bringing inventories to their present location and condition; and
   (d) selling costs.

Cost of inventories of a service provider

10.13 To the extent that service providers have inventories, they measure them at the costs of their production. These costs consist primarily of the labour and other costs of personnel directly engaged in providing the service, including supervisory personnel, and attributable overheads. Labour and other costs relating to sales and general administrative personnel are not included but are recognised as expenses in the period in which they are incurred. The cost of inventories of a service provider does not include profit margins or non-attributable overheads that are often factored into prices charged by service providers.
Cost of agricultural produce harvested from biological assets

10.14 Section 27 requires that inventories comprising agricultural produce that a micro-entity has harvested from its biological assets should be measured on initial recognition, at the point of harvest, at the lower of cost and estimated selling price less costs to complete and sell. This becomes the cost of the inventories at that date for application of this section.

Techniques for measuring cost, such as standard costing, retail method and most recent purchase price

10.15 A micro-entity may use techniques such as the standard cost method, the retail method or most recent purchase price for measuring the cost of inventories if the result approximates cost. Standard costs take into account normal levels of materials and supplies, labour, efficiency and capacity utilisation. They are regularly reviewed and, if necessary, revised in the light of current conditions. The retail method measures cost by reducing the sales value of the inventory by the appropriate percentage gross margin.

Cost formulas

10.16 A micro-entity shall measure the cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects by using specific identification of their individual costs.

10.17 A micro-entity shall measure the cost of inventories, other than those dealt with in paragraph 10.16, by using the first-in, first-out (FIFO) or weighted average cost formula. A micro-entity shall use the same cost formula for all inventories having a similar nature and use to the micro-entity. For inventories with a different nature or use, different cost formulas may be justified. The last-in, first-out method (LIFO) is not permitted by this FRS.

Impairment of inventories

10.18 Implicit in the requirement for a micro-entity to measure inventories at the lower of cost and estimated selling price less costs to complete, is a requirement that a micro-entity shall assess at the end of each reporting period whether any inventories are impaired, ie the carrying amount is not fully recoverable (eg because of damage, obsolescence or declining selling prices). If an item (or group of items) of inventory is impaired, the micro-entity shall recognise an impairment loss.

10.19 When the circumstances that previously caused inventories to be impaired no longer exist or when there is clear evidence of an increase in selling price less costs to complete and sell because of changed economic circumstances, the micro-entity shall reverse the amount of the impairment (ie the reversal is limited to the amount of the original impairment loss).

Recognition as an expense

10.20 When inventories are sold, the micro-entity shall recognise the carrying amount of those inventories as an expense in the period in which the related revenue is recognised.
10.21 Some inventories may be allocated to other asset accounts, for example, inventory used as a component of self-constructed property, plant or equipment. Inventories allocated to another asset in this way are accounted for subsequently in accordance with the section of this FRS relevant to that type of asset.

Disclosure in the notes

10.22 A micro-entity shall disclose an indication of the nature and form of any items of inventory given as security in respect of its commitments, guarantees and contingencies (see paragraph 6A.3).
Section 11
Investments in Joint Ventures

Scope of this section

11.1 This section applies to the accounting for investments in joint ventures that are jointly controlled operations and jointly controlled assets.

11.2 A micro-entity shall refer to Section 7 Subsidiaries, Associates, Jointly Controlled Entities and Intermediate Payment Arrangements which sets out the requirements for investments in joint ventures that are jointly controlled entities.

Joint ventures defined

11.3 Joint control is the contractually agreed sharing of control over an economic activity, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

11.4 A joint venture is a contractual arrangement whereby two or more parties undertake an economic activity that is subject to joint control. Joint ventures can take the form of jointly controlled operations, jointly controlled assets, or jointly controlled entities.

Jointly controlled operations

11.5 The operation of some joint ventures involves the use of the assets and other resources of the venturers rather than the establishment of a corporation, partnership or other entity, or a financial structure that is separate from the venturers themselves. Each venturer uses its own property, plant and equipment and carries its own inventories. It also incurs its own expenses and liabilities and raises its own finance, which represent its own obligations. The joint venture activities may be carried out by the venturer’s employees alongside the venturer’s similar activities. The joint venture agreement usually provides a means by which the revenue from the sale of the joint product and any expenses incurred in common are shared among the venturers.

11.6 In respect of its interests in jointly controlled operations, a venturer shall recognise in its financial statements:

(a) the assets that it controls and the liabilities that it incurs; and
(b) the expenses that it incurs and its share of the income that it earns from the sale of goods or services by the joint venture.

Jointly controlled assets

11.7 Some joint ventures involve the joint control, and often the joint ownership, by the venturers of one or more assets contributed to, or acquired for the purpose of, the joint venture and dedicated to the purposes of the joint venture.

11.8 In respect of its interest in a jointly controlled asset, a venturer shall recognise in its financial statements:

(a) its share of the jointly controlled assets, classified in accordance with the format adopted set out in Section 4 Statement of Financial Position;
(b) any liabilities that it has incurred;
(c) its share of any liabilities incurred jointly with the other venturers in relation to the joint venture;

(d) any income from the sale or use of its share of the output of the joint venture, together with its share of any expenses incurred by the joint venture; and

(e) any expenses that it has incurred in respect of its interest in the joint venture.

Disclosure in the notes

11.9 A micro-entity shall determine the amount of any financial commitments, guarantees and contingencies not recognised in the statement of financial position arising from its jointly controlled operations and jointly controlled assets and disclose that amount within the total amount of financial commitments, guarantees and contingencies (see paragraph 6A.2).
Section 12
Property, Plant and Equipment and Investment Property

Scope of this section

12.1 This section applies to the accounting for property, plant and equipment and investment property.

12.2 Property, plant and equipment does not include biological assets related to agricultural activity (see Section 27 Specialised Activities).

Recognition

12.3 A micro-entity shall recognise the cost of an item of property, plant and equipment or investment property as an asset if, and only if:
   
   (a) it is probable that future economic benefits associated with the item will flow to the micro-entity; and

   (b) the cost of the item can be measured reliably.

12.4 Spare parts and servicing equipment are usually carried as inventory and recognised in profit or loss as consumed. However, major spare parts and stand-by equipment are property, plant and equipment when a micro-entity expects to use them during more than one period. Similarly, if the spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are considered property, plant and equipment.

12.5 Parts of some items of property, plant and equipment or investment property may require replacement at regular intervals (eg the roof of a building). A micro-entity shall add to the carrying amount of an item of property, plant and equipment or investment property the cost of replacing part of such an item when that cost is incurred if the replacement part is expected to provide incremental future benefits to the micro-entity. The carrying amount of those parts that are replaced is derecognised in accordance with paragraphs 12.26 and 12.27.

12.6 A condition of continuing to operate an item of property, plant and equipment (eg a bus) or investment property may be performing regular major inspections for faults regardless of whether parts of the item are replaced. When each major inspection is performed, its cost is recognised in the carrying amount of the item of property, plant and equipment or investment property as a replacement if the recognition criteria are satisfied. Any remaining carrying amount of the cost of the previous major inspection (as distinct from physical parts) is derecognised. This is done regardless of whether the cost of the previous major inspection was identified in the transaction in which the item was acquired or constructed. If necessary, the estimated cost of a future similar inspection may be used as an indication of what the cost of the existing inspection component was when the item was acquired or constructed.

12.7 Land and buildings are separable assets, and a micro-entity shall account for them separately, even when they are acquired together.

Measurement at initial recognition

12.8 A micro-entity shall measure an item of property, plant and equipment or investment property at initial recognition at its cost.
Elements of cost

12.9 The cost of an item of property, plant and equipment or investment property comprises all of the following:

(a) Its purchase price, including legal and brokerage fees, import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.

(b) Any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. These can include the costs of site preparation, initial delivery and handling, installation and assembly, and testing of functionality.

(c) The initial estimate of the costs, recognised and measured in accordance with Section 16 Provisions and Contingencies, of dismantling and removing the item and restoring the site on which it is located, the obligation for which a micro-entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

12.10 The following costs are not costs of an item of property, plant and equipment or investment property, and a micro-entity shall recognise them as an expense when they are incurred:

(a) costs of opening a new facility;

(b) costs of introducing a new product or service (including costs of advertising and promotional activities);

(c) costs of conducting business in a new location or with a new class of customer (including costs of staff training); and

(d) administration and other general overhead costs.

12.11 The income and related expenses of incidental operations during construction or development of an item of property, plant and equipment or investment property are recognised in profit or loss if those operations are not necessary to bring the item to its intended location and operating condition.

Measurement of cost

12.12 The cost of an item of property, plant and equipment or investment property is the cash price equivalent at the recognition date. If payment is deferred beyond normal credit terms, the cost is the cash price available at the recognition date. Any excess of the deferred payment amount over the cash price available at the recognition date is recognised as interest and accounted for in accordance with paragraph 9.14(a).

Exchanges of assets

12.13 An item of property, plant or equipment or investment property may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets. A micro-entity shall measure the cost of the acquired asset at fair value unless:

(a) the exchange transaction lacks commercial substance; or

(b) the fair value of neither the asset received nor the asset given up is reliably measurable. In that case, the asset's cost is measured at the carrying amount of the asset given up.
Measurement after initial recognition

12.14 A micro-entity shall measure all items of property, plant and equipment and investment property after initial recognition at cost less any accumulated depreciation and any accumulated impairment losses. A micro-entity shall recognise the costs of day-to-day servicing of an item of property, plant and equipment or investment property in profit or loss in the period in which the costs are incurred.

Depreciation

12.15 If the major components of an item of property, plant and equipment or investment property have significantly different patterns of consumption of economic benefits, a micro-entity shall allocate the initial cost of the asset to its major components and depreciate each such component separately over its useful life. Other assets shall be depreciated over their useful lives as a single asset. There are some exceptions, such as land which generally has an unlimited useful life and therefore is not usually depreciated.

12.16 The depreciation charge for each period shall be recognised in profit or loss unless another section of this FRS requires the cost to be recognised as part of the cost of an asset. For example, the depreciation of manufacturing property, plant and equipment is included in the costs of inventories (see Section 10 Inventories).

Depreciable amount and depreciation period

12.17 A micro-entity shall allocate the depreciable amount of an asset on a systematic basis over its useful life.

12.18 Factors may indicate that the residual value or useful life of an asset has changed since the most recent annual reporting date. If such indicators are present, a micro-entity shall review its previous estimates and, if current expectations differ, amend the residual value, depreciation method or useful life. The micro-entity shall account for the change in residual value, depreciation method or useful life as a change in an accounting estimate in accordance with paragraphs 8.11 to 8.13.

12.19 Depreciation of an asset begins when it is available for use, ie when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation of an asset ceases when the asset is derecognised. Depreciation does not cease when the asset becomes idle or is retired from active use unless the asset is fully depreciated. However, under usage methods of depreciation the depreciation charge can be zero while there is no production.

12.20 A micro-entity shall consider all the following factors in determining the useful life of an asset:

(a) The expected usage of the asset. Usage is assessed by reference to the asset's expected capacity or physical output.

(b) Expected physical wear and tear, which depends on operational factors such as the number of shifts for which the asset is to be used and the repair and maintenance programme, and the care and maintenance of the asset while idle.

(c) Technical or commercial obsolescence arising from changes or improvements in production, or from a change in the market demand for the product or service output of the asset.

(d) Legal or similar limits on the use of the asset, such as the expiry dates of related leases.
Depreciation method

12.21 A micro-entity shall select a depreciation method that reflects the pattern in which it expects to consume the asset's future economic benefits. The possible depreciation methods include the straight-line method, the diminishing balance method and a method based on usage such as the units of production method.

12.22 If there is an indication that there has been a significant change since the last annual reporting date in the pattern by which a micro-entity expects to consume an asset's future economic benefits, the micro-entity shall review its present depreciation method and, if current expectations differ, change the depreciation method to reflect the new pattern. The micro-entity shall account for the change as a change in an accounting estimate in accordance with paragraphs 8.11 to 8.13.

Impairment

Recognition and measurement of impairment

12.23 At each reporting date, a micro-entity shall apply Section 22 Impairment of Assets to determine whether an item or group of items of property, plant and equipment or investment property is impaired and, if so, how to recognise and measure the impairment loss. That section explains when and how a micro-entity reviews the carrying amount of its assets, how it determines the recoverable amount of an asset, and when it recognises or reverses an impairment loss.

Compensation for impairment

12.24 An entity shall include in profit or loss, compensation from third parties for items of property, plant and equipment or investment property that were impaired, lost or given up only when the compensation is virtually certain.

Property, plant and equipment or investment property held for sale

12.25 Paragraph 22.7(f) states that a plan to dispose of an asset before the previously expected date is an indicator of impairment that triggers the calculation of the asset's recoverable amount for the purpose of determining whether the asset is impaired.

Derecognition

12.26 A micro-entity shall derecognise an item of property, plant and equipment or investment property:
   (a) on disposal; or
   (b) when no future economic benefits are expected from its use or disposal.

12.27 A micro-entity shall recognise the gain or loss on the derecognition of an item of property, plant and equipment or investment property in profit or loss when the item is derecognised (unless Section 15 Leases requires otherwise on a sale and leaseback). The micro-entity shall not classify such gains as turnover in the income statement.
Disclosure in the notes

12.28 A micro-entity shall determine the amount of any financial commitments not recognised in the **statement of financial position** for the acquisition of property, plant and equipment or investment property and disclose that amount within the total amount of financial commitments, guarantees and contingencies (see paragraph 6A.2).

12.29 A micro-entity shall disclose an indication of the nature and form of any items of property, plant and equipment or investment property given as security in respect of its commitments, guarantees and contingencies (see paragraph 6A.3).
Section 13
Intangible Assets other than Goodwill

Scope of this section

13.1 This section applies to the accounting for all separately acquired intangible assets and internally generated intangible assets, other than intangible assets held by a micro-entity for sale in the ordinary course of business (see Section 10 Inventories and Section 18 Revenue).

13.2 For the accounting of intangible assets acquired as part of a business combination including goodwill see Section 14 Business Combinations and Goodwill.

Recognition

13.3 A micro-entity shall recognise all separately acquired intangible assets.

13.4 An internally generated intangible shall not be recognised as an asset. All expenditure incurred shall be recognised as an expense immediately in profit or loss.

13.5 A micro-entity shall recognise the expenditure on the following items as an expense and shall not recognise such expenditure as intangible assets (the list is not exhaustive):

(a) Expenditure on research and development activities.

(b) Internally generated brands, logos, publishing titles, customer lists and items similar in substance.

(c) Start-up activities (ie start-up costs), which include establishment costs such as legal and secretarial costs incurred in establishing a legal entity, expenditure to open a new facility or business (ie pre-opening costs) and expenditure for starting new operations or launching new products or processes (ie pre-operating costs).

(d) Training activities.

(e) Advertising and promotional activities.

(f) Relocating or reorganising part or all of a micro-entity.

(g) Internally generated goodwill.

Initial measurement

13.6 A micro-entity shall measure a separately acquired intangible asset initially at cost which comprises:

(a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; and

(b) any directly attributable cost of preparing the asset for its intended use.

Exchanges of assets

13.7 An intangible asset may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets. A micro-entity shall measure the cost of such an intangible asset at fair value unless:

(a) the exchange transaction lacks commercial substance; or
(b) the fair value of neither the asset received nor the asset given up is reliably measurable. In that case, the asset’s cost is measured at the carrying amount of the asset given up.

Measurement after initial recognition

13.8 A micro-entity shall measure a separately acquired intangible asset after initial recognition at cost less any accumulated amortisation and any accumulated impairment losses. The requirements for amortisation are set out in paragraphs 13.9 to 13.14.

Amortisation over useful life

13.9 Intangible assets shall be considered to have a finite useful life. The useful life of an intangible asset that arises from contractual or other legal rights shall not exceed the period of the contractual or other legal rights, but may be shorter depending on the period over which the micro-entity expects to use the asset. If the contractual or other legal rights are conveyed for a limited term that can be renewed, the useful life of the intangible asset shall include the renewal period(s) only if there is evidence to support renewal by the micro-entity without significant cost.

13.10 If, in exceptional cases, a micro-entity is unable to make a reliable estimate of the useful life of an intangible asset, the life shall not exceed ten years.

Amortisation period and amortisation method

13.11 A micro-entity shall allocate the depreciable amount of an intangible asset on a systematic basis over its useful life. The amortisation charge for each period shall be recognised in profit or loss, unless another section of this FRS requires the cost to be recognised as part of the cost of an asset. For example, the amortisation of an intangible asset may be included in the costs of inventories or property, plant and equipment.

13.12 Amortisation begins when the intangible asset is available for use, ie when it is in the location and condition necessary for it to be usable in the manner intended by management. Amortisation ceases when the asset is derecognised. The micro-entity shall choose an amortisation method that reflects the pattern in which it expects to consume the asset’s future economic benefits. If the micro-entity cannot determine that pattern reliably, it shall use the straight-line method.

Residual value

13.13 A micro-entity shall assume that the residual value of an intangible asset is zero unless:

(a) there is a commitment by a third party to purchase the asset at the end of its useful life; or

(b) there is an active market for the asset and:

(i) residual value can be determined by reference to that market; and

(ii) it is probable that such a market will exist at the end of the asset’s useful life.
Review of amortisation period and amortisation method

13.14 Factors may indicate that the residual value or useful life of an intangible asset has changed since the most recent annual reporting date. If such indicators are present, a micro-entity shall review its previous estimates and, if current expectations differ, amend the residual value, amortisation method or useful life. The micro-entity shall account for the change in residual value, amortisation method or useful life as a change in an accounting estimate in accordance with paragraphs 8.11 to 8.13.

Recoverability of the carrying amount—impairment losses

13.15 To determine whether a separately acquired intangible asset is impaired, a micro-entity shall apply Section 22 Impairment of Assets. That section explains when and how a micro-entity reviews the carrying amount of its assets, how it determines the recoverable amount of an asset, and when it recognises or reverses an impairment loss.

Retirements and disposals

13.16 A micro-entity shall derecognise a separately acquired intangible asset, and shall recognise a gain or loss in profit or loss:
(a) on disposal; or
(b) when no future economic benefits are expected from its use or disposal.

Disclosure in the notes

13.17 A micro-entity shall determine the amount of any financial commitments, guarantees and contingencies not recognised in the statement of financial position for the acquisition of separately acquired intangible assets and disclose that amount within the total amount of financial commitments, guarantees and contingencies (see paragraph 6A.2).

13.18 A micro-entity shall disclose an indication of the nature and form of any intangible assets given as security in respect of its commitments, guarantees and contingencies (see paragraph 6A.3).
Section 14
Business Combinations and Goodwill

Accounting for a trade and asset acquisition

14.1 Where a micro-entity effects a business combination by acquiring the trade and assets of another business, it shall apply Section 19 Business Combinations and Goodwill of FRS 102, except for the following:

(a) a micro-entity shall not separately identify and recognise intangible assets;
(b) a micro-entity shall not recognise a deferred tax asset or liability;
(c) a micro-entity shall not apply paragraph 19.23 of FRS 102, but instead apply paragraph 14.2 of this FRS;
(d) a micro-entity shall not recognise and measure a share-based payment transaction in accordance with Section 28 Employee Benefit of FRS 102, but instead apply Section 23 Employee Benefits of this FRS; and
(e) a micro-entity is not required to provide any of the disclosures.

Goodwill arising on a trade and asset acquisition

14.2 Where a micro-entity has recognised goodwill acquired in a trade and asset acquisition (in accordance with paragraph 19.22 of FRS 102), the micro-entity shall measure that goodwill at cost less accumulated amortisation and accumulated impairment losses:

(a) A micro-entity shall follow the principles in paragraphs 13.9 to 13.14 of this FRS for amortisation of goodwill. Goodwill shall be considered to have a finite useful life, and shall be amortised on a systematic basis over its life. If, in exceptional cases, a micro-entity is unable to make a reliable estimate of the useful life of goodwill, the life shall not exceed ten years.
(b) A micro-entity shall follow Section 22 Impairment of Assets of this FRS for recognising and measuring the impairment of goodwill.

Disclosure in the notes

14.3 A micro-entity shall determine the amount of any financial commitments, guarantees and contingencies not recognised in the statement of financial position for trade and asset acquisitions and disclose that amount within the total amount of financial commitments, guarantees and contingencies (see paragraph 6A.2).
Section 15
Leases

Scope of this section

15.1 This section covers accounting for all leases other than licensing agreements for such items as motion picture films, video recordings, plays, manuscripts, patents and copyrights (see Section 13 Intangible Assets other than Goodwill).

15.2 This section applies to agreements that transfer the right to use assets even though substantial services by the lessor may be called for in connection with the operation or maintenance of such assets. This section does not apply to agreements that are contracts for services that do not transfer the right to use assets from one contracting party to the other.

15.3 Some arrangements do not take the legal form of a lease but convey rights to use assets in return for payments. Examples of such arrangements may include outsourcing arrangements, telecommunication contracts that provide rights to capacity and take-or-pay contracts.

15.4 Determining whether an arrangement is, or contains, a lease shall be based on the substance of the arrangement.

Classification of leases

15.5 A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

15.6 Whether a lease is a finance lease or an operating lease depends on the substance of the transaction rather than the form of the contract. Examples of situations that individually or in combination would normally lead to a lease being classified as a finance lease are:

(a) the lease transfers ownership of the asset to the lessee by the end of the lease term;

(b) the lessee has the option to purchase the asset at a price that is expected to be sufficiently lower than the fair value at the date the option becomes exercisable for it to be reasonably certain, at the inception of the lease, that the option will be exercised;

(c) the lease term is for the major part of the economic life of the asset even if title is not transferred;

(d) at the inception of the lease the present value of the minimum lease payments amounts to at least substantially all of the fair value of the leased asset; and

(e) the leased assets are of such a specialised nature that only the lessee can use them without major modifications.

15.7 Indicators of situations that individually or in combination could also lead to a lease being classified as a finance lease are:

(a) if the lessee can cancel the lease, the lessor’s losses associated with the cancellation are borne by the lessee;
(b) gains or losses from the fluctuation in the residual value of the leased asset accrue to the lessee (eg in the form of a rent rebate equalling most of the sales proceeds at the end of the lease); and

c) the lessee has the ability to continue the lease for a secondary period at a rent that is substantially lower than market rent.

15.8 The examples and indicators in paragraphs 15.6 and 15.7 are not always conclusive. If it is clear from other features that the lease does not transfer substantially all risks and rewards incidental to ownership, the lease is classified as an operating lease. For example, this may be the case if ownership of the asset is transferred to the lessee at the end of the lease for a variable payment equal to the asset's then fair value, or if there are contingent rents, as a result of which the lessee does not have substantially all risks and rewards incidental to ownership.

15.9 Lease classification is made at the inception of the lease and is not changed during the term of the lease unless the lessee and the lessor agree to change the provisions of the lease (other than simply by renewing the lease), in which case the lease classification shall be re-evaluated.

Financial statements of lessees: finance leases

Initial recognition

15.10 At the commencement of the lease term, a lessee shall recognise its rights of use and obligations under finance leases as assets and liabilities in its statement of financial position at amounts equal to the fair value of the leased asset or, if lower, the present value of the minimum lease payments, determined at the inception of the lease. Any initial direct costs of the lessee (incremental costs that are directly attributable to negotiating and arranging a lease) are added to the amount recognised as an asset.

15.11 The present value of the minimum lease payments shall be calculated using the interest rate implicit in the lease. If this cannot be determined, the lessee's incremental borrowing rate shall be used.

Subsequent measurement

15.12 A lessee shall apportion minimum lease payments between the finance charge and the reduction of the outstanding liability. The lessee shall allocate the finance charge to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. A lessee shall charge contingent rents as expenses in the periods in which they are incurred.

15.13 A lessee shall depreciate an asset leased under a finance lease in accordance with Section 12 Property, Plant and Equipment and Investment Property. If there is no reasonable certainty that the lessee will obtain ownership by the end of the lease term, the asset shall be fully depreciated over the shorter of the lease term and its useful life. A lessee shall also assess at each reporting date whether an asset leased under a finance lease is impaired (see Section 22 Impairment of Assets).

Financial statements of lessees: operating leases

Recognition and measurement

15.14 A lessee shall recognise lease payments under operating leases (excluding costs for services such as insurance and maintenance) as an expense over the lease term on a
straight-line basis unless another systematic basis is representative of the time pattern of the user’s benefit, even if the payments are not on that basis.

15.15 A lessee shall recognise the aggregate benefit of lease incentives as a reduction to the expense recognised in accordance with paragraph 15.14 over the lease term, on a straight-line basis unless another systematic basis is representative of the time pattern of the lessee's benefit from the use of the leased asset. Any costs incurred by the lessee (for example costs for termination of a pre-existing lease, relocation or leasehold improvements) shall be accounted for in accordance with the applicable section.

15.16 Where an operating lease becomes an onerous contract a micro-entity shall also apply Section 16 Provisions and Contingencies.

Disclosure in the notes

15.17 A micro-entity shall determine the amount of any financial commitments, guarantees and contingencies not recognised in the statement of financial position arising from operating leases and disclose that amount within the total amount of financial commitments, guarantees and contingencies (see paragraph 6A.2).

Financial statements of lessors: finance leases

Initial recognition and measurement

15.18 A lessor shall recognise assets held under a finance lease in its statement of financial position and present them as a receivable at an amount equal to the net investment in the lease. The net investment in a lease is the lessor’s gross investment in the lease discounted at the interest rate implicit in the lease. The gross investment in the lease is the aggregate of:
(a) the minimum lease payments receivable by the lessor under a finance lease; and
(b) any unguaranteed residual value accruing to the lessor.

15.19 For finance leases other than those involving manufacturer or dealer lessors, initial direct costs (costs that are incremental and directly attributable to negotiating and arranging a lease) are included in the initial measurement of the finance lease receivable and reduce the amount of income recognised over the lease term.

Subsequent measurement

15.20 The recognition of finance income shall be based on a pattern reflecting a constant periodic rate of return on the lessor’s net investment in the finance lease. Lease payments relating to the period, excluding costs for services, are applied against the gross investment in the lease to reduce both the principal and the unearned finance income. If there is an indication that the estimated unguaranteed residual value used in computing the lessor’s gross investment in the lease has changed significantly, the income allocation over the lease term is revised, and any reduction in respect of amounts accrued is recognised immediately in profit or loss.
Manufacturer or dealer lessors

15.21 Manufacturers or dealers often offer to customers the choice of either buying or leasing an asset. A finance lease of an asset by a manufacturer or dealer lessor gives rise to two types of income:

(a) profit or loss equivalent to the profit or loss resulting from an outright sale of the asset being leased, at normal selling prices, reflecting any applicable volume or trade discounts; and

(b) finance income over the lease term.

15.22 The sales revenue recognised at the commencement of the lease term by a manufacturer or dealer lessor is the fair value of the asset or, if lower, the present value of the minimum lease payments accruing to the lessor, computed at a market rate of interest. The cost of sale recognised at the commencement of the lease term is the cost, or carrying amount if different, of the leased asset less the present value of the unguaranteed residual value. The difference between the sales revenue and the cost of sale is the selling profit, which is recognised in accordance with the micro-entity's policy for outright sales.

15.23 If artificially low rates of interest are quoted, selling profit shall be restricted to that which would apply if a market rate of interest were charged. Costs incurred by manufacturer or dealer lessors in connection with negotiating and arranging a lease shall be recognised as an expense when the selling profit is recognised.

Financial statements of lessors: operating leases

Recognition and measurement

15.24 A lessor shall recognise lease income from operating leases (excluding amounts for services such as insurance and maintenance) in profit or loss on a straight-line basis over the lease term unless another systematic basis is representative of the time pattern of the lessee’s benefit from the leased asset, even if the receipt of payments is not on that basis.

15.25 A lessor shall recognise the aggregate cost of lease incentives as a reduction to the income recognised in accordance with paragraph 15.24 over the lease term on a straight-line basis, unless another systematic basis is representative of the time pattern over which the lessor’s benefit from the leased asset is diminished.

15.26 A lessor shall recognise as an expense, costs, including depreciation, incurred in earning the lease income. The depreciation policy for depreciable leased assets shall be consistent with the lessor’s normal depreciation policy for similar assets.

15.27 A lessor shall add to the carrying amount of the leased asset any initial direct costs it incurs in negotiating and arranging an operating lease and shall recognise such costs as an expense over the lease term on the same basis as the lease income.

15.28 To determine whether a leased asset has become impaired, a lessor shall apply Section 22.

15.29 A manufacturer or dealer lessor does not recognise any selling profit on entering into an operating lease because it is not the equivalent of a sale.
Sale and leaseback transactions

15.30 A sale and leaseback transaction involves the sale of an asset and the leasing back of the same asset. The lease payment and the sale price are usually interdependent because they are negotiated as a package. The accounting treatment of a sale and leaseback transaction depends on the type of lease.

Sale and leaseback transaction results in a finance lease

15.31 If a sale and leaseback transaction results in a finance lease, the seller-lessee shall not recognise immediately, as income, any excess of sales proceeds over the carrying amount. Instead, the seller-lessee shall defer such excess and amortise it over the lease term.

Sale and leaseback transaction results in an operating lease

15.32 If a sale and leaseback transaction results in an operating lease, and it is clear that the transaction is established at fair value, the seller-lessee shall recognise any profit or loss immediately. If the sale price is below fair value, the seller-lessee shall recognise any profit or loss immediately unless the loss is compensated for by future lease payments at below market price. In that case the seller-lessee shall defer and amortise such loss in proportion to the lease payments over the period for which the asset is expected to be used. If the sale price is above fair value, the seller-lessee shall defer the excess over fair value and amortise it over the period for which the asset is expected to be used.

Disclosure in the notes

15.33 A micro-entity shall determine the amount of any financial commitments, guarantees and contingencies not recognised in the statement of financial position arising from a sale and lease back transaction and disclose that amount within the total amount of financial commitments, guarantees and contingencies (see paragraph 6A.2).
Section 16
Provisions and Contingencies

Scope of this section

16.1 This section applies to all provisions, contingent liabilities and contingent assets except those provisions covered by other sections of this FRS. Where those other sections contain no specific requirements to deal with contracts that have become onerous, this section applies to those contracts.

16.2 This section does not apply to financial instruments that are within the scope of Section 9 Financial Instruments unless the contracts are onerous contracts or financial guarantee contracts.

16.3 The requirements in this section do not apply to executory contracts unless they are onerous contracts. Executory contracts are contracts under which neither party has performed any of its obligations or both parties have partially performed their obligations to an equal extent.

16.4 The word ‘provision’ is sometimes used in the context of such items as depreciation, impairment of assets, and uncollectible receivables. Those are adjustments of the carrying amounts of assets, rather than recognition of liabilities, and therefore are not covered by this section.

Initial recognition

16.5 A micro-entity shall recognise a provision only when:
(a) the micro-entity has an obligation at the reporting date as a result of a past event;
(b) it is probable (ie more likely than not) that the micro-entity will be required to transfer economic benefits in settlement; and
(c) the amount of the obligation can be estimated reliably.

16.6 The micro-entity shall recognise the provision as a liability in the statement of financial position and shall recognise the amount of the provision as an expense, unless another section of this FRS requires the cost to be recognised as part of the cost of an asset such as inventories or property, plant and equipment.

16.7 The condition in paragraph 16.5(a) means that the micro-entity has no realistic alternative to settling the obligation. This can happen when the micro-entity has a legal obligation that can be enforced by law or when the micro-entity has a constructive obligation because the past event (which may be an action of the micro-entity) has created valid expectations in other parties that the micro-entity will discharge the obligation. Obligations that will arise from the micro-entity’s future actions (ie the future conduct of its business) do not satisfy the condition in paragraph 16.5(a), no matter how likely they are to occur and even if they are contractual. To illustrate, because of commercial pressures or legal requirements, a micro-entity may intend or need to carry out expenditure to operate in a particular way in the future (for example, by fitting smoke filters in a particular type of factory). Because the micro-entity can avoid the future expenditure by its future actions, for example by changing its method of operation or selling the factory, it has no present obligation for that future expenditure and no provision is recognised.
Initial measurement

16.8 A micro-entity shall measure a provision at the best estimate of the amount required to settle the obligation at the reporting date. The best estimate is the amount a micro-entity would rationally pay to settle the obligation at the end of the reporting period or to transfer it to a third party at that time.

(a) When the provision involves a large population of items, the estimate of the amount reflects the weighting of all possible outcomes by their associated probabilities. The provision will therefore be different depending on whether the probability of a loss of a given amount is, for example, 60 per cent or 90 per cent. Where there is a continuous range of possible outcomes, and each point in that range is as likely as any other, the mid-point of the range is used.

(b) When the provision arises from a single obligation, the individual most likely outcome may be the best estimate of the amount required to settle the obligation. However, even in such a case, the micro-entity considers other possible outcomes. When other possible outcomes are either mostly higher or mostly lower than the most likely outcome, the best estimate will be a higher or lower amount.

When the effect of the time value of money is material, the amount of a provision shall be the present value of the amount expected to be required to settle the obligation. The discount rate (or rates) shall be a pre-tax rate (or rates) that reflect(s) current market assessments of the time value of money and risks specific to the liability. The risks specific to the liability shall be reflected either in the discount rate or in the estimation of the amounts required to settle the obligation, but not both.

16.9 A micro-entity shall exclude gains from the expected disposal of assets from the measurement of a provision.

16.10 When some or all of the amount required to settle a provision may be reimbursed by another party (eg through an insurance claim), the micro-entity shall recognise the reimbursement as a separate asset only when it is virtually certain that the micro-entity will receive the reimbursement on settlement of the obligation. The amount recognised for the reimbursement shall not exceed the amount of the provision. The reimbursement receivable shall be presented in the statement of financial position as an asset and shall not be offset against the provision. In the income statement the expense relating to a provision may be presented net of the amount recognised for a reimbursement.

Subsequent measurement

16.11 A micro-entity shall charge against a provision only those expenditures for which the provision was originally recognised.

16.12 A micro-entity shall review provisions at each reporting date and adjust them to reflect the current best estimate of the amount that would be required to settle the obligation at that reporting date. Any adjustments to the amounts previously recognised shall be recognised in profit or loss unless the provision was originally recognised as part of the cost of an asset (see paragraph 16.6). When a provision is measured at the present value of the amount expected to be required to settle the obligation, the unwinding of the discount shall be recognised as interest expense in profit or loss in the period it arises.
Onerous contracts

16.13 If a micro-entity has an onerous contract, the present obligation under the contract shall be recognised and measured as a provision (see Example 2 of the Appendix to this section).

Future operating losses

16.14 Provisions shall not be recognised for future operating losses (see Example 1 of the Appendix to this section).

Restructuring

16.15 A restructuring gives rise to a constructive obligation only when a micro-entity:
   (a) has a detailed formal plan for the restructuring identifying at least:
       (i) the business or part of a business concerned;
       (ii) the principal locations affected;
       (iii) the location, function, and approximate number of employees who will be compensated for terminating their services;
       (iv) the expenditures that will be undertaken; and
       (v) when the plan will be implemented; and
   (b) has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

16.16 A micro-entity recognises a provision for restructuring costs only when it has a legal or constructive obligation at the reporting date to carry out the restructuring.

Contingent liabilities

16.17 A contingent liability is either a possible but uncertain obligation or a present obligation that is not recognised because it fails to meet one or both of the conditions (b) and (c) in paragraph 16.5. A micro-entity shall not recognise a contingent liability as a liability, except for provisions for contingent liabilities of an acquiree in a trade and asset acquisition (see Section 14 Business Combinations and Goodwill). Paragraph 16.19 sets out the disclosure requirements for a contingent liability. When a micro-entity is jointly and severally liable for an obligation, the part of the obligation that is expected to be met by other parties is treated as a contingent liability.

Contingent assets

16.18 A micro-entity shall not recognise a contingent asset as an asset. However, when the flow of future economic benefits to the micro-entity is virtually certain, then the related asset is not a contingent asset, and its recognition is appropriate.
Disclosures in the notes

16.19 A micro-entity shall determine the amount of any financial commitments, guarantees and contingencies not recognised in the statement of financial position and disclose that amount within the total amount of financial commitments, guarantees and contingencies (see paragraph 6A.2). A micro-entity is not required to disclose the amount of a contingent liability where the possibility of an outflow of resources is remote.
Appendix to Section 16

Examples of recognising and measuring provisions

This appendix accompanies, but is not part of, Section 16. It provides guidance for applying the requirements of Section 16 in recognising and measuring provisions.

All of the micro-entities in the examples in this appendix have 31 December as their reporting date. In all cases, it is assumed that a reliable estimate can be made of any outflows expected. In some examples the circumstances described may have resulted in impairment of the assets; this aspect is not dealt with in the examples. References to ‘best estimate’ are to the present value amount, when the effect of the time value of money is material.

Example 1 Future operating losses

16A.1 A micro-entity determines that it is probable that it will incur future operating losses for several years.

Present obligation as a result of a past obligating event: There is no past event that obliges the micro-entity to pay out resources.

Conclusion: The micro-entity does not recognise a provision for future operating losses. Expected future losses do not meet the definition of a liability. The expectation of future operating losses may be an indicator that one or more assets are impaired (see Section 22 Impairment of Assets of this FRS).

Example 2 Onerous contracts

16A.2 An onerous contract is one in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfill it. For example, a micro-entity may be contractually required under an operating lease to make payments to lease an asset for which it no longer has any use.

Present obligation as a result of a past obligating event: The micro-entity is contractually required to pay out resources for which it will not receive commensurate benefits.

Conclusion: If a micro-entity has a contract that is onerous, the micro-entity recognises and measures the present obligation under the contract as a provision.

Example 3 Warranties

16A.3 A manufacturer gives warranties at the time of sale to purchasers of its product. Under the terms of the contract for sale, the manufacturer undertakes to make good, by repair or replacement, manufacturing defects that become apparent within three years from the date of sale. On the basis of experience, it is probable (ie more likely than not) that there will be some claims under the warranties.

Present obligation as a result of a past obligating event: The obligating event is the sale of the product with a warranty, which gives rise to a legal obligation.

An outflow of resources embodying economic benefits in settlement: Probable for the warranties as a whole.
Conclusion: The micro-entity recognises a provision for the best estimate of the costs of making good under the warranty products sold before the reporting date.

Illustration of calculations:

In 20X0, goods are sold for CU100,000. Experience indicates that 90 per cent of products sold require no warranty repairs; six per cent of products sold require minor repairs costing 30 per cent of the sale price; and four per cent of products sold require major repairs or replacement costing 70 per cent of sale price. Therefore estimated warranty costs are:

\[
\begin{align*}
CU100,000 \times 90\% \times 0 &= CU0 \\
CU100,000 \times 6\% \times 30\% &= CU1,800 \\
CU100,000 \times 4\% \times 70\% &= CU2,800 \\
Total &= CU4,600
\end{align*}
\]

The expenditures for warranty repairs and replacements for products sold in 20X0 are expected to be made 60 per cent in 20X1, 30 per cent in 20X2, and ten per cent in 20X3, in each case at the end of the period. Because the estimated cash flows already reflect the probabilities of the cash outflows, and assuming there are no other risks or uncertainties that must be reflected, to determine the present value of those cash flows the micro-entity uses a 'risk-free' discount rate based on government bonds with the same term as the expected cash outflows (six per cent for one-year bonds and seven per cent for two-year and three-year bonds). Calculation of the present value, at the end of 20X0, of the estimated cash flows related to the warranties for products sold in 20X0 is as follows:

\[
\begin{array}{|c|c|c|c|c|}
\hline
\text{Year} & \text{Expected cash payments (CU)} & \text{Discount rate} & \text{Discount factor} & \text{Present value (CU)} \\
\hline
1 & 60\% \times CU4,600 & 2,760 & 6\% & 0.9434 \\
& & & (at 6\% for 1 year) & 2,604 \\
2 & 30\% \times CU4,600 & 1,380 & 7\% & 0.8734 \\
& & & (at 7\% for 2 years) & 1,205 \\
3 & 10\% \times CU4,600 & 460 & 7\% & 0.8163 \\
& & & (at 7\% for 3 years) & 375 \\
\hline
\text{Total} & & 460 & 7\% & 4,184 \\
\hline
\end{array}
\]

The micro-entity will recognise a warranty obligation of CU4,184 at the end of 20X0 for products sold in 20X0.

Example 4 Refunds policy

16A.4 A retail store has a policy of refunding purchases by dissatisfied customers, even though it is under no legal obligation to do so. Its policy of making refunds is generally known.

Present obligation as a result of a past obligating event: The obligating event is the sale of the product, which gives rise to a constructive obligation because the conduct of the store has created a valid expectation on the part of its customers that the store will refund purchases.
An outflow of resources embodying economic benefits in settlement: Probable that a proportion of goods will be returned for refund.

Conclusion: The micro-entity recognises a provision for the best estimate of the amount required to settle the refunds.

Example 5 Closure of a division: no implementation before end of reporting period

16A.5 On 12 December 20X0 the board of a micro-entity decided to close down a division. Before the end of the reporting period (31 December 20X0) the decision was not communicated to any of those affected and no other steps were taken to implement the decision.

Present obligation as a result of a past obligating event: There has been no obligating event, and so there is no obligation.

Conclusion: The micro-entity does not recognise a provision.

Example 6 Closure of a division: communication and implementation before end of reporting period

16A.6 On 12 December 20X0 the board of a micro-entity decided to close a division making a particular product. On 20 December 20X0 a detailed plan for closing the division was agreed by the board, letters were sent to customers warning them to seek an alternative source of supply, and redundancy notices were sent to the staff of the division.

Present obligation as a result of a past obligating event: The obligating event is the communication of the decision to the customers and employees, which gives rise to a constructive obligation from that date, because it creates a valid expectation that the division will be closed.

An outflow of resources embodying economic benefits in settlement: Probable.

Conclusion: The micro-entity recognises a provision at 31 December 20X0 for the best estimate of the costs that would be incurred to close the division at the reporting date.

Example 7 Staff retraining as a result of changes in the income tax system

16A.7 The government introduces changes to the income tax system. As a result of those changes, a micro-entity will need to retrain a large proportion of its administrative and sales workforce in order to ensure continued compliance with tax regulations. At the end of the reporting period, no retraining of staff has taken place.

Present obligation as a result of a past obligating event: The tax law change does not impose an obligation on a micro-entity to do any retraining. An obligating event for recognising a provision (the retraining itself) has not taken place.

Conclusion: The micro-entity does not recognise a provision.

Example 8 A court case

16A.8 A customer has sued Micro-entity X, seeking damages for injury the customer allegedly sustained from using a product sold by Micro-entity X. Micro-entity X disputes liability on grounds that the customer did not follow directions in using the product. Up to the date the financial statements for the year to 31 December 20X1 were authorised for issue, the micro-entity’s lawyers advise that it is probable that the micro-entity will not be found liable. However, when the micro-entity prepares the financial statements for
the year to 31 December 20X2, its lawyers advise that, owing to developments in the case, it is now probable that the micro-entity will be found liable.

(a) At 31 December 20X1

Present obligation as a result of a past obligating event: On the basis of the evidence available when the financial statements were approved, there is no obligation as a result of past events.

Conclusion: No provision is recognised, but the micro-entity shall make the disclosures required by paragraph 16.19.

(b) At 31 December 20X2

Present obligation as a result of a past obligating event: On the basis of the evidence available, there is a present obligation. The obligating event is the sale of the product to the customer.

An outflow of resources embodying economic benefits in settlement: Probable.

Conclusion: A provision is recognised at the best estimate of the amount to settle the obligation at 31 December 20X2, and the expense is recognised in profit or loss. It is not a correction of an error in 20X1 because, on the basis of the evidence available when the 20X1 financial statements were approved, a provision should not have been recognised at that time.
Section 17
Liabilities and Equity

Scope of this section

17.1 This section establishes principles for classifying financial instruments as either liabilities or equity and deals with the accounting for compound financial instruments, such as convertible debt. It also addresses the issue of equity instruments, distributions to individuals or other parties acting in their capacity as investors in equity instruments (i.e., in their capacity as owners) and the accounting for purchases of own equity.

17.2 This section shall be applied to all types of financial instruments except:

(a) Investments in subsidiaries and associates and interests in jointly controlled entities that are accounted for in accordance with Section 9 Financial Instruments.

(b) Employers’ rights and obligations under employee benefit plans to which Section 23 Employee Benefits applies.

(c) Financial instruments, contracts and obligations under share-based payment transactions to which Section 21 Share-based Payment applies, except that paragraph 17.14 shall be applied to treasury shares issued, purchased, sold, transferred or cancelled in connection with employee share option plans, employee share purchase plans, and all other share-based payment arrangements.

(d) Financial guarantee contracts (see Section 16 Provisions and Contingencies).

Classification of an instrument as liability or equity

17.3 Equity is the residual interest in the assets of a micro-entity after deducting all its liabilities. Equity includes investments by the owners of the micro-entity, plus additions to those investments earned through profitable operations and retained for use in the micro-entity’s operations, minus reductions to owners’ investments as a result of unprofitable operations and distributions to owners.

17.4 A financial instrument is classified as equity where the issuer can be required to settle an obligation in cash or by delivery of another financial asset (or otherwise to settle it in such a way that it would be a financial liability) only in the event of the liquidation of the issuer.

17.5 A financial instrument is a financial liability of the issuer where the issuer does not have an unconditional right to avoid settling an obligation in cash or by delivery of another financial asset (or otherwise to settle it in such a way that it would be a financial liability), other than for the reason described in paragraph 17.4.

17.6 Examples of instruments and their classification as equity or liabilities are set out below:

(a) An instrument is classified as equity if the only payment holders of the instruments are entitled to receive is a pro rata share of the net assets of the micro-entity on liquidation.

(b) An instrument is classified as a liability if it obliges the micro-entity to make payments to the holder before liquidation, such as a mandatory dividend.

(c) A preference share that provides for mandatory redemption by the issuer for a fixed or determinable amount at a fixed or determinable future date, or gives the
holder the right to require the issuer to redeem the instrument at or after a particular date for a fixed or determinable amount, is a financial liability.

Original issue of shares or other equity instruments

17.7 A micro-entity shall recognise the issue of shares or other equity instruments as equity when it issues those instruments and another party is obliged to provide cash or other resources to the micro-entity in exchange for the instruments.

(a) If the micro-entity receives the cash or other resources before the equity instruments are issued, and the micro-entity cannot be required to repay the cash or other resources received, the micro-entity shall recognise the corresponding increase in equity to the extent of consideration received.

(b) To the extent that the equity instruments have been subscribed for but not issued (or called up), and the micro-entity has not yet received the cash or other resources, the micro-entity shall not recognise an increase in equity.

17.8 A micro-entity shall measure the equity instruments at the fair value of the cash or other resources received or receivable, net of direct costs of issuing the equity instruments.

17.9 A micro-entity shall account for the transaction costs of an equity transaction as a deduction from equity, net of any related income tax benefit.

Exercise of options, rights and warrants

17.10 A micro-entity shall apply the principles in paragraphs 17.7 to 17.9 to equity issued by means of exercise of options, rights, warrants and similar equity instruments.

Convertible debt and similar compound financial instruments

17.11 On issuing convertible debt, or a similar compound financial instrument, a micro-entity shall allocate the proceeds between the liability component and the equity component of the instrument. To make the allocation, the micro-entity shall first determine the amount of the liability component as the fair value of a similar liability that does not have a conversion feature or similar associated equity component. The micro-entity shall allocate the residual amount as the equity component. Transaction costs shall be allocated between the debt component and the equity component on the basis of their relative fair values.

17.12 The micro-entity shall not revise the allocation in a subsequent period.

17.13 In periods after the instruments were issued, the micro-entity shall account for the liability component as a financial instrument in accordance with Section 9. The example shown in the Appendix to Section 22 Liabilities and Equity of FRS 102 illustrates the accounting for convertible debt by an issuer.

Treasury shares

17.14 Treasury shares are the equity instruments of a micro-entity that have been issued and subsequently reacquired by the micro-entity. A micro-entity shall deduct from equity the fair value of the consideration given for the treasury shares. The micro-entity shall not recognise a gain or loss in profit or loss on the purchase, sale, transfer or cancellation of treasury shares.
Distributions to owners

17.15 A micro-entity shall reduce its equity reserves for the amount of distributions to its owners (holders of its equity instruments).
Section 18
Revenue

Scope of this section

18.1 This section shall be applied in accounting for revenue arising from the following transactions and events:
   (a) the sale of goods (whether produced by the micro-entity for the purpose of sale or purchased for resale);
   (b) the rendering of services;
   (c) construction contracts in which the micro-entity is the contractor; and
   (d) the use by others of micro-entity assets yielding interest, royalties or dividends.

18.2 Revenue or other income arising from lease agreements is dealt with in Section 15 Leases.

Measurement of revenue

18.3 A micro-entity shall measure revenue at the amount receivable, taking into account any trade discounts, prompt settlement discounts and volume rebates allowed by the micro-entity.

18.4 A micro-entity shall include in revenue only the gross inflows of economic benefits received and receivable by the micro-entity on its own account. A micro-entity shall exclude from revenue all amounts collected on behalf of third parties such as sales taxes, goods and services taxes and value added taxes. In an agency relationship, a micro-entity (the agent) shall include in revenue only the amount of its commission. The amounts collected on behalf of the principal are not revenue of the micro-entity.

Deferred payment

18.5 If payment is deferred beyond normal credit terms, the amount of revenue recognised is equal to the cash price available on the transaction date. Any excess of the deferred payment amount over the cash price available on the transaction date is recognised as interest and accounted for in accordance with paragraph 9.14(a).

Exchanges of goods or services

18.6 A micro-entity shall not recognise revenue:
   (a) when goods or services are exchanged for goods or services that are of a similar nature and value; or
   (b) when goods or services are exchanged for dissimilar goods or services but the transaction lacks commercial substance.

18.7 A micro-entity shall recognise revenue when goods are sold or services are exchanged for dissimilar goods or services in a transaction that has commercial substance. In that case, the micro-entity shall measure the transaction:
   (a) at the fair value of the goods or services received, adjusted by the amount of any cash transferred;
   (b) if the amount under (a) cannot be measured reliably, then at the fair value of the goods or services given up adjusted by the amount of any cash transferred; or
(c) if the fair value of neither the goods or services received nor the goods or services given up can be measured reliably, then at the carrying amount of the goods or services given up adjusted by the amount of any cash transferred.

Identification of the revenue transaction

18.8 A micro-entity shall apply the recognition criteria to the separately identifiable components of a single transaction when necessary to reflect the substance of the transaction. For example, a micro-entity applies the recognition criteria to the separately identifiable components of a single transaction when the selling price of a product includes an identifiable amount for subsequent servicing. Conversely, a micro-entity applies the recognition criteria to two or more transactions together when they are linked in such a way that the commercial effect cannot be understood without reference to the series of transactions as a whole.

Sale of goods

18.9 A micro-entity shall recognise revenue from the sale of goods when all the following conditions are satisfied:

(a) the micro-entity has transferred to the buyer the significant risks and rewards of ownership of the goods;
(b) the micro-entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
(c) the amount of revenue can be measured reliably;
(d) it is probable that the economic benefits associated with the transaction will flow to the micro-entity; and
(e) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

18.10 The assessment of when a micro-entity has transferred the significant risks and rewards of ownership to the buyer requires an examination of the circumstances of the transaction. In most cases, the transfer of the risks and rewards of ownership coincides with the transfer of the legal title or the passing of possession to the buyer. This is the case for most retail sales. In other cases, the transfer of risks and rewards of ownership occurs at a time different from the transfer of legal title or the passing of possession.

18.11 A micro-entity does not recognise revenue if it retains significant risks and rewards of ownership. Examples of situations in which the micro-entity may retain the significant risks and rewards of ownership are:

(a) when the micro-entity retains an obligation for unsatisfactory performance not covered by normal warranties;
(b) when the receipt of the revenue from a particular sale is contingent on the buyer selling the goods;
(c) when the goods are shipped subject to installation and the installation is a significant part of the contract that has not yet been completed; and
(d) when the buyer has the right to rescind the purchase for a reason specified in the sales contract, or at the buyer’s sole discretion without any reason, and the micro-entity is uncertain about the probability of return.
18.12 If an entity retains only an insignificant risk of ownership, the transaction is a sale and the entity recognises the revenue. For example, a seller recognises revenue when it retains the legal title to the goods solely to protect the collectability of the amount due. Similarly, an entity recognises revenue when it offers a refund if the customer finds the goods faulty or is not satisfied for other reasons, and the entity can estimate the returns reliably. In such cases, the entity recognises a provision for returns in accordance with Section 16 Provisions and Contingencies.

Rendering of services

18.13 When the outcome of a transaction involving the rendering of services can be estimated reliably, a micro-entity shall recognise revenue associated with the transaction by reference to the stage of completion of the transaction at the end of the reporting period (sometimes referred to as the percentage of completion method). The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

(a) the amount of revenue can be measured reliably;
(b) it is probable that the economic benefits associated with the transaction will flow to the micro-entity;
(c) the stage of completion of the transaction at the end of the reporting period can be measured reliably; and
(d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Paragraphs 18.18 to 18.24 provide guidance for applying the percentage of completion method.

18.14 When services are performed by an indeterminate number of acts over a specified period of time, a micro-entity recognises revenue on a straight-line basis over the specified period unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other act, the micro-entity postpones recognition of revenue until the significant act is executed.

18.15 When the outcome of the transaction involving the rendering of services cannot be estimated reliably, a micro-entity shall recognise revenue only to the extent of the expenses recognised that are recoverable.

Construction contracts

18.16 When the outcome of a construction contract can be estimated reliably, a micro-entity shall recognise contract revenue and contract costs associated with the construction contract as revenue and expenses respectively by reference to the stage of completion of the contract activity at the end of the reporting period (often referred to as the percentage of completion method). Reliable estimation of the outcome requires reliable estimates of the stage of completion, future costs and collectability of billings. Paragraphs 18.18 to 18.24 provide guidance for applying the percentage of completion method.

18.17 The requirements of this section are usually applied separately to each construction contract. However, in some circumstances, it is necessary to apply this section to the separately identifiable components of a single contract or to a group of contracts together in order to reflect the substance of a contract or a group of contracts.
Percentage of completion method

18.18 This method is used to recognise revenue from rendering services (see paragraphs 18.13 to 18.15) and from construction contracts (see paragraphs 18.16 and 18.17). A micro-entity shall review and, when necessary, revise the estimates of revenue and costs as the service transaction or construction contract progresses.

18.19 A micro-entity shall determine the stage of completion of a transaction or contract using the method that measures most reliably the work performed. Possible methods include:

(a) the proportion that costs incurred for work performed to date bear to the estimated total costs. Costs incurred for work performed to date do not include costs relating to future activity, such as for materials or prepayments;

(b) surveys of work performed; and

(c) completion of a physical proportion of the contract work or the completion of a proportion of the service contract.

Progress payments and advances received from customers often do not reflect the work performed.

18.20 A micro-entity shall recognise costs that relate to future activity on the transaction or contract, such as for materials or prepayments, as an asset if it is probable that the costs will be recovered.

18.21 A micro-entity shall recognise as an expense immediately any costs whose recovery is not probable.

18.22 When the outcome of a construction contract cannot be estimated reliably:

(a) a micro-entity shall recognise revenue only to the extent of contract costs incurred that it is probable will be recoverable; and

(b) the micro-entity shall recognise contract costs as an expense in the period in which they are incurred.

18.23 When it is probable that total contract costs will exceed total contract revenue on a construction contract, the expected loss shall be recognised as an expense immediately, with a corresponding provision for an onerous contract (see Section 16 Provisions and Contingencies).

18.24 If the collectability of an amount already recognised as contract revenue is no longer probable, the micro-entity shall recognise the uncollectible amount as an expense rather than as an adjustment of the amount of contract revenue.

Interest, royalties and dividends

18.25 A micro-entity shall recognise revenue arising from the use by others of micro-entity assets yielding interest, royalties and dividends on the bases set out in paragraph 18.26 when:

(a) it is probable that the economic benefits associated with the transaction will flow to the micro-entity; and

(b) the amount of the revenue can be measured reliably.
18.26 A micro-entity shall recognise revenue on the following bases:

(a) Interest income shall be recognised in accordance with Section 9 *Financial Instruments*.

(b) Royalties shall be recognised on an **accrual basis** in accordance with the substance of the relevant agreement.

(c) Dividends shall be recognised when the shareholder’s right to receive payment is established.
Appendix to Section 18

Examples of revenue recognition under the principles in Section 18

This appendix accompanies, but is not part of, Section 18. It provides guidance for applying the requirements of Section 18 in recognising revenue.

18A.1 The following examples focus on particular aspects of a transaction and are not a comprehensive discussion of all the relevant factors that might influence the recognition of revenue. The examples generally assume that the amount of revenue can be measured reliably, it is probable that the economic benefits will flow to the micro-entity and the costs incurred or to be incurred can be measured reliably.

Sale of goods

18A.2 The law in different countries may cause the recognition criteria in Section 18 to be met at different times. In particular, the law may determine the point in time at which the micro-entity transfers the significant risks and rewards of ownership. Therefore, the examples in this appendix need to be read in the context of the laws relating to the sale of goods in the country in which the transaction takes place.

Example 1 ‘Bill and hold’ sales, in which delivery is delayed at the buyer’s request but the buyer takes title and accepts billing

18A.3 The seller recognises revenue when the buyer takes title, provided:
   (a) it is probable that delivery will be made;
   (b) the item is on hand, identified and ready for delivery to the buyer at the time the sale is recognised;
   (c) the buyer specifically acknowledges the deferred delivery instructions; and
   (d) the usual payment terms apply.

Revenue is not recognised when there is simply an intention to acquire or manufacture the goods in time for delivery.

Example 2 Goods shipped subject to conditions: installation and inspection

18A.4 The seller normally recognises revenue when the buyer accepts delivery, and installation and inspection are complete. However, revenue is recognised immediately upon the buyer’s acceptance of delivery when:
   (a) the installation process is simple, for example the installation of a factory-tested television receiver that requires only unpacking and connection of power and antennae; or
   (b) the inspection is performed only for the purposes of final determination of contract prices, for example, shipments of iron ore, sugar or soya beans.

Example 3 Goods shipped subject to conditions: on approval when the buyer has negotiated a limited right of return

18A.5 If there is uncertainty about the possibility of return, the seller recognises revenue when the shipment has been formally accepted by the buyer or the goods have been delivered and the time period for rejection has elapsed.
Example 4 Goods shipped subject to conditions: consignment sales under which the recipient (buyer) undertakes to sell the goods on behalf of the shipper (seller)

18A.6 The shipper recognises revenue when the goods are sold by the recipient to a third party.

Example 5 Goods shipped subject to conditions: cash on delivery sales

18A.7 The seller recognises revenue when delivery is made and cash is received by the seller or its agent.

Example 6 Layaway sales under which the goods are delivered only when the buyer makes the final payment in a series of instalments

18A.8 The seller recognises revenue from such sales when the goods are delivered. However, when experience indicates that most such sales are consummated, revenue may be recognised when a significant deposit is received, provided the goods are on hand, identified and ready for delivery to the buyer.

Example 7 Orders when payment (or partial payment) is received in advance of delivery for goods not currently held in inventory, for example, the goods are still to be manufactured or will be delivered direct to the buyer from a third party

18A.9 The seller recognises revenue when the goods are delivered to the buyer.

Example 8 Sale and repurchase agreements (other than swap transactions) under which the seller concurrently agrees to repurchase the same goods at a later date, or when the seller has a call option to repurchase, or the buyer has a put option to require the repurchase, by the seller, of the goods

18A.10 For a sale and repurchase agreement on an asset other than a financial asset, the seller must analyse the terms of the agreement to ascertain whether, in substance, the risks and rewards of ownership have been transferred to the buyer. If they have been transferred, the seller recognises revenue. When the seller has retained the risks and rewards of ownership, even though legal title has been transferred, the transaction is a financing arrangement and does not give rise to revenue. For a sale and repurchase agreement on a financial asset, the derecognition provisions of Section 9 apply.

Example 9 Sales to intermediate parties, such as distributors, dealers or others for resale

18A.11 The seller generally recognises revenue from such sales when the risks and rewards of ownership have been transferred. However, when the buyer is acting, in substance, as an agent, the sale is treated as a consignment sale.

Example 10 Subscriptions to publications and similar items

18A.12 When the items involved are of similar value in each time period, the seller recognises revenue on a straight-line basis over the period in which the items are dispatched. When the items vary in value from period to period, the seller recognises revenue on the basis of the sales value of the item dispatched in relation to the total estimated sales value of all items covered by the subscription.

Example 11 Instalment sales, under which the consideration is receivable in instalments

18A.13 The seller recognises revenue based on the cash price a customer would pay at the date of sale. If the total amount paid through instalments is greater than the cash price
payable at the date of sale, any excess is recognised as interest and accounted for in accordance with paragraph 9.14(a).

Example 12 Agreements for the construction of real estate

18A.14 A micro-entity that undertakes the construction of real estate, directly or through subcontractors, and enters into an agreement with one or more buyers before construction is complete, shall account for the agreement using the percentage of completion method, only if:

(a) the buyer is able to specify the major structural elements of the design of the real estate before construction begins and/or specify major structural changes once construction is in progress (whether it exercises that ability or not); or

(b) the buyer acquires and supplies construction materials and the micro-entity provides only construction services.

18A.15 If the micro-entity is required to provide services together with construction materials in order to perform its contractual obligation to deliver real estate to the buyer, the agreement shall be accounted for as the sale of goods. In this case, the buyer does not obtain control or the significant risks and rewards of ownership of the work in progress in its current state as construction progresses. Rather, the transfer occurs only on delivery of the completed real estate to the buyer.

Example 13 Sale with customer loyalty award

18A.16 A micro-entity sells product A for CU100. Purchasers of product A get an award credit enabling them to buy product B for CU10. The normal selling price of product B is CU18. The micro-entity estimates that 40 per cent of the purchasers of product A will use their award to buy product B at CU10. The normal selling price of product A, after taking into account discounts that are usually offered but that are not available during this promotion, is CU95.

18A.17 The fair value of the award credit is 40 per cent \[\times (\text{CU18} - \text{CU10}) = \text{CU3.20}\]. The micro-entity allocates the total revenue of CU100 between product A and the award credit by reference to their relative fair values of CU95 and CU3.20 respectively. Therefore:

(a) Revenue for product A is \[\text{CU100} \times (\frac{\text{CU95}}{\text{CU95} + \text{CU3.20}}) = \text{CU96.74}\]

(b) Revenue for product B is \[\text{CU100} \times (\frac{\text{CU3.20}}{\text{CU95} + \text{CU3.20}}) = \text{CU3.26}\]

Rendering of services

Example 14 Installation fees

18A.18 The seller recognises installation fees as revenue by reference to the stage of completion of the installation, unless they are incidental to the sale of a product, in which case they are recognised when the goods are sold.

Example 15 Servicing fees included in the price of the product

18A.19 When the selling price of a product includes an identifiable amount for subsequent servicing (e.g., after-sales support and product enhancement on the sale of software), the seller defers that amount and recognises it as revenue over the period during which the service is performed. The amount deferred is that which will cover the expected costs of the services under the agreement, together with a reasonable profit on those services.
Example 16 Advertising commissions

18A.20 Media commissions are recognised when the related advertisement or commercial appears before the public. Production commissions are recognised by reference to the stage of completion of the project.

Example 17 Admission fees

18A.21 The seller recognises revenue from artistic performances, banquets and other special events when the event takes place. When a subscription to a number of events is sold, the seller allocates the fee to each event on a basis that reflects the extent to which services are performed at each event.

Example 18 Tuition fees

18A.22 The seller recognises revenue over the period of instruction.

Example 19 Initiation, entrance and membership fees

18A.23 Revenue recognition depends on the nature of the services provided. If the fee permits only membership, and all other services or products are paid for separately, or if there is a separate annual subscription, the fee is recognised as revenue when no significant uncertainty about its collectability exists. If the fee entitles the member to services or publications to be provided during the membership period, or to purchase goods or services at prices lower than those charged to non-members, it is recognised on a basis that reflects the timing, nature and value of the benefits provided.

Franchise fees

18A.24 Franchise fees may cover the supply of initial and subsequent services, equipment and other tangible assets, and know-how. Accordingly, franchise fees are recognised as revenue on a basis that reflects the purpose for which the fees were charged. The following methods of franchise fee recognition are appropriate.

Example 20 Franchise fees: Supplies of equipment and other tangible assets

18A.25 The franchisor recognises the fair value of the assets sold as revenue when the items are delivered or title passes.

Example 21 Franchise fees: Supplies of initial and subsequent services

18A.26 The franchisor recognises fees for the provision of continuing services, whether part of the initial fee or a separate fee, as revenue as the services are rendered. When the separate fee does not cover the cost of continuing services together with a reasonable profit, part of the initial fee, sufficient to cover the costs of continuing services and to provide a reasonable profit on those services, is deferred and recognised as revenue as the services are rendered.

18A.27 The franchise agreement may provide for the franchisor to supply equipment, inventories, or other tangible assets at a price lower than that charged to others or a price that does not provide a reasonable profit on those sales. In these circumstances, part of the initial fee, sufficient to cover estimated costs in excess of that price and to provide a reasonable profit on those sales, is deferred and recognised over the period the goods are likely to be sold to the franchisee. The balance of an initial fee is recognised as revenue when performance of all the initial services and other obligations required of the franchisor (such as assistance with site selection, staff training, financing and advertising) has been substantially accomplished.

72 FRS 105 (July 2015)
18A.28 The initial services and other obligations under an area franchise agreement may depend on the number of individual outlets established in the area. In this case, the fees attributable to the initial services are recognised as revenue in proportion to the number of outlets for which the initial services have been substantially completed.

18A.29 If the initial fee is collectible over an extended period and there is a significant uncertainty that it will be collected in full, the fee is recognised as cash instalments are received.

Example 22 Franchise fees: Continuing franchise fees

18A.30 Fees charged for the use of continuing rights granted by the agreement, or for other services provided during the period of the agreement, are recognised as revenue as the services are provided or the rights used.

Example 23 Franchise fees: Agency transactions

18A.31 Transactions may take place between the franchisor and the franchisee that, in substance, involve the franchisor acting as agent for the franchisee. For example, the franchisor may order supplies and arrange for their delivery to the franchisee at no profit. Such transactions do not give rise to revenue.

Example 24 Fees from the development of customised software

18A.32 The software developer recognises fees from the development of customised software as revenue by reference to the stage of completion of the development, including completion of services provided for post-delivery service support.

Interest, royalties and dividends

Example 25 Licence fees and royalties

18A.33 The licensor recognises fees and royalties paid for the use of its assets (such as trademarks, patents, software, music copyright, record masters and motion picture films) in accordance with the substance of the agreement. As a practical matter, this may be on a straight-line basis over the life of the agreement, for example, when a licensee has the right to use specified technology for a specified period of time.

18A.34 An assignment of rights for a fixed fee or non-refundable guarantee under a non-cancellable contract that permits the licensee to exploit those rights freely and the licensor has no remaining obligations to perform is, in substance, a sale. An example is a licensing agreement for the use of software when the licensor has no obligations after delivery. Another example is the granting of rights to exhibit a motion picture film in markets in which the licensor has no control over the distributor and expects to receive no further revenues from the box office receipts. In such cases, revenue is recognised at the time of sale.

18A.35 In some cases, whether or not a licence fee or royalty will be received is contingent on the occurrence of a future event. In such cases, revenue is recognised only when it is probable that the fee or royalty will be received, which is normally when the event has occurred.
Section 19
Government Grants

Scope of this section

19.1 This section specifies the accounting for all government grants.

19.2 Government grants exclude those forms of government assistance that cannot reasonably have a value placed upon them and transactions with government that cannot be distinguished from the normal trading transactions of the micro-entity.

Recognition and measurement

19.3 Government grants, including non-monetary grants, shall not be recognised until there is reasonable assurance that:
   (a) the micro-entity will comply with the conditions attaching to them; and
   (b) the grants will be received.

19.4 A micro-entity shall measure grants at the fair value of the asset received or receivable.

19.5 Where a grant becomes repayable it shall be recognised as a liability when the repayment meets the definition of a liability.

19.6 A micro-entity shall classify government grants either as a grant relating to revenue or a grant relating to assets.

19.7 Government grants relating to revenue shall be recognised in income on a systematic basis over the periods in which the micro-entity recognises the related costs for which the grant is intended to compensate.

19.8 A government grant that becomes receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the entity with no future related costs shall be recognised as income in profit or loss in the period in which it becomes receivable.

19.9 Government grants relating to assets shall be recognised in income on a systematic basis over the expected useful life of the asset.

19.10 Where part of a government grant relating to an asset is deferred it shall be recognised as deferred income and not deducted from the carrying amount of the asset.
Section 20
Borrowing Costs

Scope of this section

20.1 This section specifies the accounting for borrowing costs. Borrowing costs include:

(a) interest expense recognised in accordance with Section 9 Financial Instruments;
(b) finance charges in respect of finance leases recognised in accordance with Section 15 Leases; and
(c) exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

Recognition

20.2 A micro-entity shall recognise all borrowing costs as an expense in profit or loss in the period in which they are incurred.
Section 21
Share-based Payment

Scope of this section

21.1 This section specifies the accounting for all share-based payment transactions including:
   (a) equity-settled share-based payment transactions;
   (b) cash-settled share-based payment transactions; and
   (c) transactions in which the micro-entity receives or acquires goods or services and the terms of the arrangement provide either the micro-entity or the supplier of those goods or services with a choice of whether the micro-entity settles the transaction in cash (or other assets) or by issuing equity instruments.

Equity-settled share-based payment transactions

21.2 A micro-entity shall not account for equity-settled share-based payments transactions until shares are issued, at which point the micro-entity shall apply the requirements of Section 17 Liabilities and Equity.

Cash-settled share-based payment transactions

21.3 A micro-entity shall recognise the goods or services received or acquired in a cash-settled share-based payment transaction when it obtains the goods or as the services are received and recognise a corresponding liability.

21.4 If the cash-settled share-based payments granted to employees vest immediately, the employee is not required to complete a specified period of service before becoming unconditionally entitled to those cash-settled share-based payments. In the absence of evidence to the contrary, the micro-entity shall presume that services rendered by the employee as consideration for the share-based payments have been received. In this case, on grant date the micro-entity shall recognise the services received in full, with a corresponding liability.

21.5 If the cash-settled share-based payments do not vest until the employee completes a specified period of service, the micro-entity shall presume that the services to be rendered by the employee as consideration for those cash-settled share-based payments will be received in the future, during the vesting period. The micro-entity shall account for those services as they are rendered by the employee during the vesting period, with a corresponding increase in the liability.

21.6 When the goods or services received or acquired in a cash-settled share-based payment transaction do not qualify for recognition as assets, the micro-entity shall recognise them as expenses.

21.7 A micro-entity shall measure the goods and services acquired and the liability incurred in accordance with the measurement requirements for a provision in Section 16 Provisions and Contingencies.

76 FRS 105 (July 2015)
Share-based payment transactions with cash alternatives

21.8 Some share-based payment transactions give either the micro-entity or the counterparty a choice of settling the transaction in cash (or other assets) or by the transfer of equity instruments.

21.9 When the micro-entity has a choice of settlement of the transaction in cash (or other assets) or by the transfer of equity instruments, the micro-entity shall account for the whole transaction as set out in paragraph 21.2 unless:

(a) the choice of settlement in equity instruments has no commercial substance (eg because the micro-entity is legally prohibited from issuing shares); or

(b) the micro-entity has a past practice or a stated policy of settling in cash, or generally settles in cash whenever the counterparty asks for cash settlement.

In circumstances (a) and (b) the micro-entity shall account for the transaction as a wholly cash-settled transaction in accordance with paragraphs 21.3 to 21.7.

21.10 When the counterparty has a choice of settlement of the transaction in cash (or other assets) or by the transfer of equity instruments, the micro-entity shall account for the transaction as a wholly cash-settled share-based payment transaction in accordance with paragraphs 21.3 to 21.7 unless:

(a) the choice of settlement in cash (or other assets) has no commercial substance because the cash settlement amount (or value of the other assets) bears no relationship to, and is likely to be lower in value than, the fair value of the equity instruments.

In circumstance (a) the entity shall account for the whole transaction as set out in paragraph 21.2.
Section 22
Impairment of Assets

Objective and scope

22.1 An impairment loss occurs when the carrying amount of an asset exceeds its recoverable amount. This section shall be applied in accounting for the impairment of all assets (including goodwill), other than the following, for which other sections of this FRS establish impairment requirements:

(a) assets arising from construction contracts (see Section 18 Revenue);
(b) financial assets within the scope of Section 9 Financial Instruments; and
(c) inventories (see Section 10 Inventories).

Impairment of assets

General principles

22.2 If, and only if, the recoverable amount of an asset is less than its carrying amount, the micro-entity shall reduce the carrying amount of the asset to its recoverable amount.

22.3 If it is not possible to estimate the recoverable amount of the individual asset, a micro-entity shall estimate the recoverable amount of the cash-generating unit to which the asset belongs. This may be the case because measuring the recoverable amount requires forecasting cash flows, and sometimes individual assets do not generate cash flows by themselves. An impairment loss for a cash-generating unit shall be recognised and measured in accordance with the relevant requirements of Section 27 Impairment of Assets of FRS 102.

22.4 A micro-entity that has goodwill acquired in a business combination shall apply the additional impairment requirements applicable to goodwill in paragraphs 27.24 to 27.27 of FRS 102.

22.5 A micro-entity shall recognise an impairment loss immediately in profit or loss.

Indicators of impairment

22.6 A micro-entity shall assess at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the micro-entity shall estimate the recoverable amount of the asset. If there is no indication of impairment, it is not necessary to estimate the recoverable amount.

22.7 In assessing whether there is any indication that an asset may be impaired, a micro-entity shall consider, as a minimum, the following indications:

External sources of information

(a) During the period, an asset’s market value has declined significantly more than would be expected as a result of the passage of time or normal use.

(b) Significant changes with an adverse effect on the micro-entity have taken place during the period, or will take place in the near future, in the technological, market, economic or legal environment in which the micro-entity operates or in the market to which an asset is dedicated.
(c) Market interest rates or other market rates of return on investments have increased during the period, and those increases are likely to affect materially the discount rate used in calculating an asset's **value in use** and decrease the asset's **fair value less costs to sell**.

(d) The carrying amount of the net assets of the micro-entity is more than the estimated **fair value** of the micro-entity as a whole (such an estimate may have been made, for example, in relation to the potential sale of part or all of the micro-entity).

**Internal sources of information**

(e) Evidence is available of obsolescence or physical damage of an asset.

(f) Significant changes with an adverse effect on the micro-entity have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, plans to dispose of an asset before the previously expected date, and reassessing the **useful life** of an asset as finite rather than indefinite.

(g) Evidence is available from internal reporting that indicates that the economic performance of an asset is, or will be, worse than expected. In this context economic performance includes operating results and cash flows.

22.8 If there is an indication that an asset may be impaired, this may indicate that the micro-entity should review the remaining useful life, the **depreciation (amortisation)** method or the **residual value** for the asset and adjust it in accordance with the section of this FRS applicable to the asset (eg Section 12 **Property, Plant and Equipment and Investment Property** and Section 13 **Intangible Assets other than Goodwill**), even if no impairment loss is recognised for the asset.

**Measuring recoverable amount**

22.9 The recoverable amount of an asset is the higher of its **fair value less costs to sell** and its **value in use**.

22.10 It is not always necessary to determine both an asset's **fair value less costs to sell** and its **value in use**. If either of these amounts exceeds the asset's carrying amount, the asset is not impaired and it is not necessary to estimate the other amount.

22.11 If there is no reason to believe that an asset's **value in use** materially exceeds its **fair value less costs to sell** the asset's **fair value less costs to sell** may be used as its recoverable amount. This will often be the case for an asset that is held for disposal.

**Fair value less costs to sell**

22.12 **Fair value less costs to sell** is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal. The best evidence of the **fair value less costs to sell** of an asset is a price in a binding sale agreement in an arm's length transaction or a market price in an **active market**. If there is no binding sale agreement or active market for an asset, **fair value less costs to sell** is based on the best information available to reflect the amount that a micro-entity could obtain, at the reporting date, from the disposal of the asset in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. In determining this amount, a micro-entity considers the outcome of recent transactions for similar assets within the same industry.
22.13 When determining an asset’s fair value less costs to sell, consideration shall be given to any restrictions imposed on that asset. Costs to sell shall also include the cost of obtaining relaxation of a restriction where necessary in order to enable the asset to be sold. If a restriction would also apply to any potential purchaser of an asset, the fair value of the asset may be lower than that of an asset whose use is not restricted.

Value in use

22.14 Value in use is the present value of the future cash flows expected to be derived from an asset. This present value calculation involves the following steps:

(a) estimating the future cash inflows and outflows to be derived from the continuing use of the asset and from its ultimate disposal; and

(b) applying the appropriate discount rate to those future cash flows.

22.15 In measuring value in use, estimates of future cash flows shall include:

(a) projections of cash inflows from the continuing use of the asset;

(b) projections of cash outflows that are necessarily incurred to generate the cash inflows from continuing use of the asset (including cash outflows to prepare the asset for use) and can be directly attributed, or allocated on a reasonable and consistent basis, to the asset; and

(c) net cash flows, if any, expected to be received (or paid) for the disposal of the asset at the end of its useful life in an arm’s length transaction between knowledgeable, willing parties.

The micro-entity may wish to use any recent financial budgets or forecasts to estimate the cash flows, if available, and extrapolate the projections using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified.

22.16 Estimates of future cash flows shall not include:

(a) cash inflows or outflows from financing activities; or

(b) income tax receipts or payments.

22.17 Future cash flows shall be estimated for the asset in its current condition. Estimates of future cash flows shall not include estimated future cash inflows or outflows that are expected to arise from:

(a) a future restructuring to which a micro-entity is not yet committed; or

(b) improving or enhancing the asset’s performance.

22.18 The discount rate(s) used in the present value calculation shall be a pre-tax rate(s) that reflect(s) current market assessments of:

(a) the time value of money; and

(b) the risks specific to the asset for which the future cash flow estimates have not been adjusted.

The discount rate(s) used to measure an asset’s value in use shall not reflect risks for which the future cash flow estimates have been adjusted, to avoid double-counting.
Reversal of an impairment loss

22.19 An impairment loss recognised for **goodwill** shall not be reversed in a subsequent period.

22.20 For all assets other than goodwill, if and only if the reasons for the impairment loss have ceased to apply, an impairment loss shall be reversed in a subsequent period. A micro-entity shall assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods may no longer exist or may have decreased. Indications that an impairment loss may have decreased or may no longer exist are generally the opposite of those set out in paragraph 22.7. If any such indication exists, the micro-entity shall determine whether all or part of the prior impairment loss should be reversed.

Reversal where recoverable amount was estimated for an individual impaired asset

22.21 When the prior impairment loss was based on the recoverable amount of the individual impaired asset, the following requirements apply:

(a) The micro-entity shall estimate the recoverable amount of the asset at the current reporting date.

(b) If the estimated recoverable amount of the asset exceeds its carrying amount, the micro-entity shall increase the carrying amount to recoverable amount, subject to the limitation described in paragraph (c) below. That increase is a reversal of an impairment loss. The micro-entity shall recognise the reversal immediately in profit or loss.

(c) The reversal of an impairment loss shall not increase the carrying amount of the asset above the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior years.

(d) After a reversal of an impairment loss is recognised, the micro-entity shall adjust the depreciation (amortisation) charge for the asset in future periods to allocate the asset’s revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

---

1 The prohibition of the reversal of goodwill impairment losses is subject to the introduction of the same requirement in company law. Prior to that change being made this FRS requires the reversal of goodwill if the conditions set out in paragraph 22.20 are met.
Section 23
Employee Benefits

Scope of this section

23.1 Employee benefits are all forms of consideration given by a micro-entity in exchange for service rendered by employees, including directors and management. This section applies to all employee benefits, except for share-based payment transactions, which are covered by Section 21 Share-based Payment. Employee benefits covered by this section will be one of the following four types:

(a) short-term employee benefits, which are employee benefits (other than termination benefits) that are expected to be settled wholly before 12 months after the end of the reporting period in which the employees render the related service;

(b) post-employment benefits, which are employee benefits (other than termination benefits and short-term employee benefits) that are payable after the completion of employment;

(c) other long-term employee benefits, which are all employee benefits, other than short-term employee benefits, post-employment benefits and termination benefits; or

(d) termination benefits, which are employee benefits provided in exchange for the termination of an employee’s employment as a result of either:
   (i) a micro-entity’s decision to terminate an employee’s employment before the normal retirement date; or
   (ii) an employee’s decision to accept voluntary redundancy in exchange for those benefits.

General recognition principle for all employee benefits

23.2 A micro-entity shall recognise the cost of all employee benefits to which its employees have become entitled as a result of service rendered to the micro-entity during the reporting period:

(a) As a liability, after deducting amounts that have been paid directly to the employees or as a contribution to an employee benefit fund. If the amount paid exceeds the obligation arising from service before the reporting date, a micro-entity shall recognise that excess as an asset to the extent that the prepayment will lead to a reduction in future payments or a cash refund.

(b) As an expense, unless another section of this FRS requires the cost to be recognised as part of the cost of an asset such as inventories (for example in accordance with paragraph 10.8) or property, plant and equipment (in accordance with paragraph 12.9).

Contributions to an employee benefit fund that is an intermediate payment arrangement shall be accounted for in accordance with Section 7 Subsidiaries, Associates, Jointly Controlled Entities and Intermediate Payment Arrangements, and as a result if the employer is a sponsoring micro-entity the assets and liabilities of the intermediary will be accounted for by the sponsoring micro-entity as an extension of its own business. In which case the payment to the employee benefit fund does not extinguish the liability of the employer.

82 FRS 105 (July 2015)
Short-term employee benefits

Examples

23.3 Short-term employee benefits include items such as the following, if expected to be settled wholly before 12 months after the end of the annual reporting period in which the employees render the related service:

(a) wages, salaries and social security contributions;
(b) paid annual leave and paid sick leave;
(c) profit-sharing and bonuses; and
(d) non-monetary benefits (such as medical care, housing, cars and free or subsidised goods or services) for current employees.

Measurement of short-term benefits generally

23.4 When an employee has rendered service to a micro-entity during the reporting period, the micro-entity shall measure the amounts recognised in accordance with paragraph 23.2 at the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service.

Recognition and measurement: Short-term compensated absences

23.5 A micro-entity may compensate employees for absence for various reasons including annual leave and sick leave. Some short-term compensated absences accumulate they can be carried forward and used in future periods if the employee does not use the current period’s entitlement in full. Examples include annual leave and sick leave. A micro-entity shall recognise the expected cost of **accumulating compensated absences** when the employees render service that increases their entitlement to future compensated absences. The micro-entity shall measure the expected cost of accumulating compensated absences at the undiscounted additional amount that the micro-entity expects to pay as a result of the unused entitlement that has accumulated at the end of the reporting period. The micro-entity shall present this amount as falling due within one year at the reporting date.

23.6 A micro-entity shall recognise the cost of other (non-accumulating) compensated absences when the absences occur. The micro-entity shall measure the cost of non-accumulating compensated absences at the undiscounted amount of salaries and wages paid or payable for the period of absence.

Recognition: Profit-sharing and bonus plans

23.7 A micro-entity shall recognise the expected cost of profit-sharing and bonus payments only when:

(a) the micro-entity has a present legal or **constructive obligation** to make such payments as a result of past events (this means that the micro-entity has no realistic alternative but to make the payments); and

(b) a reliable estimate of the obligation can be made.
Post-employment benefits: Distinction between defined contribution plans and defined benefit plans

23.8 Post-employment benefits include, for example:
   (a) retirement benefits, such as pensions; and
   (b) other post-employment benefits, such as post-employment life insurance and post-employment medical care.

Arrangements whereby a micro-entity provides post-employment benefits are post-employment benefit plans. A micro-entity shall apply this section to all such arrangements whether or not they involve the establishment of a separate entity to receive contributions and to pay benefits. In some cases, these arrangements are imposed by law rather than by action of the micro-entity. In some cases, these arrangements arise from actions of the micro-entity even in the absence of a formal, documented plan.

23.9 Post-employment benefit plans are classified as either defined contribution plans or defined benefit plans, depending on their principal terms and conditions:
   (a) Defined contribution plans are post-employment benefit plans under which a micro-entity pays fixed contributions into a separate entity (a fund) and has no legal or constructive obligation to pay further contributions or to make direct benefit payments to employees if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The amount of the post-employment benefits received by the employee is determined by the amount of contributions paid by a micro-entity (and perhaps also the employee) to a post-employment benefit plan or to an insurer, together with investment returns arising from the contributions.
   (b) Defined benefit plans are post-employment benefit plans other than defined contribution plans. Under defined benefit plans, the micro-entity’s obligation is to provide the agreed benefits to current and former employees, and actuarial risk (that benefits will cost more or less than expected) and investment risk (that returns on assets set aside to fund the benefits will differ from expectations) are borne, in substance, by the micro-entity. If actuarial or investment experience is worse than expected, the micro-entity’s obligation may be increased, and vice versa if actuarial or investment experience is better than expected.

Post-employment benefit plans

Recognition and measurement – requirements applicable to all plans

23.10 When contributions to a defined contribution or defined benefit plan are not expected to be settled wholly within 12 months after the end of the reporting period in which the employees render the related service, the liability recognised in accordance with paragraph 23.2(a) shall be measured at the present value of the contributions payable using the methodology for selecting a discount rate specified in paragraph 23.11. The unwinding of the discount shall be recognised as interest expense in profit or loss in the period in which it arises.

23.11 A micro-entity shall determine the rate used to discount the future payments by reference to market yields at the reporting date on high quality corporate bonds. In countries with no deep market in such bonds, the micro-entity shall use the market yields (at the reporting date) on government bonds. The currency and term of the corporate bonds or government bonds shall be consistent with the currency and estimated period of the future payments.

84 FRS 105 (July 2015)
Recognition and measurement – requirements applicable to defined benefit plans

23.12 When a micro-entity participates in a defined benefit plan (which may include a multi-employer plan or state plan) and has entered into an agreement with the plan that determines how the micro-entity will fund a deficit (such as a schedule of contributions), the micro-entity shall recognise a liability for the contributions payable that arise from the agreement (to the extent that they relate to the deficit) and the resulting expense in profit or loss in accordance with paragraphs 23.2 and 23.10.

23.13 Where a micro-entity participates in a defined benefit plan that shares risks between entities under common control it shall recognise a cost equal to its contribution payable for the period. If a micro-entity is legally responsible for the plan and has entered into an agreement with the plan that determines how a deficit will be funded, the micro-entity shall recognise a liability for the contributions payable that arise from the agreement (to the extent that they relate to the deficit) and the resulting expense in profit or loss in accordance with paragraphs 23.2 and 23.10.

Other long-term employee benefits

23.14 Other long-term employee benefits include items such as the following, if not expected to be settled wholly before 12 months after the end of the annual reporting period in which the employees render the related service:

(a) long-term paid absences such as long-service or sabbatical leave;
(b) other long-service benefits;
(c) long-term disability benefits;
(d) profit-sharing and bonuses; and
(e) deferred remuneration.

23.15 A micro-entity shall recognise a liability for other long-term employee benefits measured at the present value of the benefit obligation at the reporting date calculated using the methodology for selecting a discount rate in paragraph 23.11. The unwinding of the discount shall be recognised as interest expense in profit or loss in the period in which it arises.

Termination benefits

23.16 A micro-entity may be committed, by legislation, by contractual or other agreements with employees or their representatives or by a constructive obligation based on business practice, custom or a desire to act equitably, to make payments (or provide other benefits) to employees when it terminates their employment. Such payments are termination benefits.

Recognition

23.17 Because termination benefits do not provide a micro-entity with future economic benefits, a micro-entity shall recognise them as an expense in profit or loss immediately.

23.18 A micro-entity shall recognise termination benefits as a liability and an expense only when the micro-entity is demonstrably committed either:

(a) to terminate the employment of an employee or group of employees before the normal retirement date; or
(b) to provide termination benefits as a result of an offer made in order to encourage voluntary redundancy.

23.19 A micro-entity is demonstrably committed to a termination only when the micro-entity has a detailed formal plan for the termination and is without realistic possibility of withdrawal from the plan.

Measurement

23.20 A micro-entity shall measure termination benefits at the best estimate of the expenditure that would be required to settle the obligation at the reporting date. In the case of an offer made to encourage voluntary redundancy, the measurement of termination benefits shall be based on the number of employees expected to accept the offer.

23.21 When termination benefits are due more than 12 months after the end of the reporting period, they shall be measured at their discounted present value using the methodology for selecting a discount rate specified in paragraph 23.11.

Disclosures in the notes

23.22 A micro entity shall disclose any commitment not recognised in the statement of financial position concerning pensions separately from other financial commitments, guarantees and contingencies (see paragraph 6A.2).

---

3 An example of the features of a detailed formal plan for restructuring, which may include termination benefits, is given in paragraph 16.15.
Section 24  
*Income Tax*

**Scope of this section**

24.1 For the purpose of this FRS, *income tax* includes all domestic and foreign taxes that are based on *taxable profit*.

24.2 This section covers accounting for income tax. It requires a *micro-entity* to recognise the *current tax* consequences of transactions and other events that have been recognised in the *financial statements*. Current tax is tax payable (refundable) in respect of the taxable profit (tax loss) for the current period or past *reporting periods*. This section prohibits the recognition of *deferred tax* which represents the future tax consequences of transactions and events recognised in the financial statements of the current and previous periods.

24.3 This section also covers accounting for value added tax (VAT) and other similar sales taxes, which are not income taxes.

**Current tax**

24.4 A micro-entity shall recognise a current tax *liability* for tax payable on taxable profit for the current and past periods. If the amount of tax paid for the current and past periods exceeds the amount of tax payable for those periods, the micro-entity shall recognise the excess as a current tax *asset*.

24.5 A micro-entity shall recognise a current tax asset for the benefit of a tax loss that can be carried back to recover tax paid in a previous period.

24.6 A micro-entity shall measure a current tax liability (asset) at the amount of tax it expects to pay (recover) using the tax rates and laws that have been enacted or *substantively enacted* by the *reporting date*.

**Deferred tax**

24.7 A micro-entity shall not recognise deferred tax.

**Measurement of current tax**

24.8 A micro-entity shall not discount current tax assets and liabilities.

**Withholding tax on dividends**

24.9 When a micro-entity pays dividends to its shareholders, it may be required to pay a portion of the dividends to taxation authorities on behalf of shareholders. Outgoing dividends and similar amounts payable shall be recognised at an amount that includes any withholding tax but excludes other taxes, such as attributable tax credits.

24.10 Incoming dividends and similar income receivable shall be recognised at an amount that includes any withholding tax but excludes other taxes, such as attributable tax credits. Any withholding tax suffered shall be shown as part of the tax charge.
Value Added Tax and other similar sales taxes

24.11 **Turnover** included in **profit or loss** shall exclude VAT and other similar sales taxes on taxable outputs and VAT imputed under the flat rate VAT scheme. **Expenses** shall exclude recoverable VAT and other similar recoverable sales taxes. Irrecoverable VAT allocable to **fixed assets** and to other items separately recognised shall be included in their cost where practicable and **material**.

Presentation

Allocation in profit or loss

24.12 A micro-entity shall present changes in a current tax liability (asset) as **tax expense** (income).

Offsetting

24.13 A micro-entity shall offset current tax assets and current tax liabilities, if and only if, it has a legally enforceable right to set off the amounts and it intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.
Section 25
Foreign Currency Translation

Scope of this section

25.1 A micro-entity may have transactions in foreign currencies. This section prescribes how to include foreign currency transactions in the financial statements of a micro-entity. Where a micro-entity has a foreign branch, the micro-entity should refer to the requirements of Section 30 Foreign Currency Translation of FRS 102 to determine if the foreign branch has a different functional currency, and if so, should apply the requirements of Section 30 of FRS 102 to those transactions undertaken by the foreign branch.

Reporting foreign currency transactions

Initial recognition

25.2 A foreign currency transaction is a transaction that is denominated or requires settlement in a foreign currency, including transactions arising when a micro-entity:

(a) buys or sells goods or services whose price is denominated in a foreign currency;
(b) borrows or lends funds when the amounts payable or receivable are denominated in a foreign currency; or
(c) otherwise acquires or disposes of assets, or incurs or settles liabilities, denominated in a foreign currency.

25.3 A micro-entity shall record a foreign currency transaction by applying to the foreign currency amount the spot exchange rate at the date of the transaction unless:

(a) the transaction is to be settled at a contracted rate, in which case that rate shall be used; or
(b) where a trading transaction is covered by a related or matching forward contract, in which case the rate of exchange specified in that contract shall be used.

25.4 The date of a transaction is the date on which the transaction first qualifies for recognition in accordance with this FRS. For practical reasons, a rate that approximates the actual rate at the date of the transaction is often used, for example, an average rate for a week or a month might be used for all transactions in each foreign currency occurring during that period. However, if exchange rates fluctuate significantly, the use of the average rate for a period is inappropriate.

Reporting at the end of the subsequent reporting periods

25.5 At the end of each reporting period, unless it is applying a contracted rate in accordance with paragraph 25.3 a micro-entity shall:

(a) translate foreign currency monetary items using the closing rate; and
(b) translate non-monetary items that are measured in terms of historical cost in a foreign currency using the exchange rate at the date of the transaction.

25.6 A micro-entity shall recognise, in profit or loss in the period in which they arise, exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous periods.
Section 26  
**Events after the End of the Reporting Period**

**Scope of this section**

26.1 This section defines events after the end of the reporting period and sets out principles for recognising and measuring those events.

**Events after the end of the reporting period defined**

26.2 Events after the end of the reporting period are those events, favourable and unfavourable, that occur between the end of the reporting period and the date when the financial statements are authorised for issue. There are two types of events:

(a) those that provide evidence of conditions that existed at the end of the reporting period (adjusting events after the end of the reporting period); and

(b) those that are indicative of conditions that arose after the end of the reporting period (non-adjusting events after the end of the reporting period).

26.3 Events after the end of the reporting period include all events up to the date when the financial statements are authorised for issue, even if those events occur after the public announcement of profit or loss or other selected financial information.

**Recognition and measurement**

**Adjusting events after the end of the reporting period**

26.4 A micro-entity shall adjust the amounts recognised in its financial statements to reflect adjusting events after the end of the reporting period.

26.5 The following are examples of adjusting events after the end of the reporting period that require a micro-entity to adjust the amounts recognised in its financial statements, or to recognise items that were not previously recognised:

(a) The settlement after the end of the reporting period of a court case that confirms that the micro-entity had a present obligation at the end of the reporting period. The micro-entity adjusts any previously recognised provision related to this court case in accordance with Section 16 Provisions and Contingencies or recognises a new provision. The micro-entity does not merely disclose a contingent liability. Rather, the settlement provides additional evidence to be considered in determining the provision that should be recognised at the end of the reporting period in accordance with Section 16.

(b) The receipt of information after the end of the reporting period indicating that an asset was impaired at the end of the reporting period, or that the amount of a previously recognised impairment loss for that asset needs to be adjusted. For example:

(i) the bankruptcy of a customer that occurs after the end of the reporting period usually confirms that a loss existed at the end of the reporting period on a trade receivable and that the micro-entity needs to adjust the carrying amount of the trade receivable; and

(ii) the sale of inventories after the end of the reporting period may give evidence about their selling price at the end of the reporting period for the purpose of assessing impairment at that date.
(c) The determination after the end of the reporting period of the cost of assets purchased, or the proceeds from assets sold, before the end of the reporting period.

(d) The determination after the end of the reporting period of the amount of profit-sharing or bonus payments, if the micro-entity had a legal or constructive obligation at the end of the reporting period to make such payments as a result of events before that date (see Section 23 Employee Benefits).

(e) The discovery of fraud or errors that show that the financial statements are incorrect.

**Non-adjusting events after the end of the reporting period**

26.6 A micro-entity shall not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the end of the reporting period.

26.7 Examples of non-adjusting events after the end of the reporting period include:

(a) A decline in market value of investments between the end of the reporting period and the date when the financial statements are authorised for issue. The decline in market value does not normally relate to the condition of the investments at the end of the reporting period, but reflects circumstances that have arisen subsequently. Therefore, a micro-entity does not adjust the amounts recognised in its financial statements for the investments.

(b) An amount that becomes receivable as a result of a favourable judgement or settlement of a court case after the reporting date but before the financial statements are authorised for issue. This would be a contingent asset at the reporting date (see paragraph 16.18). However, agreement on the amount of damages for a judgement that was reached before the reporting date, but was not previously recognised because the amount could not be measured reliably, may constitute an adjusting event.

**Going concern**

26.8 A micro-entity shall not prepare its financial statements on a going concern basis if management determines after the end of the reporting period that it either intends to liquidate the micro-entity or to cease trading, or that it has no realistic alternative but to do so.

26.9 Deterioration in operating results and financial position after the reporting period may lead management to determine that they intend to liquidate the micro-entity or to cease trading or that they have no realistic alternative but to do so. If the going concern basis of accounting is no longer appropriate, the effect is so pervasive that this section requires a fundamental change in the basis of accounting.

**Dividends**

26.10 If a micro-entity declares dividends to holders of its equity instruments after the end of the reporting period, the micro-entity shall not recognise those dividends as a liability at the end of the reporting period because no obligation exists at that time.
Section 27
Specialised Activities

Scope of this section

27.1 This section sets out the financial reporting requirements for micro-entities involved in agriculture.

Agriculture

Recognition

27.2 A micro-entity that is engaged in agricultural activity shall recognise a biological asset or an item of agricultural produce when, and only when:

(a) the micro-entity controls the asset as a result of past events;
(b) it is probable that future economic benefits associated with the asset will flow to the micro-entity; and
(c) the cost of the asset can be measured reliably.

Measurement

27.3 A micro-entity shall measure biological assets at cost less any accumulated depreciation and any accumulated impairment losses.

27.4 Agricultural produce harvested from a micro-entity’s biological assets shall be measured at the point of harvest at the lower of cost and estimated selling price less costs to complete and sell.

Such measurement is the cost at that date when applying Section 10 Inventories or another applicable section of this FRS.

Disclosure in the notes

27.5 A micro-entity shall determine the amount of any financial commitments, guarantees and contingencies not recognised in the statement of financial position for the acquisition of a biological asset and disclose that amount within the total amount of financial commitments, guarantees and contingencies (see paragraph 6A.2).

27.6 A micro-entity shall disclose an indication of the nature and form of any biological asset or item of agricultural produce given as security in respect of its commitments, guarantees and contingencies (see paragraph 6A.3).
**Section 28**

*Transition to this FRS*

**Scope of this section**

28.1 This section applies to a **first-time adopter of this FRS**, regardless of its previous accounting framework.

28.2 Notwithstanding the requirements in paragraphs 28.3 and 28.4, a **micro-entity** that has applied this FRS in a previous **reporting period**, but whose most recent previous annual **financial statements** were prepared in accordance with a different accounting framework, must either apply this section or else apply this FRS retrospectively in accordance with Section 8 **Accounting Policies, Changes in Estimates and Errors** as if the micro-entity had never stopped applying this FRS.

**First-time adoption**

28.3 A first-time adopter of this FRS shall apply this section in its first financial statements that conform to this FRS.

28.4 A micro-entity’s first financial statements that conform to this FRS are the first financial statements prepared in accordance with this FRS if, for example, the micro-entity:

   (a) did not present financial statements for previous periods; or
   (b) presented its most recent previous financial statements under previous UK and Republic of Ireland requirements or **FRS 102** and that are therefore not consistent with this FRS in all respects.

28.5 Paragraph 3.9 defines a complete set of financial statements for a micro-entity.

28.6 Paragraph 3.10 requires a micro-entity to disclose, in a complete set of financial statements, comparative information in respect of the preceding period for all amounts presented in the financial statements. Therefore, a micro-entity’s **date of transition** to this FRS is the beginning of the earliest period for which the micro-entity presents full comparative information in accordance with this FRS in its first financial statements that comply with this FRS.

**Procedures for preparing financial statements at the date of transition**

28.7 Except as provided in paragraphs 28.9 to 28.11, a micro-entity shall, in its opening **statement of financial position** as of its date of transition to this FRS (ie the beginning of the earliest period presented):

   (a) recognise all **assets** and **liabilities** whose **recognition** is required by this FRS;
   (b) not recognise items as assets or liabilities if this FRS does not permit such recognition;
   (c) reclassify items that it recognised under its previous financial reporting framework as one type of asset, liability or component of **equity**, but are a different type of asset, liability or component of equity under this FRS; and
   (d) apply this FRS in **measuring** all recognised assets and liabilities.

This section does not require the opening statement of financial position to be presented.
28.8 The accounting policies that a micro-entity uses in its opening statement of financial position under this FRS may differ from those that it used for the same date using its previous financial reporting framework. The resulting adjustments arise from transactions, other events or conditions before the date of transition to this FRS. Therefore, a micro-entity shall recognise those adjustments directly in equity reserves at the date of transition to this FRS.

28.9 On first-time adoption of this FRS, a micro-entity shall not retrospectively change the accounting that it followed under its previous financial reporting framework for any of the following transactions:

(a) **Derecognition of financial assets and financial liabilities**

   **Financial assets** and **financial liabilities** derecognised under a micro-entity’s previous accounting framework before the date of transition shall not be recognised upon adoption of this FRS. Conversely, for financial assets and liabilities that would have been derecognised under this FRS in a transaction that took place before the date of transition, but that were not derecognised under a micro-entity’s previous accounting framework, a micro-entity may choose:

   (i) to derecognise them on adoption of this FRS; or

   (ii) to continue to recognise them until disposed of or settled.

(b) **Accounting estimates**.

28.10 A micro-entity may use one or more of the following exemptions in preparing its first financial statements that conform to this FRS:

(a) **Business combinations and goodwill**

   A first-time adopter is not required to apply Section 14 *Business Combinations and Goodwill* to **business combinations** that were effected before the date of transition to this FRS. However, if a first-time adopter restates any business combination to comply with Section 14, it shall restate all later business combinations. If a first-time adopter does not apply Section 14 retrospectively, the first-time adopter shall recognise and measure all its assets and liabilities acquired or assumed in a past business combination at the date of transition to this FRS in accordance with paragraphs 28.7 to 28.9 or, if applicable, with paragraphs 28.10(b) to (h) except that no adjustment shall be made to the **carrying amount** of goodwill.

(b) **Share-based payment transactions**

   A first-time adopter is not required to apply Section 21 *Share-based Payment* to obligations arising from **share-based payment transactions** that were settled before the date of transition to this FRS.

(c) **Investment properties**

   A first-time adopter is not required to retrospectively apply paragraph 12.15 to determine the depreciated cost of each of the major components of an **investment property** at the date of transition to this FRS. If this exemption is applied, a first-time adopter shall:

   (i) Determine the total cost of the investment property including all of its components. Where no depreciation had been charged under the micro-entity’s previous financial reporting framework, this can be calculated by reversing any revaluation gains or losses previously recorded in equity reserves.

   (ii) The cost of land, if any, shall be separated from buildings.

   (iii) Estimate the total depreciated cost of the investment property (excluding land) at the date of transition to this FRS, by recognising accumulated
depreciation since the date of initial acquisition calculated on the basis of the useful life of the most significant component of the item of investment property (e.g., the main structural elements of the building).

(iv) A portion of the estimated total depreciated cost calculated in paragraph (iii) shall then be allocated to each of the other major components (i.e., excluding the most significant component identified above) to determine their depreciated cost. The allocation should be made on a reasonable and consistent basis. For example, a possible basis of allocation is to multiply the current cost to replace the component by the ratio of its remaining useful life to the expected useful life of a replacement component.

(v) Any amount of the total depreciated cost not allocated under paragraph (iv) shall be allocated to the most significant component of the investment property.

(d) Compound financial instruments

Paragraph 17.11 requires a micro-entity to split a compound financial instrument into its liability and equity components at the date of issue. A first-time adopter need not separate those two components if the liability component is not outstanding at the date of transition to this FRS.

(e) Arrangements containing a lease

A first-time adopter may elect to determine whether an arrangement existing at the date of transition to this FRS contains a lease (see paragraph 15.4) on the basis of facts and circumstances existing at that date, rather than when the arrangement was entered into.

(f) Decommissioning liabilities included in the cost of property, plant and equipment or investment property

Paragraph 12.9(c) states that the cost of an item of property, plant and equipment or investment property includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which a micro-entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period. A first-time adopter may elect to measure this component of the cost of an item of property, plant and equipment or investment property at the date of transition to this FRS, rather than on the date(s) when the obligation initially arose.

(g) Dormant companies

A company within the Act’s definition of a dormant company may elect to retain its accounting policies for reported assets, liabilities and equity at the date of transition to this FRS until there is any change to those balances or the company undertakes any new transactions.

(h) Lease incentives

A first-time adopter is not required to apply paragraphs 15.15 and 15.25 to lease incentives provided the term of the lease commenced before the date of transition to this FRS. The first-time adopter shall continue to recognise any residual benefit or cost associated with these lease incentives on the same basis as that applied at the date of transition to this FRS.
28.11 If it is **impracticable** for a micro-entity to restate the opening statement of financial position at the date of transition for one or more of the adjustments required by paragraph 28.7, the micro-entity shall apply paragraphs 28.7 to 28.10 for such adjustments in the earliest period for which it is practicable to do so.

28.12 Where applicable to the transactions, events or arrangements affected by applying these exemptions, a micro-entity may continue to use the exemptions that are applied at the date of transition to this FRS when preparing subsequent financial statements, until such time when the assets and liabilities associated with those transactions, events or arrangements are derecognised.
Approval by the FRC

Financial Reporting Standard 105 *The Financial Reporting Standard applicable to the Micro-entities Regime* was approved for issue by the Financial Reporting Council on 1 July 2015, following its consideration of the Accounting Council’s Advice for this FRS.
The Accounting Council’s Advice to the FRC to issue FRS 105

Introduction

1. This report provides an overview of the main issues that have been considered by the Accounting Council in advising the Financial Reporting Council (FRC) to issue FRS 105 *The Financial Reporting Standard applicable to the Micro-entities Regime*, incorporating the Council’s advice following the publication of Financial Reporting Exposure Draft (FRED) 58 Draft FRS 105 *The Financial Reporting Standard applicable to the Micro-entities Regime* and FRED 50 Draft FRC Abstract 1 Residential Management Companies’ Financial Statements and Consequential Amendments to the FRSSE.

2. The FRC, in accordance with the Statutory Auditors (Amendment of Companies Act 2006 and Delegation of Functions etc) Order 2012 (SI 2012/1741), is a prescribed body for issuing accounting standards in the UK. The Foreword to Accounting Standards sets out the application of accounting standards in the Republic of Ireland.

3. In accordance with the FRC Codes and Standards: procedures, any proposal to issue, amend or withdraw a code or standard is put to the FRC Board with the full advice of the relevant Councils and/or the Codes & Standards Committee. Ordinarily, the FRC Board will only reject the advice put to it where:
   (a) it is apparent that a significant group of stakeholders has not been adequately consulted;
   (b) the necessary assessment of the impact of the proposal has not been completed, including an analysis of costs and benefits;
   (c) insufficient consideration has been given to the timing or cost of implementation; or
   (d) the cumulative impact of a number of proposals would make the adoption of an otherwise satisfactory proposal inappropriate.

4. The FRC has established the Accounting Council as the relevant Council to assist it in the setting of accounting standards.

Advice

5. The Accounting Council is advising the FRC to issue FRS 105 *The Financial Reporting Standard applicable to the Micro-entities Regime* to facilitate the effective adoption of the micro-entities regime introduced by company law. FRS 105 has been developed from the recognition and measurement requirements of FRS 102 *The Financial Reporting Standard applicable in the UK and Republic of Ireland*, adapted for compliance with the specific company law requirements applicable to the micro-entities regime and other appropriate simplifications.

6. The Accounting Council’s Advice on FRS 102 is contained in that standard.

Background

7. The micro-entities regime was introduced in UK company law in 2013 with significantly reduced financial statements presentation and disclosure requirements. In order to reflect the legal requirements of the new micro-entities regime, the FRC amended the Financial Reporting Standard for Smaller Entities (FRSSE) in April 2014, but this was intended to be a temporary solution until the FRC developed a new standard for entities that prepare financial statements under the micro-entities regime.

98 FRS 105 (July 2015)
In February 2015, the FRC published FRED 58 to consult on a new accounting standard for micro-entities.

In August 2013, the FRC issued FRED 50, a consultation on residential management companies’ financial statements which is relevant in the context of the reporting by micro-entities.

The Accounting Council has considered the responses to FREDs 50 and 58 and took them into account when issuing its advice.

Objective

The FRC gives careful consideration to its objective and the intended effects when developing new accounting standards or requirements for the UK and Republic of Ireland. In developing accounting standards, including FRS 105, the overriding objective of the FRC is to enable users of accounts to receive high-quality understandable financial reporting proportionate to the size and complexity of the entity and users’ information needs.

In meeting this objective, the FRC aims to provide succinct financial reporting standards that:

(a) have consistency with global accounting standards through the application of an IFRS-based solution unless an alternative clearly better meets the overriding objective;
(b) reflect up-to-date thinking and developments in the way businesses operate and the transactions they undertake;
(c) balance consistent principles for accounting by all UK and Republic of Ireland entities with practical solutions, based on size, complexity, public interest and users’ information needs;
(d) promote efficiency within groups; and
(e) are cost-effective to apply.

Consistent recognition and measurement requirements with FRS 102

The Accounting Council is of the view that the reporting requirements for all small entities (including micro-entities) should be based on FRS 102 because it improves consistency across the financial reporting framework in the UK and Republic of Ireland.

To that end, FRED 58 proposed that FRS 105 applies the recognition and measurement requirements of FRS 102, adapted where necessary to reflect the legal requirements of the micro-entities regime and simplified further to reflect the size and nature of micro-entities.

Respondents to the consultation supported that FRS 105 should be developed from FRS 102 and the standard has been finalised on that basis.

The Accounting Council notes that it would not otherwise have recommended some of the simplifications made in FRS 105, including the omission of some of the disclosures required by FRS 102, if they had not been necessary to ensure legal compliance with the micro-entities regime. For example, the Accounting Council continues to believe that investment property should always, where practicable, be measured at fair value as this provides more relevant information to users of the financial statements on an investment property company’s financial position and performance. However, company law prohibits the revaluation of any asset by micro-entities and instead requires that fixed assets are measured at cost less depreciation and impairment.

Financial Reporting Council 99
Amendments to FRS 102 to align FRS 105 with the legal requirements

Scope

17 FRS 105 is an accounting standard applicable to the preparation of the financial statements of a micro-entity which are presumed in law to give a true and fair view in accordance with the micro-entities regime.

18 During its deliberations, the Accounting Council was requested to consider whether FRS 105 could be applied to financial statements prepared for the purpose of submission to the tax authorities by unincorporated businesses and individuals that, if they were companies, would be eligible to apply the micro-entities regime.

19 The Accounting Council notes that the form and content of financial statements prepared for tax purposes is a matter for the relevant tax authorities to determine and believes it is therefore not possible for the FRC to explicitly permit or prohibit the application of FRS 105 for such purpose. The Accounting Council notes that compliance with FRS 105 by businesses incorporated as companies that meet the conditions to apply the micro-entities regime will result in financial statements that in law are presumed to give a true and fair view.

20 The availability of the micro-entities regime is restricted to the smallest of companies and some types of entities are excluded. For example, charities and financial institutions are ineligible to report under this regime. For that reason, in contrast to FRS 102, FRS 105 does not contain any specific requirements that only apply to these entities.

21 The micro-entities regime is not available to entities that are required or choose to prepare consolidated financial statements. FRS 105 therefore does not contain accounting requirements that are relevant for the preparation of consolidated financial statements.

Presentation and disclosure

22 The micro-entities regime specifies certain minimum presentation and disclosure requirements. Financial statements which include the prescribed minimum accounting items are presumed in law to give a true and fair view and no further disclosures need to be made. FRS 105 has been adapted to reflect the legal minimum presentation and disclosure requirements.

Recognition and measurement

23 The micro-entities regime prohibits the use of the Alternative Accounting Rules or the Fair Value Rules set out in company law and therefore micro-entities are not permitted to revalue or subsequently measure assets or liabilities at fair value. To take account of the legal restrictions on fair value measurement, FRS 105 does not allow the subsequent measurement of any asset or liability at fair value. This affects in particular financial instruments and investment properties which a micro-entity has to measure at depreciated cost.

Further simplifications over and above the legal requirements

24 The micro-entities regime is intended to be deregulatory and the Accounting Council believes it is appropriate to simplify some of the accounting requirements applicable under FRS 102. The Accounting Council considers that simplifications would be appropriate if:

(a) the benefits of applying the accounting treatment in FRS 102 do not outweigh the burden for micro-entities and an alternative, more straightforward, treatment could be identified;

100 FRS 105 (July 2015)
(b) the lack of detail in the formats of the financial statements and/or supporting disclosures would limit the understanding of the financial information presented; and/or
(c) transactions occur infrequently amongst micro-entities.

25 The Accounting Council notes that permitting accounting policy choices in FRS 105 would add complexity for preparers of a micro-entity’s financial statements and could cause confusion to users due to the lack of detail in the formats of the financial statements and lack of supporting disclosures to explain the policy choice taken. As a result, the Accounting Council advises that FRS 105 should not contain accounting policy options, except on first-time adoption of FRS 105.

26 The Accounting Council advises that first-time adopters of FRS 105 should be given a choice on whether they apply the requirements of FRS 105 fully retrospectively or whether they apply one or more of the transitional exemptions. Although this introduces a degree of complexity for preparers and users, the Accounting Council believes transitional exemptions are important for a smooth transition and not allowing a choice would disadvantage micro-entities unnecessarily over entities that transition to FRS 102.

27 In all other cases where accounting policy options are provided in FRS 102 they should be removed in FRS 105. The Accounting Council advises that FRS 105 should mandate the most straightforward and easy to apply option.

28 The key areas where simplifications have been made are:
(a) Prohibition of accounting for deferred taxation on the basis that this is a complex area of accounting and the lack of disclosure in a micro-entity’s financial statements make it impossible to distinguish between current and deferred tax.
(b) Prohibition of accounting for equity-settled share-based payments prior to the issue of the shares, because of the prohibition to use fair value measurements and lack of supporting disclosure in the financial statements.
(c) A requirement that the contributions payable to any post-employment benefit plans are accounted for as an expense, subject to a requirement for defined benefit plans to recognise a liability for a schedule of contributions to the extent that it relates to the deficit. The simplification was made on the basis that very few micro-entities will have defined benefit pension schemes.
(d) The distinction between functional and presentation currency is removed as it will be very rare for micro-entities to have a different functional and presentational currency.
(e) Requirement to use contracted rates to translate foreign currency denominated assets and liabilities rather than spot rates. This will simplify the accounting when micro-entities enter into foreign currency forward contracts.
(f) All borrowing and development costs must be expensed, because this is considered the simplest option of accounting for these costs.
(g) Mandating the application of the accrual model to account for government grants because this is considered the simplest method of accounting for these transactions.
(h) Simplifications in relation to the accounting for financial instruments as far as the allocation of interest and transaction costs is concerned. The effective interest rate method is considered too onerous to apply by micro-entities.
(i) Removal of the requirement to impute a market-rate of interest in lending arrangements conducted at non-market rates because considering the nature and size of micro-entities the costs of mandating this requirement would exceed the benefits.
(j) Simplified requirements for classifying financial instruments as equity or debt because most micro-entities will issue simple equity instruments.

(k) Prohibition of the recognition of separately identifiable intangible assets in a trade and asset acquisition because these are not required items in the financial statements formats.

(l) Removal of the requirements concerning accounting for hyperinflation because this is unlikely to be an issue for micro-entities.

(m) Removal of accounting requirements relating to specialised activities including extractive activities, service concessions, heritage assets and funding commitments because micro-entities will not typically enter into these transactions.

**Feedback on the proposed simplification from respondents to FRED 58**

29 Most respondents supported the proposed simplifications and the principles applied by the Accounting Council to assess whether a simplification is appropriate. It was noted that some stakeholders are of the view that the recognition of deferred tax should be permitted or required in FRS 105. However, after having considered these comments the Accounting Council retains its view that without additional disclosure the benefits of requiring micro-entities to account for deferred tax do not exceed the costs.

30 FRED 58 proposed that government grants should be accounted for using the performance model. The views of respondents on whether FRS 105 should require the performance or accrual model were divided. The evidence provided by respondents suggests that the accrual model may in practice be easier to apply than the performance model and the Accounting Council therefore advises that FRS 105 should mandate the accrual model.

**Determining accounting policies where FRS 105 does not contain requirements**

31 A micro-entity that enters into a transaction that is not specifically covered in FRS 105 is required to refer to the concepts and pervasive principles set out in Section 2 Concepts and Pervasive Principles of FRS 105 in determining its accounting policies. The Accounting Council notes that micro-entities are not required to refer to other accounting standards or authoritative guidance because these requirements may be inconsistent with the legal requirements of the micro-entities regime.

**Transitional provisions – fair value / revaluation as deemed cost**

32 The micro-entities regime requires micro-entities to apply the historical cost accounting rules, which require fixed assets to be included at purchase price or production cost. Therefore the Accounting Council advises that it would be inconsistent with the legal framework for micro-entities to provide in FRS 105 a transitional exemption to allow micro-entities to carry forward previous revaluations of property, plant and equipment or the fair value of investment properties or investments in shares as deemed cost.

33 FRS 105 provides a transitional exemption in respect of the determination of the depreciated historical cost of investment properties. Under the transitional exemption a micro-entity is permitted, for the purpose of estimating accumulated depreciation at the date of transition, to treat an investment property as if it were a single asset with a useful economic life equal to that of its most significant component, which is likely to be comprised of its main structural elements such as foundations, walls etc. This exempts a micro-entity from having to determine the historical cost of each component that has been replaced in the past and the depreciation that would have been charged since their initial recognition.
34 The Accounting Council notes that the micro-entities regime is optional and that if a micro-entity wishes to retain revalued amounts in its financial statement it could continue to apply the small company regime, rather than moving to the micro-entities regime.

Structure and language of FRS 105

35 FRS 105 should be as easily accessible and understandable as possible. A number of respondents to FRED 58 suggested that the accessibility of FRS 105 could be enhanced by departing from the section and paragraph numbering of FRS 102. The Accounting Council agrees and advises that FRS 105 should where possible maintain consistency with the language and terminology used in FRS 102, but use its own structure (ie section and paragraph numbering).

Residents’ management companies

36 In considering the feedback received from the FRC’s previous consultations, the Accounting Council noted that no clear consensus existed amongst respondents on the appropriate basis of accounting in the statutory financial statements of residents’ management companies¹ where service charge monies are held on trust in accordance with section 42 of the Landlord and Tenant Act 1987. However, there was general agreement that no change should be made to FRS 105, or any other relevant financial reporting standard (including FRS 102), to address such a narrow and sector-specific issue.

37 The Accounting Council considered this issue carefully. It assessed the case for further intervention by reference to the FRC’s published Principles for the development of Codes, Standards and Guidance² and, in particular, the extent to which the anticipated benefits from any changes to current practices would outweigh the costs incurred by the entities involved. It agreed with respondents that this matter does not merit a change in accounting standards, and therefore advises that no changes are made to FRS 105 (or FRS 102) that are specific to residents’ management companies.

Effective date

38 FRS 105 is effective for accounting periods commencing on or after 1 January 2016, in line with the mandatory effective date of the consequential amendments to FRS 102 resulting from the UK’s new small companies regime. Early application of FRS 105 is permitted.

39 See Appendix IV Republic of Ireland (RoI) legal references of FRS 105 for information on the applicability of the micro-entities regime in the Republic of Ireland.

Approval of this advice

40 This advice to the FRC was approved by the Accounting Council on 16 June 2015.

---

¹ An organisation which may be referred to in the lease, which is responsible for the provision of services, and manages and arranges maintenance of the property, but which does not necessarily have any legal interest in the property.

</table>
| active market | A market in which all the following conditions exist:  
(a) the items traded in the market are homogeneous;  
(b) willing buyers and sellers can normally be found at any time; and  
(c) prices are available to the public. |
| agent | An entity is acting as an agent when it does not have exposure to the significant risks and rewards associated with the sale of goods or the rendering of services. One feature indicating that an entity is acting as an agent is that the amount the entity earns is predetermined, being either a fixed fee per transaction or a stated percentage of the amount billed to the customer. |
| agricultural activity | The management by an entity of the biological transformation of biological assets for sale, into agricultural produce or into additional biological assets. |
| agricultural produce | The harvested product of the entity’s biological assets. |
| amortisation | The systematic allocation of the depreciable amount of an asset over its useful life. |
| asset | A resource controlled by the entity as a result of past events and from which future economic benefits are expected to flow to the entity. |
| associate | An entity, including an unincorporated entity such as a partnership, over which the investor has significant influence and that is neither a subsidiary nor an interest in a joint venture. |
| biological asset | A living animal or plant. |
| borrowing costs | Interest and other costs incurred by an entity in connection with the borrowing of funds. |
| **business** | An integrated set of activities and assets conducted and managed for the purpose of providing:

(a) a return to investors; or

(b) lower costs or other economic benefits directly and proportionately to policyholders or participants.

A business generally consists of inputs, processes applied to those inputs, and resulting outputs that are, or will be, used to generate revenues. If goodwill is present in a transferred set of activities and assets, the transferred set shall be presumed to be a business. |
| **business combination** | The bringing together of separate entities or businesses into one reporting entity. |
| **carrying amount** | The amount at which an asset or liability is recognised in the statement of financial position. |
| **cash-generating unit** | The smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. |
| **cash-settled share-based payment transaction** | A share-based payment transaction in which the entity acquires goods or services by incurring a liability to transfer cash or other assets to the supplier of those goods or services for amounts that are based on the price (or value) of the entity’s shares or other equity instruments of the entity or another group entity. |
| **change in accounting estimate** | An adjustment of the carrying amount of an asset or a liability, or the amount of the periodic consumption of an asset, that results from the assessment of the present status of, and expected future benefits and obligations associated with, assets and liabilities. Changes in accounting estimates result from new information or new developments and, accordingly, are not corrections of errors. |
| **closing rate** | The spot exchange rate at the end of the reporting period. |
| **commencement of lease term** | The date from which the lessee is entitled to exercise its right to use the leased asset. It is the date of initial recognition of the lease (ie the recognition of the assets, liabilities, income or expenses resulting from the lease, as appropriate). |
| **compound financial instrument** | A financial instrument that, from the issuer’s perspective, contains both a liability and an equity element. |
| **consolidated financial statements** | The financial statements of a parent and its subsidiaries presented as those of a single economic entity. |
| **construction contract** | A contract specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use. |
| **constructive obligation** | An obligation that derives from an entity’s actions where:

(a) by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities; and

(b) as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities. |

<tr>
<td>contingent asset</td>
<td>A possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.</td>
</tr>
</tbody>
</table>
| contingent liability                    | (a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or  
   (b) a present obligation that arises from past events but is not recognised because:  
      (i) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or  
      (ii) the amount of the obligation cannot be measured with sufficient reliability. |
<p>| contingent rent                         | That portion of the lease payments that is not fixed in amount but is based on the future amount of a factor that changes other than with the passage of time (eg percentage of future sales, amount of future use, future price indices, and future market rates of interest). |
| control (of an entity)                  | The power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.                       |
| current tax                             | The amount of income tax payable (refundable) in respect of the taxable profit (tax loss) for the current period or past reporting periods. |
| date of transition                      | The beginning of the earliest period for which an entity presents full comparative information in a given standard in its first financial statements that comply with that standard. |
| deferred tax                            | Income tax payable (recoverable) in respect of the taxable profit (tax loss) for future reporting periods as a result of past transactions or events. |
| defined benefit plans                   | Post-employment benefit plans other than defined contribution plans.                                                                     |
| defined contribution plans              | Post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and has no legal or constructive obligation to pay further contributions or to make direct benefit payments to employees if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. |
| depreciable amount                      | The cost of an asset, or other amount substituted for cost (in the financial statements), less its residual value.                         |
| depreciation                            | The systematic allocation of the depreciable amount of an asset over its useful life.                                                     |
| derecognition                           | The removal of a previously recognised asset or liability from an entity’s statement of financial position.                               |</p>
<table>
<thead>
<tr>

</table>
| **derivative** | Is a financial instrument with the following three characteristics:  
(a) its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable (sometimes called the 'underlying'), provided in the case of a non-financial variable that the variable is not specific to a party to the contract;  
(b) it requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors; and  
(c) it is settled at a future date. |
| **development** | The application of research findings or other knowledge to a plan or design for the production of new or substantially improved materials, devices, products, processes, systems or services before the start of commercial production or use. |
| **employee benefits** | All forms of consideration given by an entity in exchange for service rendered by employees. |
| **equity** | The residual interest in the assets of the entity after deducting all its liabilities. |
| **equity-settled share-based payment transaction** | A share-based payment transaction in which the entity:  
(a) receives goods or services as consideration for its own equity instruments (including shares or share options); or  
(b) receives goods or services but has no obligation to settle the transaction with the supplier. |
| **errors** | Omissions from, and misstatements in, the entity's financial statements for one or more prior periods arising from a failure to use, or misuse of, reliable information that:  
(a) was available when financial statements for those periods were authorised for issue; and  
(b) could reasonably be expected to have been obtained and taken into account in the preparation and presentation of those financial statements. |
<p>| <strong>expenses</strong> | Decreases in economic benefits during the reporting period in the form of outflows or depletions of assets or incurrences of liabilities that result in decreases in equity, other than those relating to distributions to equity investors. |
| <strong>fair value</strong> | The amount for which an asset could be exchanged, a liability settled, or an equity instrument granted could be exchanged, between knowledgeable, willing parties in an arm’s length transaction. In the absence of any specific guidance provided in the relevant section of this FRS, the guidance in paragraph 2.31 shall be used in determining fair value. |
| <strong>fair value less costs to sell</strong> | The amount obtainable from the sale of an asset in an arm’s length transaction between knowledgeable, willing parties, less the costs of disposal. |</p>
<table>
<thead>
<tr>
<th>finance lease</th>
<th>A lease that transfers substantially all the risks and rewards incidental to ownership of an asset. Title may or may not eventually be transferred. A lease that is not a finance lease is an operating lease.</th>
</tr>
</thead>
</table>
| financial asset | Any asset that is:  
(a) cash;  
(b) an equity instrument of another entity;  
(c) a contractual right:  
(i) to receive cash or another financial asset from another entity; or  
(ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity; or  
(d) a contract that will or may be settled in the entity’s own equity instruments and:  
(i) under which the entity is or may be obliged to receive a variable number of the entity’s own equity instruments; or  
(ii) that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity’s own equity instruments. For this purpose the entity’s own equity instruments do not include instruments that are themselves contracts for the future receipt or delivery of the entity’s own equity instruments. |
| financial guarantee contract | A contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the original or modified terms of a debt instrument. |
| financial instrument | A contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. |
| financial liability | Any liability that is:  
(a) a contractual obligation:  
(i) to deliver cash or another financial asset to another entity; or  
(ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity, or  
(b) a contract that will or may be settled in the entity’s own equity instruments and:  
(i) under which the entity is or may be obliged to deliver a variable number of the entity’s own equity instruments; or  
(ii) will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity’s own equity instruments. For this purpose the entity’s own equity instruments do not include instruments that are themselves contracts for the future receipt or delivery of the entity’s own equity instruments. |
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>financial position</td>
<td>The relationship of the assets, liabilities and equity of an entity as reported in the statement of financial position.</td>
</tr>
<tr>
<td>financial statements</td>
<td>A structured presentation of the financial position and financial performance of an entity.</td>
</tr>
<tr>
<td>financing activities</td>
<td>Activities that result in changes in the size and composition of the contributed equity and borrowings of the entity.</td>
</tr>
<tr>
<td>first-time adopter of this FRS</td>
<td>An entity that presents its first annual financial statements that conform to this FRS, regardless of its previous accounting framework.</td>
</tr>
<tr>
<td>fixed assets</td>
<td>Assets of an entity which are intended for use on a continuing basis in the entity’s activities.</td>
</tr>
<tr>
<td>FRS 102</td>
<td>FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland</td>
</tr>
<tr>
<td>gains</td>
<td>Increases in economic benefits that meet the definition of income but are not revenue.</td>
</tr>
<tr>
<td>goodwill</td>
<td>Future economic benefits arising from assets that are not capable of being individually identified and separately recognised.</td>
</tr>
<tr>
<td>government grant</td>
<td>Assistance by government in the form of a transfer of resources to an entity in return for past or future compliance with specified conditions relating to the operating activities of the entity. Government refers to government, government agencies and similar bodies whether local, national or international.</td>
</tr>
<tr>
<td>grant date</td>
<td>The date at which the entity and another party (including an employee) agree to a share-based payment arrangement, being when the entity and the counterparty have a shared understanding of the terms and conditions of the arrangement. At grant date the entity confers on the counterparty the right to cash, other assets, or equity instruments of the entity, provided the specified vesting conditions, if any, are met. If that agreement is subject to an approval process (for example, by shareholders), grant date is the date when that approval is obtained.</td>
</tr>
<tr>
<td>gross investment in a lease</td>
<td>The aggregate of: (a) the minimum lease payments receivable by the lessor under a finance lease; and (b) any unguaranteed residual value accruing to the lessor.</td>
</tr>
<tr>
<td>impairment loss</td>
<td>The amount by which the carrying amount of an asset exceeds: (a) in the case of inventories, its selling price less costs to complete and sell; (b) in the case of financial assets the amounts as set out in paragraph 9.18; or (c) in the case of any other asset, its recoverable amount.</td>
</tr>
<tr>
<td>impracticable</td>
<td>Applying a requirement is impracticable when the entity cannot apply it after making every reasonable effort to do so.</td>
</tr>
<tr>
<td>inception of the lease</td>
<td>The earlier of the date of the lease agreement and the date of commitment by the parties to the principal provisions of the lease.</td>
</tr>
<tr>
<td><strong>income</strong></td>
<td>Increases in economic benefits during the <strong>reporting period</strong> in the form of inflows or enhancements of <strong>assets</strong> or decreases of <strong>liabilities</strong> that result in increases in <strong>equity</strong>, other than those relating to contributions from equity investors.</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td><strong>income statement</strong></td>
<td><strong>Financial statement</strong> that presents all items of <strong>income</strong> and <strong>expense</strong> recognised in a <strong>reporting period</strong> (referred to as the profit and loss account in the <strong>Act</strong>).</td>
</tr>
<tr>
<td><strong>income tax</strong></td>
<td>All domestic and foreign taxes that are based on <strong>taxable profits</strong>. Income tax also includes taxes, such as withholding taxes, that are payable by a <strong>subsidiary, associate or joint venture</strong> on distributions to the reporting entity.</td>
</tr>
</tbody>
</table>
| **intangible asset** | An identifiable non-monetary asset without physical substance. Such an **asset** is identifiable when:

(a) it is separable, ie capable of being separated or divided from the entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, asset or **liability**; or

(b) it arises from contractual or other legal rights, regardless of whether those rights are transferable or separable from the entity or from other rights and obligations. |
| **interest rate implicit in the lease** | The discount rate that, at the **inception of the lease**, causes the aggregate **present value** of:

(a) the **minimum lease payments**; and

(b) the unguaranteed **residual value** to be equal to the sum of:

(i) the **fair value** of the leased **asset**; and

(ii) any initial direct costs of the lessor. |
| **inventories** | **Assets**:

(a) held for sale in the ordinary course of business;

(b) in the process of production for such sale; or

(c) in the form of materials or supplies to be consumed in the production process or in the rendering of services. |
| **investment property** | Property (land or a building, or part of a building, or both) held by the owner or by the lessee under a **finance lease** to earn rentals or for capital appreciation or both, rather than for:

(a) use in the production or supply of goods or services or for administrative purposes; or

(b) sale in the ordinary course of business. |
| **joint control** | The contractually agreed sharing of **control** over an economic activity. It exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the **venturers**). |
| **joint venture** | A contractual arrangement whereby two or more parties undertake an economic activity that is subject to **joint control**. Joint ventures can take the form of jointly controlled operations, jointly controlled **assets**, or **jointly controlled entities**. |
| **jointly controlled entity** | A joint venture that involves the establishment of a corporation, partnership or other entity in which each venturer has an interest. The entity operates in the same way as other entities, except that a contractual arrangement between the venturers establishes joint control over the economic activity of the entity. |
| **lease** | An agreement whereby the lessor conveys to the lessee in return for a payment or series of payments the right to use an asset for an agreed period of time. |
| **lease incentives** | Incentives provided by the lessor to the lessee to enter into a new or renew an operating lease. Examples of such incentives include up-front cash payments to the lessee, the reimbursement or assumption by the lessor of costs of the lessee (such as relocation costs, leasehold improvements and costs associated with pre-existing lease commitments of the lessee), or initial periods of the lease provided by the lessor rent-free or at a reduced rent. |
| **lease term** | The non-cancellable period for which the lessee has contracted to lease the asset together with any further terms for which the lessee has the option to continue to lease the asset, with or without further payment, when at the inception of the lease it is reasonably certain that the lessee will exercise the option. |
| **lessee’s incremental borrowing rate (of interest)** | The rate of interest the lessee would have to pay on a similar lease or, if that is not determinable, the rate that, at the inception of the lease, the lessee would incur to borrow over a similar term, and with a similar security, the funds necessary to purchase the asset. |
| **liability** | A present obligation of the entity arising from past events, the settlement of which is expected to result in an outflow from the entity of resources embodying economic benefits. |
| **material** | Omissions or misstatements of items are material if they could, individually or collectively, influence the economic decisions of users taken on the basis of the financial statements. Materiality depends on the size and nature of the omission or misstatement judged in the surrounding circumstances. The size or nature of the item, or a combination of both, could be the determining factor. |
| **measurement** | The process of determining the monetary amounts at which the elements of the financial statements are to be recognised and carried in the statement of financial position and income statement. |
| **micro-entity** | Is an entity that meets all of the following conditions:  
(a) it is a company established under company law;  
(b) it qualifies as a micro-entity in accordance with section 384A of the Act; and  
(c) it is not excluded from being treated as a micro-entity under section 384B of the Act.  
Micro-entities are a subset of small companies as defined in the Act. |
<p>| <strong>micro-entity minimum accounting items</strong> | The item of information required under the micro-entities regime to be contained in the financial statements of a micro-entity. These are set out in Sections 4 Statement of Financial Position, 5 Income Statement and 6 Notes to the Financial Statements of this FRS. |</p>
<table>
<thead>
<tr>
<th>Term</th>

<tbody>
<tr>
<td><strong>micro-entity provisions</strong></td>
<td>Means any provisions of Part 15, Part 16 or regulations under Part 15 of the Act relating specifically to the individual accounts of an entity which qualifies as a micro-entity.</td>
</tr>
<tr>
<td><strong>micro-entities regime</strong></td>
<td>The legal requirements and exemptions relating to the preparation of the financial statements of micro-entities as set out in the Act and Small Companies Regulations.</td>
</tr>
<tr>
<td><strong>minimum lease payments</strong></td>
<td>The payments over the lease term that the lessee is or can be required to make, excluding contingent rent, costs for services and taxes to be paid by and reimbursed to the lessor, together with:</td>
</tr>
<tr>
<td></td>
<td>(a) for a lessee, any amounts guaranteed by the lessee or by a party related to the lessee; or</td>
</tr>
<tr>
<td></td>
<td>(b) for a lessor, any residual value guaranteed to the lessor by:</td>
</tr>
<tr>
<td></td>
<td>(i) the lessee;</td>
</tr>
<tr>
<td></td>
<td>(ii) a party related to the lessee; or</td>
</tr>
<tr>
<td></td>
<td>(iii) a third party unrelated to the lessor that is financially capable of discharging the obligations under the guarantee.</td>
</tr>
<tr>
<td></td>
<td>However, if the lessee has an option to purchase the asset at a price that is expected to be sufficiently lower than fair value at the date the option becomes exercisable for it to be reasonably certain, at the inception of the lease, that the option will be exercised, the minimum lease payments comprise the minimum payments payable over the lease term to the expected date of exercise of this purchase option and the payment required to exercise it.</td>
</tr>
<tr>
<td><strong>monetary items</strong></td>
<td>Units of currency held and assets and liabilities to be received or paid in a fixed or determinable number of units of currency.</td>
</tr>
<tr>
<td><strong>multi-employer (benefit) plans</strong></td>
<td>Defined contribution plans (other than state plans) or defined benefit plans (other than state plans) that:</td>
</tr>
<tr>
<td></td>
<td>(a) pool the assets contributed by various entities that are not under common control; and</td>
</tr>
<tr>
<td></td>
<td>(b) use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.</td>
</tr>
<tr>
<td><strong>net investment in a lease</strong></td>
<td>The gross investment in a lease discounted at the interest rate implicit in the lease.</td>
</tr>
<tr>
<td><strong>non-exchange transaction</strong></td>
<td>A transaction whereby an entity receives value from another entity without directly giving approximately equal value in exchange, or gives value to another entity without directly receiving approximately equal value in exchange.</td>
</tr>
<tr>
<td><strong>notes (to the financial statements prepared under this FRS)</strong></td>
<td>Notes contain information in addition to that presented in the statement of financial position and income statement. Notes are required to be presented at the foot of the statement of financial position.</td>
</tr>
<tr>
<td><strong>onerous contract</strong></td>
<td>A contract in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.</td>
</tr>
<tr>
<td><strong>operating activities</strong></td>
<td>The principal revenue-producing activities of the entity and other activities that are not investing or <strong>financing activities</strong>.</td>
</tr>
<tr>
<td>-------------------------</td>
<td>-------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>operating lease</strong></td>
<td>A <strong>lease</strong> that does not transfer substantially all the risks and rewards incidental to ownership. A lease that is not an operating lease is a <strong>finance lease</strong>.</td>
</tr>
<tr>
<td><strong>ordinary share</strong></td>
<td>An equity instrument that is subordinate to all other classes of equity instrument.</td>
</tr>
<tr>
<td><strong>owners</strong></td>
<td>Holders of instruments classified as <strong>equity</strong>.</td>
</tr>
<tr>
<td><strong>parent</strong></td>
<td>An entity that has one or more <strong>subsidiaries</strong>.</td>
</tr>
<tr>
<td><strong>performance</strong></td>
<td>The relationship of the <strong>income</strong> and <strong>expenses</strong> of a <strong>micro-entity</strong>, as reported in the <strong>income statement</strong>.</td>
</tr>
<tr>
<td><strong>post-employment benefits</strong></td>
<td><strong>Employee benefits</strong> (other than <strong>termination benefits</strong> and short-term employee benefits) that are payable after the completion of employment.</td>
</tr>
<tr>
<td><strong>post-employment benefit plans</strong></td>
<td>Formal or informal arrangements under which an entity provides <strong>post-employment benefits</strong> for one or more employees.</td>
</tr>
<tr>
<td><strong>present value</strong></td>
<td>A current estimate of the present discounted value of the future net <strong>cash flows</strong> in the normal course of business.</td>
</tr>
</tbody>
</table>
| **principal**           | An entity is acting as a principal when it has exposure to the significant risks and rewards associated with the sale of goods or the rendering of services. Features that indicate that an entity is acting as a principal include:  
(a) the entity has the primary responsibility for providing the goods or services to the customer or for fulfilling the order, for example by being responsible for the acceptability of the products or services ordered or purchased by the customer;  
(b) the entity has **inventory** risk before or after the customer order, during shipping or on return;  
(c) the entity has latitude in establishing prices, either directly or indirectly, for example by providing additional goods or services; and  
(d) the entity bears the customer’s credit risk for the amount receivable from the customer. |
| **probable**            | More likely than not. |
| **profit or loss**      | The total of **income** less **expenses**. |
| **property, plant and equipment** | Tangible assets that:  
are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes; and  
are expected to be used during more than one period. |
| **prospectively (applying a change in accounting policy)** | Applying the new **accounting policy** to transactions, other events and conditions occurring after the date as at which the policy is changed. |
| **provision**           | A **liability** of uncertain timing or amount. |
| **prudence** | The inclusion of a degree of caution in the exercise of the judgements needed in making the estimates required under conditions of uncertainty, such that *assets* or *income* are not overstated and *liabilities* or *expenses* are not understated. |
| **recognition** | The process of incorporating in the *statement of financial position* or *income statement* an item that meets the definition of an *asset*, *liability*, *equity*, *income* or *expense* and satisfies the following criteria:
- (a) it is *probable* that any future economic benefit associated with the item will flow to or from the *entity*; and
- (b) the item has a cost or value that can be measured with reliability. |
| **recoverable amount** | The higher of an asset's (or cash-generating unit's) *fair value less costs to sell* and its *value in use*. |
| **reporting date** | The end of the latest period covered by *financial statements*. |
| **reporting period** | The period covered by *financial statements*. |
| **research** | Original and planned investigation undertaken with the prospect of gaining new scientific or technical knowledge and understanding. |
| **residual value (of an asset)** | The estimated amount that an entity would currently obtain from disposal of an asset, after deducting the estimated costs of disposal, if the asset were already of the age and in the condition expected at the end of its *useful life*. |
| **restructuring** | A restructuring is a programme that is planned and controlled by management and materially changes either:
- (a) the scope of a business undertaken by an entity; or
- (b) the manner in which that business is conducted. |
| **retrospective application (of an accounting policy)** | Applying a new *accounting policy* to transactions, other events and conditions as if that policy had always been applied. |
| **revenue** | The gross inflow of economic benefits during the period arising in the course of the ordinary activities of an entity when those inflows result in increases in *equity*, other than increases relating to contributions from equity participants. |
| **share-based payment transaction** | A transaction in which the entity:
- (a) receives goods or services (including employee services) as consideration for its own equity instruments (including shares or *share options*); or
- (b) receives goods or services but has no obligation to settle the transaction with supplier; or
- (c) acquires goods or services by incurring *liabilities* to the supplier of those goods or services for amounts that are based on the price (or value) of the entity’s shares or other equity instruments of the entity or another group entity. |
<p>| <strong>share option</strong> | A contract that gives the holder the right, but not the obligation, to subscribe to the entity’s shares at a fixed or determinable price for a specific period of time. |</p>
<table>
<thead>
<tr>
<th>significant influence</th>
<th>Is the power to participate in the financial and operating policy decisions of the <strong>associate</strong> but is not <strong>control</strong> or <strong>joint control</strong> over those policies.</th>
</tr>

<tbody>
<tr>
<td>Small Companies Regulations</td>
<td>The Small Companies and Groups (Accounts and Directors’ Report) Regulations 2008 (SI 2008/409)</td>
</tr>
<tr>
<td>state (employee benefit) plan</td>
<td>Employee benefit plans established by legislation to cover all entities (or all entities in a particular category, for example a specific industry) and operated by national or local government or by another body (for example an autonomous agency created specifically for this purpose) which is not subject to control or influence by the reporting entity.</td>
</tr>
<tr>
<td>statement of financial position</td>
<td><strong>Financial statement</strong> that presents the relationship of an entity’s <strong>assets</strong>, <strong>liabilities</strong> and <strong>equity</strong> as of a specific date (referred to as the balance sheet in the <strong>Act</strong>).</td>
</tr>
<tr>
<td>subsidiary</td>
<td>An entity, including an unincorporated entity such as a partnership, that is <strong>controlled</strong> by another entity (known as the <strong>parent</strong>).</td>
</tr>
</tbody>
</table>
| substantively enacted | Tax rates shall be regarded as substantively enacted when the remaining stages of the enactment process historically have not affected the outcome and are unlikely to do so.  
A UK tax rate shall be regarded as having been substantively enacted if it is included in either:  
(a) a Bill that has been passed by the House of Commons and is awaiting only passage through the House of Lords and Royal Assent; or  
(b) a resolution having statutory effect that has been passed under the Provisional Collection of Taxes Act 1968. (Such a resolution could be used to collect taxes at a new rate before that rate has been enacted. In practice, corporation tax rates are now set a year ahead to avoid having to invoke the Provisional Collection of Taxes Act for the quarterly payment system.)  
A Republic of Ireland tax rate can be regarded as having been substantively enacted if it is included in a Bill that has been passed by the Dail. |
| tax expense | The aggregate amount included in **profit or loss** or **equity** for the **reporting period** in respect of **current tax**. |
| taxable profit (tax loss) | The profit (loss) for a **reporting period** upon which **income taxes** are payable or recoverable, determined in accordance with the rules established by the taxation authorities. Taxable profit equals taxable income less amounts deductible from taxable **income**. |
| termination benefits | **Employee benefits** provided in exchange for the termination of an employee’s employment as a result of either:  
(a) an entity’s decision to terminate an employee’s employment before the normal retirement date; or  
(b) an employee's decision to accept voluntary redundancy in exchange for those benefits. |
<table>
<thead>
<tr>
<th><strong>transaction costs</strong>&lt;br&gt;<strong>(financial instruments)</strong></th>
<th>Incremental costs that are directly attributable to the acquisition, issue or disposal of a <strong>financial asset</strong> or <strong>financial liability</strong>, or the issue or reacquisition of an entity’s own equity instrument. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial asset or financial liability, or had not issued or reacquired its own equity instrument.</th>

Appendix III: Note on legal requirements

Introduction

A3.1 This appendix provides an overview of how the requirements of FRS 105 address UK company law requirements. It is therefore written from the perspective of a company to which The Small Companies and Groups (Accounts and Directors’ Report) Regulations 2008 (SI 2008/409) amended by The Small Companies (Micro-Entities’ Accounts) Regulations 2013 (SI 2013/3008) and The Companies, Partnerships and Groups (Accounts and Reports) Regulations 2015 (SI 2015/980) apply.

A3.2 The Small Companies (Micro-Entities’ Accounts) Regulations 2013 were made in November 2013 and apply to the financial statements of micro-entities for accounting periods ending on or after 30 September 2013 for companies filing their accounts on or after 1 December 2013.

A3.3 The definition of a micro-entity is contained in sections 384A and 384B of the Companies Act 2006 (Act). The qualifying conditions are met by a company in a year in which it does not exceed two or more of the following criteria:

(a) Turnover £632,000
(b) Balance sheet total £316,000
(c) Number of employees 10

A3.4 For any company, other than a newly incorporated company, to qualify as a micro-entity, the qualifying conditions must be met for two consecutive years. A company will cease to qualify as a micro-entity if it fails to meet the qualifying conditions for two consecutive years. However, if a company which qualified as a micro-entity in one period no longer meets the criteria for a micro-entity in the next period, the company may continue to claim the exemptions available in the next period. If that company then reverts back to being a micro-entity by meeting the criteria, the exemptions will continue uninterrupted.

A3.5 Certain companies are excluded by section 384B of the Act from being treated as micro-entities, including those excluded from the small companies regime for reasons of public interest (as set out in section 384), certain financial institutions, charities, those voluntarily preparing group accounts and those included in group accounts. The Act should be referred to for a full list of excluded companies.

A3.6 Entities that are not companies, such as limited liability partnerships (LLPs), do not meet the definition of a micro-entity.

Applicable accounting framework

A3.7 Accounts prepared in accordance with FRS 105 are classified as ‘Companies Act individual accounts’ for the purposes of section 395 of the Act and are therefore required to comply with the applicable provisions of Parts 15 and 16 of the Act and with the Regulations referred to in paragraph A3.1.

Fair value at initial recognition

A3.8 The Small Companies (Micro-Entities’ Accounts) Regulations 2013 state that micro-entities are not permitted to apply the Alternative Accounting Rules or the Fair Value Rules as set out in company law. Therefore micro-entities are only permitted to apply the Historical Cost Accounting Rules.

118 FRS 105 (July 2015)
A3.9  FRS 105 states that certain types of assets and liabilities must be measured at fair value at initial recognition, for example inventories acquired through a non-exchange transaction. This does not breach the prohibition against fair value accounting as the use of a fair value is a method of estimating cost at initial recognition.

True and fair view

A3.10  FRS 105 is an accounting standard and all accounting standards issued by the Financial Reporting Council are applicable to the preparation of financial statements that are intended to give a true and fair view. Financial statements of a micro-entity that include the minimum accounting items specified by The Small Companies (Micro-Entities’ Accounts) Regulations 2013 are presumed in law to give a true and fair view.

Distributable profits

A3.11  The determination of profits available for distribution is a complex area where accounting and company law interface. In determining profits available for distribution any entity may refer to Technical Release 02/10 Guidance on realised and distributable profits under the Companies Act 2006 issued by the Institute of Chartered Accountants in England and Wales and the Institute of Chartered Accountants of Scotland, or any successor document, to determine profits available for distribution.
Appendix IV: Republic of Ireland (RoI) legal references

A4.1 At the time of issuing FRS 105, the micro-entities legislation is not available for application in the Republic of Ireland. However, the Irish Department of Jobs, Enterprise and Innovation has consulted on the possible enactment of this legislation in its Consultation on the transposition of the EU Accounting Directive 2013/34/EU.

A4.2 If legislation giving effect to the micro-entities option is enacted in Ireland, FRS 105 will be available for application in line with the effective date of the relevant legislation and will be updated to include Republic of Ireland legal references.
